

**STATE FOREST HEADQUARTERS, ODISHA,
OFFICE OF THE PRINCIPAL CHIEF CONSERVATOR OF FORESTS & HoFF
ARANYA BHAWAN, CHANDRASEKHARPUR, BHUBANESWAR-751023.**

Letter No. 3039 /10F (CAMPA)-57/2023

Dated, Bhubaneswar the 16th February, 2024

From

M.Yogajayanand, IFS
Chief Executive Officer,
State Authority, CAMPA, Odisha

To

The Chief Executive Officer,
National Authority CAMPA,
Ministry of Environment, Forests & Climate Change,
Government of India, New Delhi-110003.

Sub: **Submission of CAMPA Annual Plan of Operation 2024-25 booklet.**

Ref: F.No.NA-15/2/2022-NA dated 16.10.2023 & No. NA-5/1/2020-NA dated 09.01.2024 of National Authority, CAMPA.

Sir,

With reference to the above mentioned letters of National Authority, CAMPA on the captioned subject, I am directed to furnish herewith the CAMPA Annual Plan of Operation, 2024-25 booklet in two copies with the soft copy thereof as required for necessary approval.

Encl : APO (2 copies)

Yours faithfully,

M.C.
16/2/24
Chief Executive Officer
State Authority, CAMPA

Memo No. 3040 Dt. 16-02-2024

Copy along with a copy of the CAMPA Annual Plan of Operation, 2024-25 booklet forwarded to the Deputy Director General, Integrated Regional Office, Ministry of Environment, Forests & Climate Change, Government of India, Chandrasekharpur, Bhubaneswar for information and necessary action.

M.C.
16/2/24
Chief Executive Officer
State Authority, CAMPA

PART-I

Brief History and Past Performance

“

The forest cover in Odisha has significantly increased over 537 Km² which is the **third highest** in the country, Tree cover has increased over 356 Km² which is the **second highest** and recorded **largest increase** in mangrove forests of 8 Km² in the country. ”

State of Forest Report, 2021

1.0 BRIEF DESCRIPTION OF FOREST & FORESTRY SECTOR IN THE STATE.

1.1 Situation:

Odisha has 30 districts. These 30 districts are under eight Forest Circles to streamline the governance. **Odisha** is located in the eastern coast. It is bounded by the States of West Bengal, Jharkhand, Chhattisgarh and Andhra Pradesh. The modern State of Odisha was established on 1st April 1936. Odisha lies between the latitudes 17^o 47'N and 22^o 34'N, and between longitudes 81^o 22' E and 87^o 29' E. The State has an area of 155,707 Km², (8th position in area in the country) which is 4.74% of total geographical area of India, and the State has a coastline extending to 480KM. In the eastern part of the State lies the coastal plain. It extends from the Subarnarekha River in

the north to the Rushikulya River in the south. The lake Chilika is part of the coastal plains. The plains are rich in fertile silt deposited by the six major rivers flowing into the Bay of Bengal: Subarnarekha, Budhabalanga, Baitarani, Brahmani, Mahanadi and Rushikulya. Three-quarters of the State is covered by mountain ranges. Deep and broad valleys have been made in them by the rivers. These valleys have fertile soil and are densely populated. Odisha also has plateaus and rolling uplands which have lower elevation than the plateaus. The highest point in the State is at Deomali (1,672 metres) in Koraput district. The State has got exquisite temples like Puri (Temple of Lord Jagannath), Konark (Black pagoda), etc.

1.2 Population of Odisha

There are 12 tribal districts in Odisha. The total population of the State is 4.20 Cr. and the percentage of female and male are 49.5 and 50.5 respectively. The Tribal population of the State constitute more than 22.85% of the State's population as per the 2011 census. The 20th Livestock census 2019 has

reported a total livestock population of 61.01 million in the State. The rural and urban population constitutes 83.32% and 16.68% respectively. The population density of the State is 270 per Square Kilometer, which is lower than the national average of 382 persons per Square Kilometer

CAMPA - Annual Plan of Operation 2024-25

1.3 Climate

The State has a tropical climate, characterized by high temperature, high humidity, medium to high rainfall, and short and mild winter. The State experiences four meteorological seasons: winter (January to February), pre-monsoon season (March to May), south-west monsoon season (June to September) and north east monsoon season (October–December). However, locally the year is divided into six traditional seasons (or rutus): Grishma (summer), Barsha (rainy season), Sharata (autumn), Hemanta (dewy), Sheeta (winter season) and Basanta (spring). The entire territory lies in the

Tropical zone and high temperature is recorded particularly during April-May. However, the sea exercises a moderating influence over the climate of the coastal belt whereas the hill tracts experience an extreme climate. For all practical purposes, the State experiences four major seasons: Winter (December to February), Summer (April to May), South-West monsoon (June to September) and North-East monsoon (October–November). The average annual rainfall varies from about 1,200 mm to about 1,600 mm. and the average annual temperature varies from 25°C to 28°C.

1.4 Geology & Rock

The rich mineral belts lie in the western and north-western parts of the State. Odisha topped among all the States as it contributed above 10% to total mineral production in the country viz. Coal, bauxite, chromite, iron ore, limestone, manganese ore, mineral sand, nickel ore, pyrophyllite and quartz. The rich mineral wealth of the State is attributed

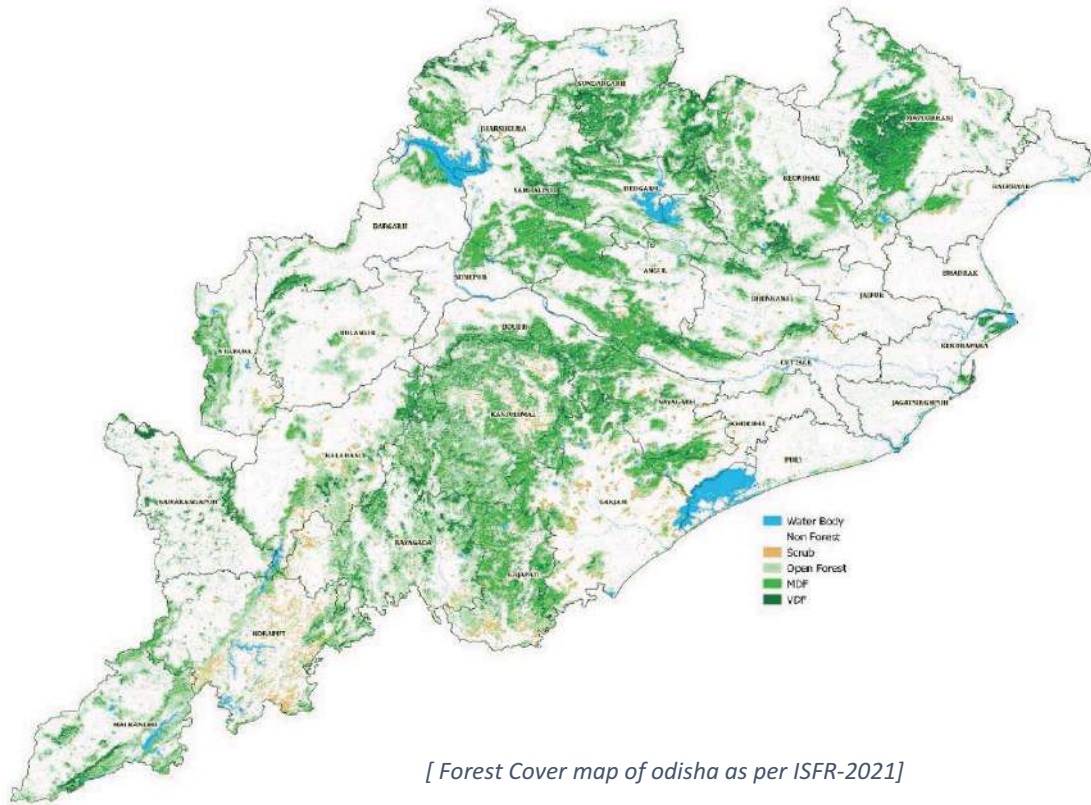

to its favourable geological condition & setup. The Scenic waterfalls of Khandadhar, Putudi, Bareipani, Joranda etc. are glory of the State. The virgin green forests of blue hills of Eastern Ghats with rich wildlife in Similipal Tiger Reserve and Bhitarkanika National Park and other wildlife sanctuaries are exemplary.

1.5 Forest and Tree Cover in Odisha

Forest area of the state	
Total Geographical Area	1, 55,707 Km ²
Recorded Forest area	61,204.17 Km ²
Forest Cover within Recorded Forest Area	32,686 Km ²
Forest Cover outside Recorded Forest Area	19,470 Km ²
Forest Cover Area	52,156 Km ²
Tree Cover (Outside Forest Area)	5,004 Km ²
Total Forest & Tree Cover	57, 160 Km ²
% of Forest Area (Recorded) to Geographical Area	39.31 %

CAMPA - Annual Plan of Operation 2024-25

% of Forest cover Area to Geographical Area	33.50%
% of Tree Cover Area to Geographical Area	3.21%
% of Forest & Tree Cover to Geographical Area	36.71 %

The Recorded Forest area of the State is 61,204.17 Km² which is 39.31% to Geographical area. This includes 26,873.66 Km² of Reserve Forest, 9,175.15 Km² of Proposed Reserve Forest, and 1,085.22 Km² of Protected Forest. 287.51 Km² of Village Forest, 4,179.59 Km² of Demarcated Protected Forest, 4,272.91 Km² of Un-Demarcated Protected Forest, 15,117.30 Km² of Revenue Forest, 22.06 Km² of Un-Classed Forest and 190.77 Km² of Private Forest. Forest Department is in overall control of land with status of RF, PRF, DPF, UDFP and Unclassed Forest, to the tune of 45,896.10 Km². The biennial assessment of forest cover by Forest Survey of India since the year 1987 by

CAMPA - Annual Plan of Operation 2024-25

using Remote Sensing Technique broadly classify the forest cover into three classes i.e., Very Dense Forest, Moderately Dense Forest and Open Forest. As per the 2021 State of Forest Report, the present forest cover is 52,156 Km² while tree cover of the State is 5,004 Km². The forest cover has significantly increased over 537 Km² which is the third highest in the country and the Tree cover has increased over 356 Km² which is the second highest. As regards mangrove forests, the Odisha State has recorded a remarkable gain of

8 Km² increase out of the total increase of 17 Km² which is the largest increase in the country. The forest cover of Odisha constitutes 33.50% of the geographical area while very dense forest is 4.63% of GA, moderate dense forest is 13.49% and open forest is 15.38% of GA respectively. The positive changes of forest & tree cover in the State attributes to the conservation measures, massive plantation activities and protection measures through community participation etc.

Status of Forest Cover as per ISFR-2021

Sl. No	Year of Report	Very Dense	Dense	Moderately Dense	Open Forest	Total	Scrub	Tree cover	Mangrove
1	2021	7213		20995	23948	52156	4924	5004	259
2	2019	6970		21552	23097	51619	4327	4648	251
3	2017	6967	---	21370	23008	51345	4306	3993	243

10	2001	---	27972	---	20866	48838	5782	---	211

1.6 Forestry sector issues and challenges

Various issues and challenges for the forest department to retain and restore the healthy eco-system over the natural forests are the following:

- ❖ Forest boundary demarcation in case of notified and recorded forest is an issue in the field while ensuring consolidation and protection. This

needs to be addressed through appropriate survey involving the revenue department and the local population in the field.

- ❖ A sizable area of forest are under revenue department which are not included in forest management under

CAMPA - Annual Plan of Operation 2024-25

working plan prescription. Those areas are also to be properly demarcated with definite georeferencing and brought under proper forest management as per working plan prescriptions.

- ❖ To upgrade the degraded forest to the next density class massive plantation programme are being taken up by forest department with adequate protection measures and awareness programmes in the forest fringe areas. Protection measures taken up through foot patrolling inside the forests are being monitored through GPS tracking. Mostly the problems in protection and restoration of forest area are location specific and to some extent related to cultural aspects and economic deprivation of the fringe village communities. Support of local communities through VSS wherever active is to be ensured apart from engaging the local youths in the protection to give impetus to the efforts of the frontline staff.
- ❖ Forest fire is a major concern. Modern technology is being utilized for advance information and control of the forest fire. The MODIS satellite imagery act as a fruitful monitoring technology for controlling the ground fire by frontline staff. The community participation and awareness campaign are an additional result-oriented programme to combat the fire hazard inside forest.
- ❖ Frequently natural calamity in the Odisha State is a regular phenomenon which affects the forest and its ecosystem. Especially coastal areas are badly affected due to frequent cyclones. The mangrove and casuarina forests act like a barrier to restrict the cyclonic storm and tidal surges ensuring protection to coastal areas and its communities. Mangrove and casuarina plantations are being taken up to mitigate the above challenges. In this regard, 8 Km² increase in mangrove forest cover in the state as per the State of Forest Report 2021 is a testimony for such efforts.

1.7 The Human – Animal Interface

The Human – Animal interface has become a challenge all over the State. Fragmentation of habitats and depletion of food and water sources inside the forests are aggravating the problem. As a result, the loss of human life or injury, property loss and crop damage are occurring at frequent intervals and almost equivalent loss of wildlife. To address the above challenges, different pro-active measures

like deployment of elephant squads and antidepredation squads, driving away elephants by the staff from human habitats as and when required and awareness campaign in forest fringe villages are taken up. So provisions for habitat improvement with creation of sufficient water sources has been made in CAMPA and also through other programmes of the State.

1.8 Community participation and effects on forest cover

The role of forests and forestry is changing rapidly and significantly. Policy makers are placing a renewed focus on community participation for sustainable development of forest. Odisha is the pioneer State to adopt policy of JFM resolution assigning specific roles to the communities. The community protection system exists since time immemorial and the Government of Odisha passed a resolution during 1988 to involve the local communities for protection and management of the forests. Keeping pace with present scenario, the amendments during 2011, 2015 and 2019 JFM Policy for smoothening the management of forest with community involvement had been done. Community being the main stakeholder for enjoying the benefits of forest and also in its management, Community centric

approach in planning and implementing forest conservation is vital. Restoration of forest cover will be fruitful by providing sustainable livelihood options to the forest fringe dwellers. The formation of VSS (Vana Surakhya Samiti) in forest fringe villages is a commendable step for better management of forest and wild life. At present, a total 16160 nos. of VSSs and 590 nos. of Eco Development Committees (in Wildlife and mangrove Areas) have been formed in different forest divisions. The above institutions are involved in all sorts of forestry activity during its implementation inside forest. State Government has also initiated **Ama Jungle Yojana** to facilitate the forest restoration with community involvement and addressing their livelihood issues on sustainable management.

1.9 Wildlife scenario and issues in the Sector

The State of Odisha is favored with an extremely rich and unique assemblage of Wildlife. Rich faunal diversity of Odisha exhibits 131 species of reptiles including 3 crocodylian species, 29 species of Amphibians, 537 species of birds and 114 species of mammals, this includes 54 endangered species (17 species of reptiles, 15 species of birds and 22 species of mammals) as per IUCN Red Data Book.

In the State of Odisha, the in-situ conservation is ensured by declaring the biodiversity rich areas as Protected Areas. At present Odisha has one National Park, 19 Sanctuaries, two Tiger Reserves, one Biosphere Reserve, three Elephant Reserves and six Ramsar Sites. The Wildlife Sanctuaries (19 Nos. as

Protected Areas) encompass 10.37% of forest area in the State which is 5.36% of the State's Geographical area. One National Park has been notified under provision of Wildlife (Protection) Act, 1972 for in-situ conservation at Bhitarkanika and another National Park is proposed at Similipal. Odisha is also blessed with natural major wetlands at Bhitarkanika Mangroves, Anshupa Lake, Hirakud Reservoir, Satkosia Gorge, Tamapra Lake and Chilika Lake having international importance, these wetlands are declared as "**Ramsar Sites**".

As part of ex-situ conservation, Odisha has one large Zoo, three small Zoos and six mini-Zoos which enjoy recognition from Central Zoo Authority and are

CAMPA - Annual Plan of Operation 2024-25

managed scientifically. Conservation breeding programmes of Indian Pangolin, Tigers, Mouse Deer and Vultures are in progress in Nandankanan. In order to address the issue of ailment of wildlife, all the zoos are maintaining rescue centers along with facilities for veterinary care.

Besides, there are 4 Crocodylian Research and Conservation Centers in the State, viz for Gharial in Tikarpada/Satkosia, Saltwater crocodile in Dangamal/ Bhitarkanika, Mugger in Ramtirtha/ Similipal and captive breeding programme of all three Indian crocodylian species in Nandankanan Zoological Park respectively.

Similipal-Hadgarh-kuldiha is the traditional Elephant corridor linking rich biodiversity of Similipal, Hadgarh and Kuldiha WL Sancturies. The traditional corridor allows wildlife movement from one habitat to another to facilitate gene flow between different populations. For the purpose of protecting landscapes, flora, fauna and their habitats therein the State Government has declared it as **“Similipal-Hadgarh-Kuldiha Conservation Reserve”**

As of now, 590 nos. EDC have been formed covering an area of 43455.32 ha. of protected area and ensuring the people’s participation which plays a major role in conservation of wildlife. As an alternative source of livelihood for such villagers, community based eco-tourism is promoted. For the purpose, Eco-tourism destinations have been developed with 304 Nos of Eco-cottages

and 122 Nos of Tents for accommodating 1311 eco-tourists for night stay. Large inviolate areas are essential to ensure a viable population of the wild animals, particularly Elephants and Tigers. Such vast prime habitat like core tiger habitats etc. are created through voluntary relocation of villages from the inside Protected Area/Tiger Reserve/Other Forest Areas as per policy framed by NTCA and State Government. From 1994 to 2023 a total of 1762 No of families have been relocated from 24 nos of Villages from Similipal, Satkosia, Debrigarh, Khalasuni and Hadgarh Sancturaries. As of now about 747 villages are situated inside 13 wildlife Sancturaries in the State. In order to ensure step wise consolidation of prime wildlife habitats, voluntary relocation scheme of 5 years from 2021-22 to 2025-26 has already been prepared. Government of Odisha have recently enhanced the village relocation package from Rs.10.00 lakh to Rs.15.00 lakh per family and in addition Rs.5.00 lakh as incentive in case of non-availing of package benefits. This package is also applicable to the families willing to be relocated from the inaccessible forest areas including areas connecting wildlife habitats.

CAMPA - Annual Plan of Operation 2024-25

2.0 Compensatory Afforestation, Other forestry and related schemes (Physical & Financial) including catchment area treatment, Wildlife management & community development works in the State in last five years

2.1 Compensatory Afforestation of Last Five Years from 2019-20 to 2023-24.

1994	407	2009	2378.14	Total	76881.59

3.0 Brief description of Monitoring and Evaluation

Different approaches and methodologies are followed for monitoring and evaluation of CAMPA works.

- 1) Conventional monitoring methodologies
- 2) Monitoring using the Technology
- 3) Fiscal Monitoring
- 4) Third Party Evaluation

3.1 Conventional Monitoring Methodology:

- (i) The conventional approach refers to the traditional method of monitoring and evaluation is based on the mandatory provisions of the Forest Department code. Site specific indicators are gathered from different hierarchical management to assess the progress of implementation. In Forest Department, the main field executants of the projects start from the Range officer level which is the basic unit. As per the codal provision of the Forest Department, the Range officer is to monitor 100 percent of the activities in all steps of execution. The Divisional Forest officer of the concerned Division plays a key role in the internal monitoring mechanism in his/ her division and evaluation of the project. The fiscal discipline, project completion and outcome of the activities are major mandate as per the Odisha Forest Departmental Code. The Divisional Forest officer makes regular inspections, studies and analyzes the field position, and imparts directions to the frontline field staff for further improvisation. Further, all the supervisory officers through regular inspections ensure effectiveness of the field level implementation. All the field functionaries are having specific roles. As per the guidelines of CAMPA, the Forester and Forest Guard of the respective area should monitor 100 Percent of the works executed in their jurisdiction; the Range officers being the executants review at least 75% of the activities of the project works, ACF 25%, DCF/ DFO 10%, and RCCF 5% of works to be inspected.
- (ii) The PCCF & HoFF being head of the State monitors the activities either by deputing the staff at regular intervals from State headquarters and also makes random field visits for monitoring and issuing necessary instructions/ guidelines to the field as & when required. The RCCF also monitors the field activities in his jurisdiction regularly and also arranges an internal mechanism to monitor the project works and guide the sub-ordinates.
- (iii) Three Flying Squad units under Forest Internal Vigilance of the State with headquarters at Cuttack, Berhampur & Sambalpur are also entrusted to monitor, evaluate and to enquire into the allegation petitions on different activities under CAMPA APOs as and when required by the PCCF & HoFF, Odisha.

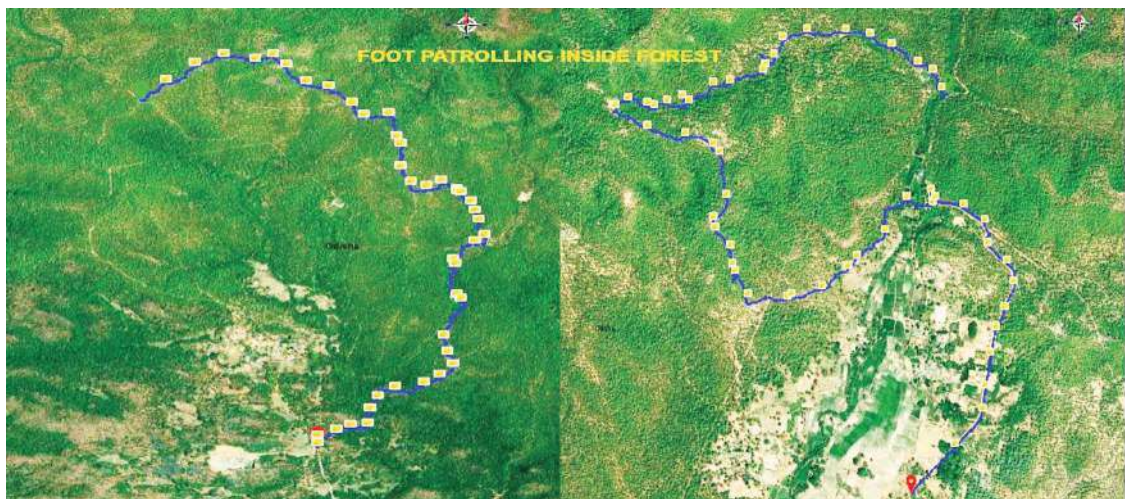

3.2 Monitoring and Evaluation with the usage of Technology

- (i) Technology is used in a big way for monitoring of CAMPA activities. A modern Forest IT & Geomatic Centre (FITGC) has been established with devoted IT infrastructure. This center is monitoring all forestry-related activities with the help of 8910 active Smart Phones of field officials having android & iOS based OFMS applications and 1200 GAGAN enabled GPS-PDA devices. The login status, update of application version and usage of OFMS are also monitored through the web application www.odishaforestgis.in) in order to ensure use of the application by all frontline field staff and strictly monitor all forestry related activities at each level. Updated data on activities like raising of seedlings, plantation progress, tall seedling planting, seedling distribution details etc. has been made available for public viewing in the official website: www.odishaforest.in. To ensure Forest Protection, more attention is focussed on the foot patrolling especially during the odd hours which is also monitored through the web application <https://odishaforestgis.in>. Different incidents like illicit felling and wildlife sightings during foot patrolling apart from wildlife death/ injury and mining & quarrying inside the forests are recorded at the site. On an average 127400 Kilometers foot patrolling is done per month by all the forest staff and the distance, timing and incidence reporting are closely monitored daily/ hourly basis using GPS-PDA/Android application at all levels. Month wise foot patrolling, fire incidences, number of assets mapped are monitored.
- (ii) **Realtime Monitoring of Forest Fire** Satellite based remote sensing technology and GIS tools have been effective in better prevention and management of fires through creation of early warning for fire prone areas, monitoring fires on real time basis and estimation of burnt areas. The forest fire monitoring is done in a unique way by integrating the FITGC server with FSI server to fetch the fire data directly in the fire application from FSI server. The server is also accessing the fire data of NRSC for timely information of Forest fire locations. In addition to this, the application having navigation facility helps the ground staff to navigate and quickly reach the fire spot thereby substantially reducing the time to respond. The Forest HQ has a dedicated fire cell which monitors fire on 24X7 basis and the damage due to fire is substantially reduced. The details of Fire monitoring in last 5 Years is give under:

CAMPA - Annual Plan of Operation 2024-25

Year wise abstract of Fire Incidences reported from 2019 to 2023.

Sl	Components	2019	2020	2021	2022	2023
1	Number of fire incidences (Nos)	18297	11813	56606	28755	36713
2	Fire Response (%)	43%	45%	80%	92%	99%
3	Forest area affected (Ha)	9899.61	6146.61	28329.05	8414.55	9550.86

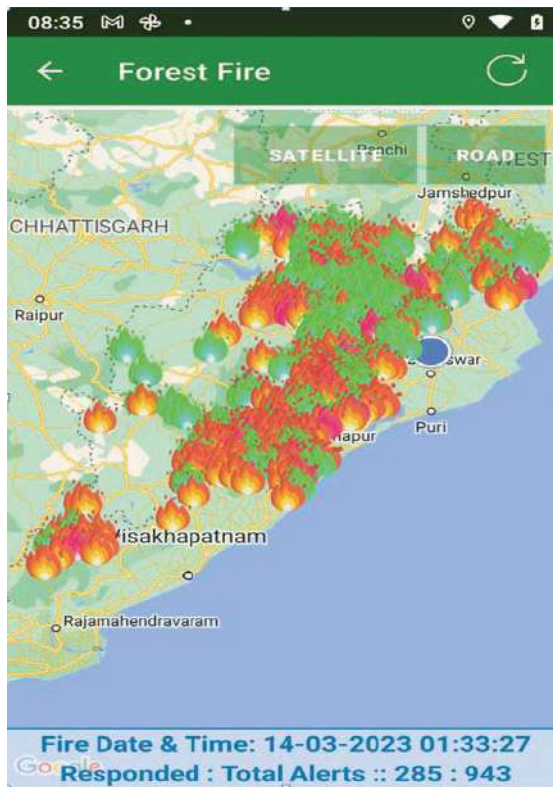

(Foot patrolling done through the boundary of forest block to check boundary pillars)

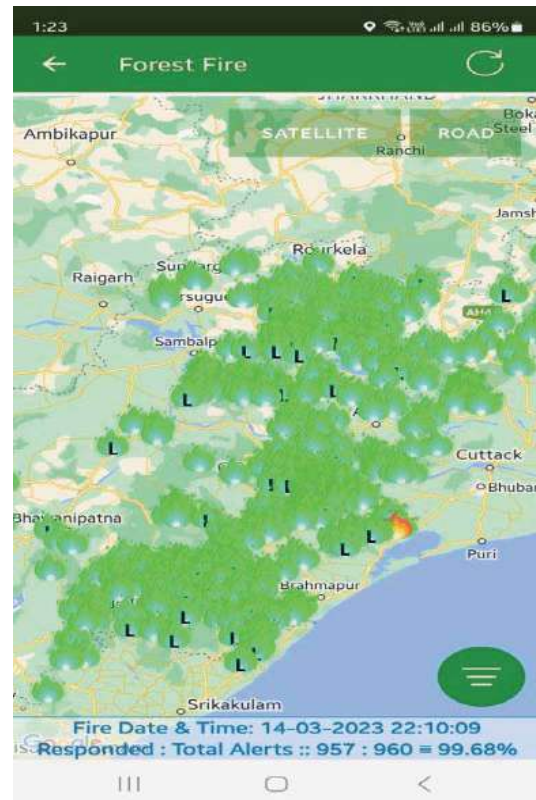

(Screen display of fire app showing the auto fetching fire points from FSI server, navigating to the fire spot, responding through App. and syncing to the server for monitoring.)

CAMPA - Annual Plan of Operation 2024-25

Fire Points received from FSI downloaded in Mobile App shown in Orange/ Repeat Fire Points in Pink

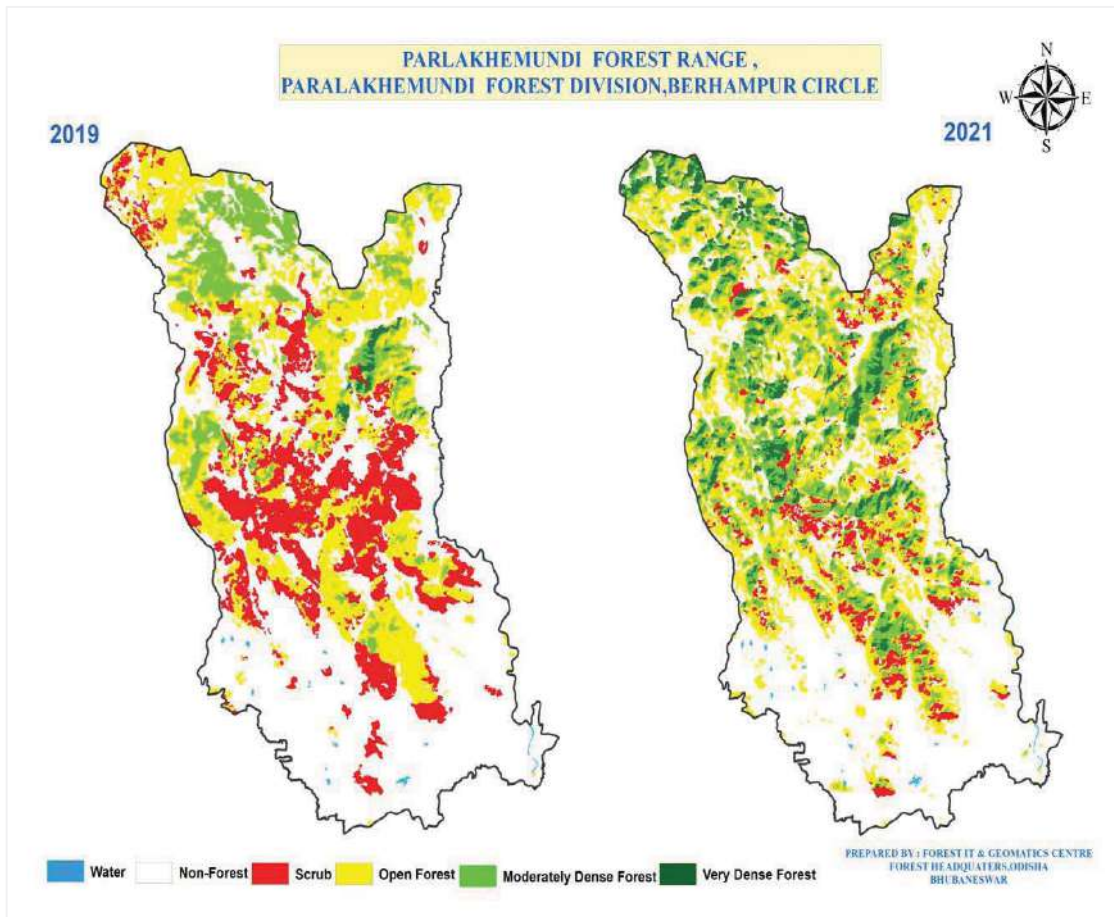

Fire Points received from FSI responded by Forest Staffs in field using Mobile Application shown in Green

(iii) **Plantation Monitoring** The “forest cover change map” at beat level has helped the field staff for better planning of plantation and plantation related activities such as SMC, ANR etc. FCD module has been developed in OFMS Android App i.e., “Afforestation Land Selection System”. This application helps for selection of new Afforestation sites by the field staff using recent Forest Canopy Density during verification in Android App. All assets like nurseries, Compensatory Afforestation (CA) & Non-CA Plantations, water bodies, buildings

etc. are dynamically monitored using asset mapper application and all attributes of the assets such as Geo-tagged photographs, schemes, year of project etc. are recorded. About 36738 different assets are mapped in the field during the period from January, 2021 to December, 2023. Out of Which 10262 Nursery sites & 10274 afforestation sites and 16202 other assets are monitored regularly through mobile/web applications. A few images given below are used for monitoring purpose.

CAMPA - Annual Plan of Operation 2024-25

(Monitoring of different works in different years)

ANR with Gap Plantation 50 Ha from Gunupur Range in Rayagada Forest Division

CAMPA - Annual Plan of Operation 2024-25

Bald Hill Plantation 20Ha from Panasdiha & Baunsiapat in Baripada Forest Division

AR Plantation 2020-21 Bhusandapur DPF over 25.0 Ha in Khordha Forest Division

Construction of Forest Quarter At Nidhipur of khunutuini Range APO 2022-23 Athagadh Forest Division

ANR Plantation Kumarkani 30 Ha in Boudh Forest Division

(iv) **KYFL@Odisha (Know Your Forest Location in Odisha)** Under 5T initiatives of Govt. of Odisha, an application i.e., KYFL @ Odisha has been developed. The user can get the geo-location of the point of interest (PoI), name & approximate distance from the nearest notified forest block and details of forest administrative jurisdiction. The application also provides the additional land revenue information like name of the district, Tahasil, CD Block, GP,

Village, Khata No., Plot No., owner's name, land type & area in hectare with respect to PoI. About 1,00,000 users have downloaded the application.

(v) **Mo Jungle (My Odisha Forest)** Further one new Application named "Mo Jungle: My Odisha Forest App" has been developed for public assistance. All plantation assets which have been created are brought under public domain through web application (www.odishaforest.in) and mobile application Mo Jungle: My Odisha Forest in iOS and Android to bring transparency in afforestation activity. All 21,345 number of plantations assets created during

Mo Jungle

the period from January, 2021 to December, 2023 are available for public access and they can give their feedback on any plantation site. About 1000 users have downloaded the application.

(vi) **Forest FireMonitor Module for citizens**, on our freely downloadable “Mo Jungle” Mobile App, both in Android & iOS. It has a special feature of district-wise filter of forest fire on Google Map. Citizens can give feedback using this App.

3.3 Fiscal Monitoring

The fiscal discipline is ensured through transaction in the IFMS portal, submission of online accounts to Accountant General, making direct benefit transfer using either IFMS platform or other mechanism and ensure the payments are sent directly to the bank accounts of the beneficiaries. The efforts are to increase the transparency in the financial transactions. Detailed guidelines are issued from State Authority for following Integrated Financial Management System, wherein there is no handling of cash and all the payments

to the people working in various forestry operations are done online. The CAMPA money is released in four installments. The funds for maintenance for plantation are released after getting a report on the survival percentage of plantation sites from the DFOs.

Internal auditors have been appointed to monitor the procurement procedures, submission of accounts and proper expenditure of campa funds. These auditors give a half yearly report to improve the efficiency in financial transactions at implementing level.

3.4 Third Party Monitoring

As per the provision of the CAMPA guidelines, the state CAMPA has been formulating the Annual Plans of Operation (APO) for all the years since 2009-10 to till date except 2018-19. As per guideline, technical evaluation of all ongoing activities under CAMPA by a Third-Party evaluator was considered essential. M/s CTRAN Consulting Ltd was appointed to carry out third party monitoring of all the CAMPA interventions since 2009-10 to 2016-17. The activities taken out of CAMPA fund comprises Comensatory afforestation

and plantation, SMC measures, forest protection, wildlife management, Ama Jungle Yojana, sacred groves, research & development, capacity building, infrastructure development, forest IT etc under NPV and activities taken up under Interest are also evaluated by the agency. The evaluation study comprises 56 forest divisions (37 Territorial, 13 Wildlife, 02 Silviculture Divisions and 04 Training Institutes) in addition to Nandankanan Zoo where CAMPA funds are utilized. The study approach and methodology for various CAMPA

CAMPA - Annual Plan of Operation 2024-25

interventions were evaluated using multiple data analysis approach and sampling criteria. M/s CTRAN has reflected satisfactory report for the aforesaid years monitoring and evaluation. The detailed evaluation report has been placed in the public domain (<https://odishaforest.in>).

For the year 2017-18, 2019-20 and 2020-21 was under taken by M/S Price Water Cooper Private Limited (PWC Pvt. Ltd.) as per the provision of CAMPA Act and Rules. The PWC Pvt. Ltd. has submitted the report for evaluation of interventions of CAMPA activities like AR, ANR, Afforestation of Bald Hills, Avenue Plantations, Compensatory Afforestation works, Subsidiary Silvicultural Operations of Bamboo, Soil and Moisture Conservation Measures,

Forest Protection and Forest Fire Protection activities, Wildlife Management, Infrastructure Development, Research, Capacity Building and forest IT.

For APO 2021-22 M/S Ernst & Young LLP has completed the Evaluation and submitted the reports. For APO 2022-23 M/S Agricultural Finance Corporation Limited (AFC) has been entrusted for 3rd Party Evaluation and it is under progress.

Further CAG Empanelled CA Firms have been engaged to take up Financial Statement to ensure transparency and Accountability. CA Firms have prepared the Financial Statements upto 2017-18 and the same has been placed before the AG, Odisha for Audit

PART-II

Activities to be undertaken for Compensatory Afforestation, Additional Compensatory Afforestation, Penal Compensatory Afforestation, Catchment Area Treatment Plan & for any other site-specific schemes submitted by the state along with approved proposals for diversion under Forest (conservation) Act, 1980. referred to in clause (a) of Section 6, of the CAF Act, 2016.

CAMPA - Annual Plan of Operation 2024-25

Compensatory Afforestation

Compensatory Afforestation is one of the most important conditions stipulated by the Central Government while approving proposals for dereservation or diversion of forest land for non-forestry use as per Forest Conservation Act 1980. It is essential that with all such proposals, a comprehensive scheme for Compensatory Afforestation is formulated and submitted to Central Government. In compliance to the order of Supreme Court Compensatory Afforestation Management and Planning Authority (CAMPA) is constituted.

In consonance with the Forest (Conservation) Act 1980, and the Rules and Guidelines there under, the Compensatory Afforestation fund from user agencies are collected and deposited in CAMPA account. Additional conditions are also imposed in certain cases considering the project status. Implementation of the approved site-

specific schemes of Compensatory Afforestation (CA), Penal Compensatory Afforestation (PCA), Catchment Area Treatment Plan (CATP), Ancillary Activities etc. along with the forest diversion proposals are the first charge of CAMPA fund and included in the APO as referred to in clause (a) of Section 6, of the CAF Act, 2016.

The total forest area diverted in the State under Forest (Conservation) Act 1980 up to September 2023 is 65303.216 ha. In lieu of diverted forest land MoEF & CC has stipulated Compensatory Afforestation over 90213.466 ha upto Sep. 2023. The Compensatory Afforestation over 76881.593 ha has already been undertaken till completion of APO 2023-24. An area of **7174.203 ha** has been included in current APO 2024-25. (The area under CATP, Other Stipulations etc. are taken up separately)

Sl. NO.	Area Category	Area in Ha
1.	The total area diverted upto September 2023	65303.216 Ha
2	Stipulation of Comp. Affn. Upto September 2023	90213.466 Ha
3.	Achievement upto September 2023	76881.593 Ha
4.	Balance Area to be covered	13331.873 Ha
5.	Proposed area for Comp. Affn. in APO 2024-25	7174.203 Ha

CAMPA - Annual Plan of Operation 2024-25

1. COMPENSATORY AFFORESTATION DETAILS:

1.1 Current Year Activities

The prime mandate of CAMPA is to fulfill the targets of Compensatory Afforestation plantation programme. Various models of plantation activities proposed under CA, PCA, Addl. CA in APO 2024-25, Block Plantation 637.088 ha, ANR With Gap 5575.335 Ha, ANR Without Gap 73.96 ha, Bald Hill 1389.34 ha, Tall tree plantation of 61,042 numbers and Canal Bank/ Avenue Plantation over 1.6 RKM. To achieve the targets of APO 2024-25 a financial outlay of **Rs 15011.81 Lakh** has been provisioned including ancillary activities for above CA, PCA, etc. and maintenance of old plantation.

Ancillary activities are fencing, SMC measures, training and EPA activities will

be carried out as per site specific scheme approved as part of de-reservation proposal for approval by MoEF & CC. Further, the maintenance of the previous year plantations and the pre-planting operation of plantation to be taken up during 2025-26 have been included in the APO 2024-25. The total outlay for CA, PCA, Backlog CA, leftover CA, CATP other Stipulations etc. abstract of the current year afforestation activities and the division wise details are given in the Table 1.1.1. The Division wise and location wise details of CA, PCA afforestation and year wise maintenance are given in **Annexure II-I**

CAMPA - Annual Plan of Operation 2024-25

CAMPA - Annual Plan of Operation 2024-25

2. INTEGRATED WILDLIFE MANAGEMENT PLAN

The integrated wildlife management plan has been formulated by the PCCF WL & CWLW, Odisha at the time of diversion of forest land for non-forestry purposes with a view to mitigate local and regional wildlife issues such as habitat loss and degradation, fragmentation of habitats, spread of exotic flora and fauna species,

biotic interference, animal corridor issues, human Wildlife conflicts etc. Wildlife management plan is essentially integrated with the management plans for Protected Areas and need based interventions for other wildlife rich areas including wildlife corridors and attempts to minimize man animal conflicts.

The components of integrated wildlife management plan consist of

- A. Regional Wildlife Management Plan (Rs. 95.00Cr.)
- B. Site specific Wildlife Conservation Plan (Rs. 164.10 Cr.)

A. Regional Wildlife Management Plan

For diversion of forest land for mining projects, State Government stipulates for realisation of cost towards implementation of Regional Wildlife Management Plan in the impact areas as well as its periphery. The State Govt. has fixed the cost norm for realisation of cost towards implementation of Regional Wildlife Management Plan.

The following is the cost norm which is revised from time to time based on the revision of minimum wage rate by State Government for implementation of Regional Wildlife Management Plan as detailed below,

Min. Wage Rate	Cost norm per ha	Effective from	Govt. letter No. & date
Rs.55/-	Rs.15,000/-	Up to 22.03.2008	22295/F&E dt 30.12.2005
Rs.70/-	Rs.20,000/-	23.03.2008 to 12.07.2009	6495/F&E dt 23.03.2008
Rs.90/-	Rs.26,000/-	13.07.2009 to 05.10.2012	27209/F&E dt 31.12.2013
Rs.150/-	Rs.43,000/-	06.10.2012 to 04.12.2016	20693/F&E dt 05.10.2013
Rs.200/-	Rs.58,000/-	05.12.2016 to 29.10.2018	22675/F&E dt 05.12.2016
Rs.280/-	Rs.82,000/-	30.10.2018 31.03.2019	26159/F&E dt 05.12.2018

Government of Odisha in Forest, Environment & Climate Change Department have approved the proposal for preparation of a comprehensive

Wildlife Management Guidance (OSCOW-MAG) for the whole State vide letter No.8F-(S)-50/2014-15814/ F&E dated 27.08.2014 and the MOU was signed

CAMPA - Annual Plan of Operation 2024-25

between the Forest Department, Government of Odisha and WTI on dated 11.12.2015 at a cost outlay of Rs.3.65 Crores. WTI have submitted the final plan and provision for Rs.2000.00 lakhs was made in CAMPA APO: 2023-24 towards its implementation. This year **Rs.9500.00 lakh** is being proposed for its implementation in 8 specific areas

namely, Species Specific Management Programme, Eco-restoration Programme, Ex-situ In-situ Integration Programme, Capacity Enhancement, Human Wildlife Conflict Management, Wildlife Protection Enforcement, Trans Boundary Wildlife Management & Co-ordination and Education and Awareness.

Implementation of Regional Wildlife Management Plan (RWLMP) for the State

SL. No.	Activities.	Amount (Rs. In lakh)
1	Para-1- Species specific Management Programme.	138.50
2	Para-3- Eco restoration programme.	3248.00
3	Para-4- Ex-situ In-situ Integration programme.	472.00
4	Para-5- Capacity enhancement.	1331.00
5	Para-6- Human-Wildlife Conflict Management.	1534.00
6	Para-7- Wildlife Protection Enforcement.	2505.00
7	Para-8- Trans Boundary Wildlife Management and Coordination.	10.00
8	Para-10- Education and Awareness.	261.50
Total:-		9500.00

The details of the sites for afforesaid interventions will be prioritised as per the guidelines stated and funds approved.

B-Implementation of Site Specific Wildlife Conservation Plan

This component is the first charge under CAMPA APO which the user agency deposits as per the plan approved by PCCF (WL) & CWLW, Odisha in compliance to either the stipulation raised in stage-I order of the forest clearance under Forest Conservation Act, 1980 or as ToR conditions under Environmental Protection Act, 1986 or both.

Apart from utilising the funds for those SSWLCP which have received final forest/Environmental clearance and

requisitioned by the DFOs, this APO also proposes to utilise funds of those SSWLCP of linear projects which have received stage-I forest clearance or initial environmental clearance and have deposited the entire amount.

Reason for picking up implementation of SSWLCP of stage-I approved linear projects is that these are one-time projects that normally get completed before submission of compliance to stage-I orders. Further the adverse impacts of such projects are not localised

CAMPA - Annual Plan of Operation 2024-25

and span over long stretches for which ameliorative measures become crucial to ensure safety, wellbeing and unhindered movement of the wildlife inhabiting those affected landscapes. Since, APO: 2011-12, the site-specific wildlife conservation plans are being implemented. Till APO 2022-23, an amount of Rs.17811.19 lakh have been utilized and in APO 2023-24 Rs.8724.00 lakhs has been approved. A provision of Rs. **16410.49 lakh** has been made in the APO: 2024-25.

It is proposed to implement 95 new Site-Specific Plans in addition to 148 running Site-Specific Plans of previous years covering 40 Divisions in this plan. It is clarified here that some of the SSWLCPs are being implemented in more than one division due to which the total no. of running projects comes to 243 with a cost of **Rs.16410.49 lakh**, for which provisions of funds have been made under APO 2024-25.

Division wise details of Site-Specific Wildlife Conservation Plan.

PART - III

Activities to be undertaken From Net Present Value and Interest
Component referred in Rule-5 and Rule-6 of CAF Rules 2018

CAMPA - Annual Plan of Operation 2024-25

PART - III

A forest ecosystem is a complex and interconnected system where living organisms interact with each other and their physical environment. Forests cover a significant portion of the Earth's land area and play a crucial role in maintaining ecological balance, supporting biodiversity, and providing various ecosystem services.

The Forest, Environment and Climate Change Department is actively looking into the conservation and development of Biodiversity and Ecosystems in the State. The department is mandated to manage, conserve and protect forest and wildlife resources in the State through afforestation and regeneration of degraded forest lands, forest protection as well as socio-economic up-liftment of people in the forest fringe areas and

sustainable management of forests and wildlife. Massive plantation programme is assigned under CAMPA to enhance the green cover with afforestation programme of naturally regenerated forest with silvicultural operations, SMC activities & plantation in gap & Block plantation model accommodating site specific species.

In APO 2024-25, emphasis given on raising of ANR plantation @ 500 plants /Ha with all indigenous miscellaneous species in consonance with prevailing Working Plan /Working Scheme. In case of AR model of plantation, both 1600/Ha & 1000/Ha has been incorporated in this APO considering availability of area, site condition and prevailing Working Plan /Working Scheme.

CAMPA - Annual Plan of Operation 2024-25

A. ACTIVITIES UNDER 80% NPV CATEGORY

1. New plantation:

The primary assignment of CAMPA is to enhance the green cover in the forest floor by raising massive plantation programme through various site-specific models in consonance with prevailing Working Plan/Working Scheme and Wildlife

Management Plan. Considering the feasibility of the site, species and soil condition, need of the society and wildlife, different models of plantation have been proposed in APO 2024-25.

1.1 Aided Natural Regeneration (ANR)

Aided Natural Regeneration (ANR) is a forest restoration and conservation approach that relies on facilitating the recovery of natural ecosystems by providing assistance or intervention to the natural processes of forest regeneration. This technique is particularly applicable in areas where the natural regeneration of forests is

hindered or has been disrupted due to human activities such as logging, agriculture, or other forms of land use

Aided Natural Regeneration (ANR) is a simple, low-cost forest restoration method that can effectively convert degraded vegetation to more productive forests. The method aims to accelerate,

CAMPA - Annual Plan of Operation 2024-25

rather than replace, natural succession processes by removing or reducing barriers to natural forest regeneration such as soil degradation, competition with weedy species, and recurring disturbances (e.g, fire, grazing, and wood smuggling). Compared to conventional reforestation methods involving planting of tree seedlings, ANR offers significant cost advantages because it reduces or eliminates the costs associated with propagating, raising, and planting seedlings. It is most effectively utilized at the landscape level in restoring the protective functions of forests such as watershed protection and soil conservation. ANR techniques are flexible and allow for the integration of various values such as timber production, biodiversity recovery, and

cultivation of crops, fruit trees, and non-timber forest products in the restored forest. The natural forest blocks which are included in rehabilitation working circle as per working plan prescription are taken for ANR interventions. It is aimed to strengthen the resilience of natural forest. Different model of ANR activity has been proposed considering various aspects of forest rejuvenation and site suitability.

In APO 2024-25 plan period ANR activities in different models are proposed in consonance with the CAF Rule 5(2)(a) over an area of **17197 Ha** with a total financial outlay of **Rs.5997.285 Lakh**. The different models of ANR are furnished below with Division wise physical target and financial outlay.

1.1.1 Vanya Silk Plantation @ 500 plants /Ha

CAMPA - Annual Plan of Operation 2024-25

The State government has decided to implement 'Vanya Silk' programme for providing livelihood to forest dwellers through tassar sericulture activities. A tripartite MoU was signed between the departments of Handlooms and Forest, with Central Silk Board of Ministry of Textiles. It was signed by CEO, State CAMPA, on behalf of Forest department, the partnership will pave the way for implementation of Vanya (wild or non-mulberry) silk includes tassar, eri and muga silks. Odisha is one of the largest tassar growing States in the country after Bihar, Jharkhand, MP and Chhattisgarh. New and increasing opportunities for providing forest-based services and products, growing business and revenue as well as creating jobs are arising from these interventions. The livelihood creation for the members of Vana Surakhya Samitis (VSS) by adopting

sericulture farming is giving a wider scope for sustainable development, women empowerment along with employment generation through Mission Shakti WSHGs to the concerned VSS. Tassar worm rearing, cocoon production will be taken up by the Forest department through VSS. The sericulture wing of Handlooms department will provide the technical support for tassar favoring host tree plantation programme. Therefore, plantation of Asana, Arjun etc. in gaps in suitable degraded forest patches have been considered in this APO 2024-25. An area of **190 Ha** in ANR mode @500 plants /Ha has been proposed in different Divisions with financial outlay of **Rs 72.675 Lakh**. The detailed division wise target are furnished below in table 1.1.1 and site wise details are placed in Annexure III-I.

Table 1.1.1 Division wise Target of ANR Gap Vanya Silk Plantation @ 500 Plants per Ha @ Rs 0.38250 Lakhs Per Ha)

Circle	Division	Area (Ha)	Financial Outlay (Rs in Lakhs)

	Grand Total-	190	72.675

1.1.2 Fodder & Fruit Plantation @500 plants /Ha.

Forests play a crucial role in maintaining ecological balance, supporting biodiversity, and providing resources for local communities. To enhance the

sustainability of forest ecosystems, an integrated approach involving the establishment of fodder and fruit plantations can be implemented. This

CAMPA - Annual Plan of Operation 2024-25

initiative not only promotes biodiversity but also addresses the needs of wildlife and local communities, contributing to the overall health of the forest.

Foods from trees/shrubs in dry lands constitute an important component of food supply in the form of fruits, seeds and other edible parts which are essential for food security. Indigenous trees/shrubs are good source of fodder as grasses dry out quickly due to short rainy season. The domestication of important indigenous trees/shrubs (fruits and fodder species) and their integration in agroforestry practices have been one of the most important forms of biodiversity conservation. The selection, retention or deliberate planting and management of trees by farmers can be considered as the beginning of the domestication process of the species. The species diversity (richness and evenness) was estimated using different biodiversity indices. The results showed that forest sites have the highest fruit and fodder tree/shrub species diversity as compared to other land uses which suggest that domestication process of fruit and fodder trees have been slowed down with focus on only few trees.

It plays a key role in providing food to both wild and domestic animals as well as cater the needs of local poor. The major aspect of such plantation helps in wildlife conservation, reduce the man animal conflict and enhance green coverage. It is proposed to carry out fodder and fruit bearing species plantation in the gaps of forest areas, especially where there is much more interface between the wildlife and humans. This is also one of the major assignments of Government of India. Considering the above aspects, an area of **817 Ha** has been proposed in different divisions with a financial outlay of **Rs 312.503 Lakh** in APO 2024-25. The detailed division-wise target are furnished below in table 1.1.2 and site wise details are placed in Annexure III-II.

Table 1.1.2 Division wise target of ANR Gap Fodder & Fruit Plantation @500 plants per Ha (@ Rs 0.38250 Lakh Per Ha)

1.1.3 RET /Medicinal Plantation @ 200 plants /Ha.

Establishing plantations for rare, endangered, and threatened species requires a holistic approach that involves the collaboration of various stakeholders, including local communities, Government agencies and conservation organizations. Such initiatives contribute significantly to the conservation of biodiversity and the restoration of ecosystems in threatened areas.

Present rapid socio-economic changes and several years of unscientific collection of the valuable medicinal plant species have resulted in the depletion of their populations and habitats in nature. Many of them have become rare and endangered and some species are on the verge of extinction. Increasing human population over the last decades has also led to over-exploitation of natural resources. However, there are few

pockets where these herbs still thrive and are reasonably abundant. Many plant species have still not been categorized and placed properly. Now the time has come to rejuvenate the stock of rare endangered and medicinal plant for successful use and management of forest. CAMPA, Odisha has initiated effective steps to raise RET/Medicinal plantation in suitable sites in different Divisions. Hence to increase their population in ANR gap plantation mode @200 plants /ha has been proposed in this APO 2024-25. Therefore **3615 ha.** area has been identified in different forest Divisions of the State to conserve RET/Medicinal species. An outlay of **Rs.802.169 Lakh** has been proposed for this purpose. The details of division wise target are furnished in following Table 1.1.3 and the site wise details are given in the Annexure III-III.

CAMPA - Annual Plan of Operation 2024-25

1.1.4 ANR Plantation of Other Indigenous Miscellaneous Species @500 Plants/Ha.

In a significant move towards sustainable forestry, the forests of Odisha are witnessing the implementation of an Aided Natural Regeneration (ANR) initiative aimed at fostering the growth of diverse indigenous miscellaneous species. This strategic intervention seeks to harness the natural regenerative capacities of the ecosystem, supporting a rich tapestry of native flora and promoting ecological resilience.

Forests are considered as most endangered due to deforestation,

degradation, fragmentation, shifting cultivation and other types of anthropogenic disturbances. Primarily, natural forests support higher levels of native species richness and abundance

CAMPA - Annual Plan of Operation 2024-25

than plantation forests. Plantation forests can perform like natural forests if they are composed of locally occurring native tree species. Native species plantations may create better canopy cover and soil chemistry conditions that favours the native species than the colonized exotic species. Biodiversity in the plantation forests can be enhanced through (1) conserving remnant native trees, snags, and cavity trees during harvest (2) planting long rotational tree species (3) utilizing native species over exotics and polycultures over monocultures (4) avoiding intensive site preparation and (5) thinning some plantations heavily and others not to maintain a mosaic of open to non-open areas to encourage native species colonization. ANR offers significant cost advantages because it reduces the costs

associated with propagating, raising, and planting seedlings in gaps @500 plants of indigenous species as per site condition per hectare. It is most effectively utilized at the landscape level in restoring the protective functions of forests such as watershed protection and soil conservation. ANR techniques are flexible and allow for the integration of various values such as timber production, biodiversity recovery, and cultivation of crops, fruit trees, and non-timber forest products in the restored forest. Considering the above aspects, an area of **12575 Ha.** has been proposed in APO 2024-25 in forest area of different divisions with financial outlay of Rs **4809.938 Lakh.**The detailed division wise target are furnished below in table 1.1.4 and site wise detailed are placed in Annexure III-IV.

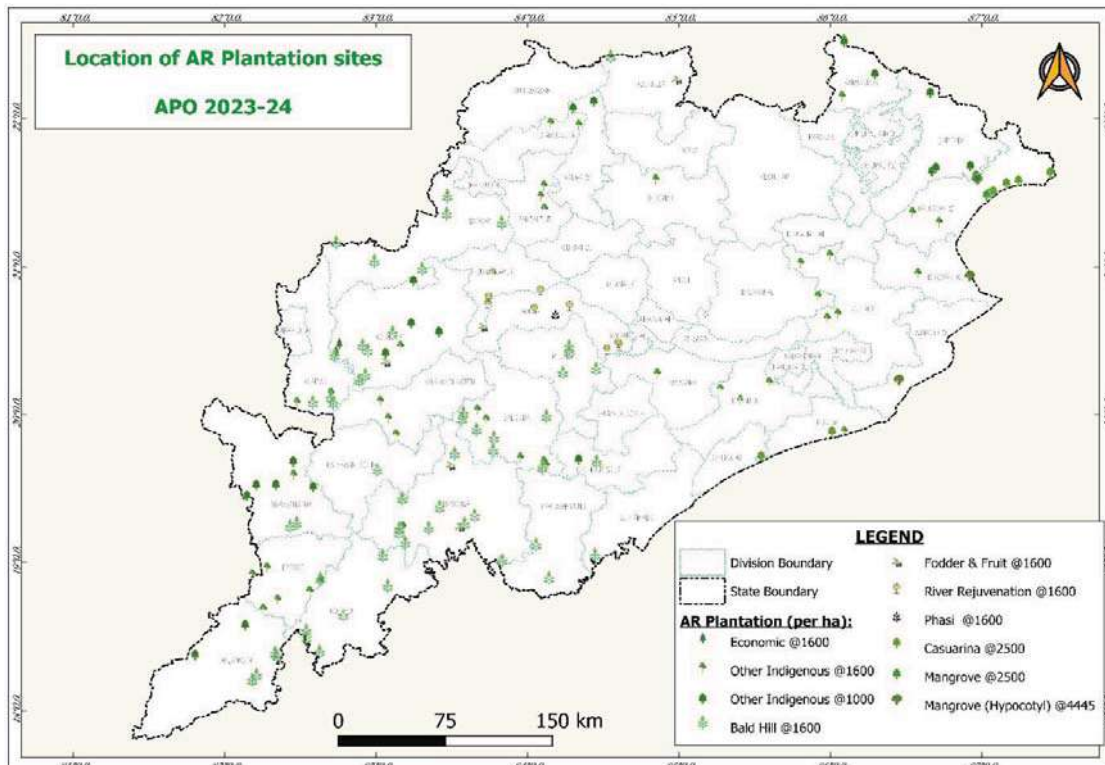

Table 1.1.4 Division wise target of ANR Plantation of Other Indigenous Miscellaneous species @ 500 plants per Ha. (@ Rs 0.38250 Lakh /Ha.)

1.2 Artificial Regeneration (Block Plantation)

CAMPA - Annual Plan of Operation 2024-25

In a strategic move towards afforestation and ecosystem restoration, the Compensatory Afforestation Fund Management and Planning Authority (CAMPA) in Odisha has spearheaded an Artificial Regeneration (Block Plantation) initiative. This visionary proposal aims to enhance forest cover, biodiversity, and ecological resilience by employing scientific techniques for tree plantation in designated Forest blocks across the State.

The Forest Block allotted to Plantation Working Circle are in various stages of degradation due to biotic factors, repeated fire hazards, grazing and encroachment. Artificial regeneration

1.2.1 Economic Plantation @ 1600 Plants per Ha.

In an effort to promote sustainable forestry practices and harness the economic species, the forest authorities in Odisha have launched an Economic Plantation initiative. This project focuses on the cultivation of economic species with the aim of fostering ecological balance, supporting local economies, and meeting the demand for timber sustainability.

The condition of growing stock in the forests is being consistently improving through CAMPA by raising block

to increase the relative sustainability of forest ecosystem and also to rejuvenate the natural forest where the vegetation has been lost and gaps so created due to various factors. To make the greenery in the gaps inside forest, the block plantations (AR Mode) has been proposed to be undertaken considering feasibility of different aspects. Different models of AR plantation has been proposed considering the assessment of field situation by the executive agency. An area of **1672.5 Ha** in different AR mode has been proposed with financial outlay of **Rs. 2626.68 Lakh** in APO 2024-25. The different AR models are detailed below.

plantation with economically indigenous species in suitable pocket of prescribed plantation working circle areas. In this model of AR plantation, species having high economic value, endangered, and high genetic biodiversity values are proposed. Most of species are indigenous and suitable to the local site conditions. An area of **20 Ha @ 1600 plants per Ha** has been proposed in APO 2024-25 with financial outlay of **Rs. 24.988 Lakh**. The detailed division wise target are furnished below in table 1.2.1 and site wise details are placed in Annexure III-V.

Table 1.2.1 AR Plantation Economic @1600 plant/Ha. (AR MODE) @ (Rs.1.24940/Ha.)

CAMPA - Annual Plan of Operation 2024-25

1.2.2 AR Indigenous Species Plantation @1600 Plants per Ha

In a bold step towards enhancing forest cover and biodiversity, the Compensatory Afforestation Fund Management and Planning Authority (CAMPA) has launched an ambitious Afforestation initiative. This program focuses on the plantation of indigenous species at a density of 1600 plants per hectare, aiming to restore ecosystems, mitigate climate change and support sustainable resource management.

Due to various biotic, anthropogenic and unsystematic management of forest some indigenous species are in endangered condition. It has become essential to conserve the indigenous species to safeguard the biodiversity. Considering the availability of gaps in the forest floor, site condition conducive to indigenous species, in this APO 2024-25, the

plantation programme of indigenous species under AR mode @1600 plants per ha over **493 ha** has been proposed with a financial outlay of **Rs.615.954 Lakh**.

The details of division wise target and financial outlay with cost norm are given in the following Table 1.2.2. The location wise details are annexed in Annexure III-VI

Table 1.2.2 Division wise target of AR Indigenous Species Plantation 1600 plant @ Rs.1.24940/Ha

CAMPA - Annual Plan of Operation 2024-25

1.2.4 Phasi Plantation @ 1600 Plants per Ha.

Car Festival or Chariot Festival is a festival associated with Lord Jagannath held at Shri Khetra Puri Dham in the State of Odisha. RATHA YATRA, the Festival of Chariots performed at Puri every year: The three chariots of Lord Jagannath, Balabhadra and Subhadra are newly constructed every year with wood of specified trees like Phasi, Dhaura, etc. The Phasi trees are getting depleted day by day due to various anthropogenic and biotic factors for which the specified timber are not sufficiently available from

forests of Odisha. It has been planned to raise a special plantation programme under CAMPA to cater the requirement of specified Phasi timber for Car festival.

In this APO 2024-25, the Phasi plantation programme in AR mode @1600 plants per ha over an area of **5 ha** has been proposed for creation with a financial outlay of **Rs.6.247 Lakh**. The details of division wise target and financial outlay with cost norm are given in the following Table 1.2.4 The location wise details are annexed in Annexure III-VIII

1.2.5 River Rejuvenation Plantation @1600 Plants per Ha

The river embankment and river catchment is the most suitable place for plantation programme which is an effective initiative by forest department under CAMPA. It will maintain perennial water flow and will recharge the ground water and ultimately recharges the river through small tributaries. Forest is the lifeline of river. Hence, in this APO 2024-25 an ideal model has been proposed to make plantations on river bank as well as in its catchment to rejuvenate. For the above purpose, during this APO 2024-25, an area of **115 Ha** has been proposed

with a financial outlay of **Rs 143.68 Lakh**. The details of division wise target and financial outlay with cost norm are given in the following Table 1.2.5 The location wise details are annexed in Annexure III - IX

CAMPA - Annual Plan of Operation 2024-25

1.2.8 Casuarina Plantation (in protected areas only) @ 2500 plants per Ha

Casuarinas are a versatile group of plants with wide-ranging adaptability to grow in different environments and provide multiple end uses and services. Casuarina thrives well in areas having an annual rainfall ranging from 250 to 2,500 mm, maximum temperature as high as 48°C and tolerates cold up to 0°C. It is a light demanding tree and grows in almost all types of soil and is highly tolerant to soil salinity and having the ability to fix atmospheric nitrogen through a symbiotic association with the actinomycetes microorganism. The soil on which it can thrive includes coastal sand, shifting sterile sand, river alluvium, and sandy loam with highwater table, red loam, red gravelly loam and hard laterite etc. The species *C. equisetifolia* is often planted as a windbreak. In addition to

their wind firmness, Casuarinas have desirable characteristics for shelterbelts, adaptability to many soils and climates, self-sufficiency for nitrogen, rapid growth, adequate height and longevity, dense crown and useful wood. The prime objective of casuarina plantation is for Erosion Control and Sand Dune Stabilization. In Odisha there is a long stretch coastline of 480 kms which needs shelterbelt plantation to create a barrier to cyclones. Casuarina plantations are

CAMPA - Annual Plan of Operation 2024-25

raised along the coastal belt to ensure higher production of biomass. Considering the above facts, Casuarina plantation model has been incorporated in APO 2024-25 in different feasible Divisions over an area of **59.5 Ha** with

financial layout of **Rs 113.14 Lakh**. The details of division-wise physical target and financial outlays are given in the following Table 1.2.7 and the location wise details have been reflected in Annexure III-XII.

1.2.9 Mangrove Plantation (seedling origin) @ 2500 plants/Ha

Odisha has a long coastline of 480 kms. These areas are the regions of rich biological diversity. In fact, on the inter-tidal zone, mangrove vegetation are found which provide large-scale food and good habitat for marine life. Restocking of old mangrove areas and afforestation of the new inter tidal mud flats would offer excellent nesting, roosting and breeding sites for aquatic birds. The high biological activity associated with mangroves is also responsible for food provided for the hundreds of thousands of migrant birds

that visit our region for wintering. Ramifying root systems of mangrove act as effective silt traps and the filtering action prevents the silt from getting deposited on coral formations. Thus mangrove ecosystem would improve the ecology as well as economic development of the area. They are of immense value for the growth of estuarine fisheries and allied occupations. The herding cattle find good fodder in mangrove particularly during scarcity periods.

Considering above facts mangrove plantation of seedlings of Mangrove species @2500 plants/Ha in suitable coastal Divisions over an area of **40 Ha** with financial outlay of **Rs 41.521 Lakh** has been proposed in this APO 2024-25. The details of division wise physical target and financial outlays are given in the following **Table- 1.2.9** and the location wise details have been reflected in Annexure III-XIII

CAMPA - Annual Plan of Operation 2024-25

Table 1.2.9 Division wise target of Mangrove Plantation @ 2500 seedlings per Ha (@ Rs 1.03803 Lakhs Per Ha)

1.2.10 Mangrove Plantation (Hypocotyl)@4445 Nos. plants per Ha

The special type of viviparous germination occurs in case of mangrove plants. The prominent green or greenish brown part of germinated seeds gives rise to development of root system while remaining attached to plant. The Hypocotyl plantation of mangrove plants is done by the collection of Hypocotyl and implanting the same in the mud flats in delta region.

The mangrove plantation of Hypocotyl mode @ 4445 Nos. /Ha has been proposed over an area of **20 Ha** in different coastal divisions with financial outlay of **Rs 7.822 Lakh** in this APO 2024-25. The details of division wise physical target and financial outlay are given in the following **Table- 1.2.10** and the location wise details have been reflected in Annexure III-XIV

2. Maintenance of Plantations

Maintenance of plantation is the key intervention of plantation programme for its success. Once a plantation is raised, silvicultural treatments are basically needed to promote the conditions that are favourable to the survival and subsequent growth. All the silvicultural operations envisaged in the plantation programme for the maintenance years are to be carefully implemented. For the

success of the plantation of various models, different silvicultural operations have been provisioned in cost norm statement. The CAMPA Odisha gives priority for the maintenance activity of plantation programmes during subsequent years which has been briefed in the maintenance years.

CAMPA - Annual Plan of Operation 2024-25

2.1 2nd Year Maintenance

2.1.1 2nd year maintenance of ANR Vanya Silk Plantation @500 Plants/Ha

In ANR mode of Vanya Silk plantation, for its better growth, an area of **1180 ha** with total financial outlay of **Rs 128.384 Lakh** has been provisioned for 2nd year

maintenance work during APO 2024-25. The division wise details are given in the following **Table 2.1.1** and the location wise details are furnished in the Annexure III-XV.

2.2.14 3rd Year Maintenance of Mangrove (Hypocotyl) Plantation @ 4445 Plants/Ha

Maintenance of Mangrove (Hypocotyl) plantation in 3rd year is vital for desired growth to restock the area with green cover. It needs special measures to be carried out in the field in subsequent years. Hence, for the above purpose fund

allocation of **Rs 11.088 Lakh.** has been proposed for **125 ha** in this APO 2024-25. The division wise details are given in **Table 2.2.14** and location details are placed in Annexure III-XLII.

CAMPA - Annual Plan of Operation 2024-25

2.3 4th Year Maintenance

2.3.1 4th Year Maintenance of ANR Plantation @200 Plant/Ha

The 4th year maintenance of ANR plantation is quite essential for grooming of the young saplings with silvicultural operations to promote the growth of plantation as well as to the existing natural vegetation. Hence, for the above purpose over an area of **35515 Ha** with financial outlay of **1967.531 Lakh** has been proposed in APO 2024-25. The division wise details are given in **Table 2.3.1** and location details are placed in Annexure III-XLIII

3. AMA JANGALA YOJANA

3.1 AJY Phase-I

Ama Jangala Yojana is an endeavor of the Government of Odisha, Forest & Environment Department, being implemented through Odisha Forestry Sector Development Society to promote sustainable forest management in the State with emphasis on livelihood support for the communities living in the forest fringe villages in VSS mode. The project activities include survey and demarcation, Geo referenced locations of assigned area

and treatment area, mapping, micro plan preparation, capacity building, community developments, livelihood support and forest restoration support through AR Plantations & ANR activities.

Ama Jangala Yojana covers 4,601 nos. of VSS with a treatment area of 2,30,573 Ha in 22 Territorial and Wildlife Divisions. The Project has started from 2016-17 to 2021-22 and extended upto 3 years i.e. 2022-23 to 2024-25. The maintenance of old plantations in AJY over an area of 69,837 Ha with Financial outlay of Rs 2375.01 lakh was taken up in the APO 2023-24. It is proposed to maintain the 4th year old plantations of an area of **42,837 Ha** during APO 2024-25 with a Financial outlay of **1371.70 Lakh**. the location wise details are placed in the Annexure III-L

4. Silvicultural Operations

4.1 Subsidiary Silvicultural Operations of Bamboo

Among the major economic forest products, Bamboo occupies the prime slot. Bamboo is a versatile plantation species and its afforestation is ecologically sound and economically viable. It is also adopted by farmers as agro forestry species, planted along field bunds and in concentrated blocks. It has great demand both in domestic and industrial sectors. The Silviculture system adopted is "culm selection system", combined with cleaning and tending operations. Clump is the unit of management. Mature culms will be

CAMPA - Annual Plan of Operation 2024-25

extracted by selection method depending upon the total number of mature culms and the productive capacity of the clumps. The main objective is to ensure maximum production without impairing the vigor of the clump and to protect bamboo to ensure sustained growth and productivity. In Odisha bamboo forests are worked out as per working plan prescription of the concerned Divisions.

In the bamboo clumps, treatment involves activities such as cutting back of high stumps, cutting and removal of diseased

and dead culms and removal of inflammable material to reduce fire hazard, earth mounding to the base of the clump with soil scooped out from uphill side after stacking of boulders on the downhill side.

It is proposed to take up **75000 ha** of bamboo silvicultural operations under APO 2024-25 as per the Working Plan prescriptions. The total financial outlay for Bamboo SSO is **Rs.2112.000 Lakh**. The division wise physical and financial target are detailed in **Table 4.1**

Table 4.1 Division wise target of SSO Bamboo (@ 0.02816 Lakhs/Ha)

4.2 Silvicultural Operation and Maintenance of Research Stations

Silvicultural research and experiments are carried out in the state to study different species in trial plots being raised at different research gardens situated in different agro climatic zones of the State. The data collected from different species raised at different research gardens are being computed. Steps are also taken to increase the species for augmenting the

data base to study on the growth of different indigenous species raised in different agro climatic zones of the State. In this APO 2024-25, for Silvicultural Operation and Maintenance of all Research Stations existing in the State has been proposed with fund allocation of **Rs. 150 Lakh**. The Location wise details are given in the table 4.2

CAMPA - Annual Plan of Operation 2024-25

5. Protection of Forests

The Forests are prone to various types of damage such as fire, grazing, illicit tree cutting, encroachments on lands etc. To protect the forest area from such damage, protection infrastructure needs to be strengthened. The forests are highly susceptible to forest fires which may be caused due to natural or man-made cases. The fire incidences, if not controlled

within the shortest possible time, cause irreversible damage in terms of properties and destruction of wildlife and biodiversity. The scheme envisages various measures to control forest fires. Under this scheme, protection measures such as equipping and supporting forest force & fire fighting are the major thrust areas.

5.1 Protection of forest through consolidation by geo-referencing of notified forest block.

Demarcation of forest boundaries is integral to the forest management in ensuring protection of the integrity of the forest blocks. Utilising latest technology, Geo-referencing of the forest block boundaries is crucial to make any interpretation based on aerial and satellite imagery in order to locate any events or changes inside forests. Geo-referencing in consolidation of notified forest blocks are very much useful for

protection of forest boundaries to get early warning and to avoid the encroachment of forest land for different activities. In this APO 2024-25, for protection of forest through consolidation by Geo-referencing of Notified Forest Blocks over an area of 20838 km² and 4099 km² of Revenue and Deemed Forest area with financial outlay of Rs 1500 Lakh. has been proposed. The details of activities are mentioned in Table 5.1

Table 5.1 Activity wise details for consolidation by geo-referencing of notified forest block in APO 2024-25.

Sl No	Item of Work	Outlay Rs. in Lakhs
1	Preparation of cadastral map vector and management map vector of notified forest block after joint verification of forest and revenue personnel

3	Digitization and georeferencing of revenue and deemed forest of 4099 Km ² area & preparation of degraded revenue forest land bank for Compensatory afforestation	350.00
	Total	1500.00

5.2 Protection of Forest through provisioning of mobility by hired vehicle.

Forest protection is a vital aspect of forest management that focuses primarily on prevention & control of destruction of forests due to biotic interference. Inadequate protection measures lead to degradation of the value of forests. The survival and re-generation of flora and fauna has come under threat due to illegal exploitation of forest because of biotic and other anthropogenic factors. Continuous patrolling inside the forests alone will ensure proper watch against any such illegal activities and prompt legal action against any such forest and wildlife offences. There are sufficient network of forest roads inside but the lack of sufficient means in mobility and

communication are the challenges coming on the way of forest protection. To fortify the timely and regular patrolling, vehicular mobility is to be augmented. The mobility of frontline staff and other supervising staff is badly required for protection of Forests. Keeping this in view, provision has been made to deploy hired protection vehicles for the whole year in all forest Ranges, forest Circles etc. to the barest minimum of 227 nos hired vehicles. In this APO 2024-25, for forest protection **Rs.1225.80 Lakh.** has been proposed for engagement of 227 nos of hired vehicles for mobility of the field staff and the division wise details are given in the **Table 5.2.**

Table 5.2 Activity wise details for protection of forest through provisioning of mobility by hired vehicle (whole year)

6. Forest Fire Prevention and Control Operations

Forest fire is a global environmental problem causing extensive damage every year to forest ecosystems. The Forest types in Odisha are mainly dry deciduous and the entire forest area is very much susceptible to fire hazard. Forest Fire poses threat not only to the forest wealth but also to entire community of fauna and flora by seriously disturbing the biodiversity, ecology and environment. Forests are vast remote areas, full of highly combustible material with dry leaves and branches to act as a fuel source for fire. The fire ignition is primarily be caused through human actions. The deciduous forests of Odisha suffer on account of repeated fire during summer months resulting great loss to regeneration,

moisture stress, biomass depletion and hardship to wildlife. It needs to be controlled and managed to safeguard productivity and eco-system health. Steps have been taken to augment the existing manpower in organized groups to tackle forest fire in remote and inaccessible areas. Odisha Forest Department has developed SOP to combat forest fire from 2016-17. Leaf blowers to disperse leaf and creating fire line inside forest floor are effectively used. The following interventions are proposed in current APO for control and mitigation of fire as per integrated fire management plan prepared by state Forest Department

6.1 Fire protection rapid response teams involving community youth hired vehicles for fire protection.

In this APO 2024-25, It is proposed to deploy Fire Protection Rapid response teams/units involving community youth (10 persons per Unit) with hired vehicles for Fire Protection. There are 213 units to be engaged during APO 2024-25 Fire

Season with a Financial Outlay of Rs **1603.89 Lakh** has been proposed and the division wise details are given in the **Table 6** and the location details are placed in the **Annexure III-XXXIX**

6.2 Creation and Maintenance of fire line

It is a time-tested methodology that evolved since long that fire line so created during January in the forest reduces the fire hazards in the forest. Fire line creation and maintenance is an important preventive method to control forest fire. It is created along all the compartment lines and the boundary line of the forests blocks as well as along the Forest Path and maintained at regular intervals during the fire season. New fire lines need to be created taking into

CAMPA - Annual Plan of Operation 2024-25

consideration vulnerability and past FSI report/ Satellite imageries. In this APO 2024-25, it is proposed for Creation and Maintenance of fire line over **19500 RKM**

with a Financial Outlay of **Rs 686.40 Lakh**. The division wise details are given in the **Table 6**

6.3 Procurement of Fire Blower including fuel and other accessories

In this APO 2024-25, for Procurement of Fire Blower including fuel and other accessories with a Financial Outlay of **Rs**

198.90 Lakh has been proposed and the division wise details are given in the **Table 6**

6.4 Logistic support for fire squads

In this APO 2024-25, for Logistic support i.e. Medicines, Fire protection Gear, Torch Light etc. for fire squads of 213 unit with a

Financial Outlay of **Rs 181.05 Lakh** has been proposed and the division wise details are given in the **Table 6**

6.5 Training on Forest Fire to the frontline Forest Staff

It is necessary to impart training on Fire protection to frontline staff, Fire squad personnels, Local villagers, interested NGOs by the State Fire and Disaster Management officers. In this APO 2024-

25 for Training on Forest Fire to the frontline Forest Staff of 283 units with a Financial Outlay of **Rs 28.30 Lakh** has been proposed and the division wise details are given in the **Table 6**

6.6 Awareness Campaign in the Ranges

The inhabitants of forest fringe villages, village level workers, PRI members are to be properly educated to prevent fire and “Do’s” and “Don’t” are to be properly explained. For this the help of local SHGs/VSS are taken for better results. In this APO 2024-25, a Financial Outlay of **Rs 141.50 Lakh** has been proposed for Awareness Campaign in the Ranges of 283 unit and the division wise details are given in the **Table 6**

6.7 Fire Watch Tower

The earliest detection of forest fire results minimum damage to the forest flora & fauna. In remote forest area Fire Watch Tower is proposed at strategic locations for early detection and sharing of information

with fire response teams. In this APO 2024-25, 10(ten) nos. of Fire Watch Towers with a Financial Outlay of **Rs 200 Lakh** has been proposed and the division wise details are given in the **Table 6**

CAMPA - Annual Plan of Operation 2024-25

Name of Division	Table 6 FOREST FIRE PREVENTION AND CONTROL OPERATIONS												TOTAL

7. Soil and Moisture Conservation in Forest area

Forest is the origin for the streams and rivers, therefore it is very important to conserve soil and moisture in its catchment area. Emphasis is given to the drainage line treatment. SMC works on the site are carried out as per the site specific approved treatment plan.

Forests and trees affect the hydrologic behavior of a watershed, including the quantity and quality of stream flow, erosion and sedimentation. In general, natural forests yield the highest quality of water of any ecosystem. The lowest erosion and sedimentation rates are usually associated with forested watersheds in natural conditions. Stream flow from forested watersheds tends to be more uniform, with peak flows lower than those from watersheds with other vegetative cover. Watershed protection enhancement of water resources, and watershed rehabilitation. The importance of environmental services is becoming increasingly evident to society, in particular, carbon sequestration, biodiversity protection and water

forest floor. Different model of SMC works like staggered trench, percolation pits, loose boulder check dam, brush wood check dam and graded earthen bunds etc are carried out to enhance the moisture regime in forest floor and periphery areas. The SMC works have been proposed in saturation mode of each block. The DPR for SMC work has been proposed through LIDAR survey.

treatment and retention through soil and moisture conservation measures in the

Soil and Moisture Conservation in Forest area is a major intervention to enhance the moisture regime of the forest floor. The contour trenches along contour in continuous or staggered manner is to reduce velocity of water and increase infiltration. Percolation pits need to be provided to trap precipitation. The graded earthen bund structure is proposed to be erected at the periphery of the forest block to retain the water for longer period and to facilitate percolation of water in more areas before wastage. In a forest patch the entire drainage line will be treated as per the requirement from top to bottom to check soil erosion through LBCD, Wire mesh Check Dam, Cement concrete check dam etc.

CAMPA - Annual Plan of Operation 2024-25

Considering present environmental crisis, massive soil and moisture conservation measures are proposed for execution in the field. The same is planned for each of the forest blocks in saturation mode and shall be carried out as per the DPR prepared for each forest

block. In APO 2024-25, the SMC activities have been proposed over **12000 ha** area with total financial outlay of **Rs 4200.00 Lakh**. The division wise Physical and Financial target of SMC under CAMPA APO 2024-25 are given in the table 7.1

Table 7.1 Divisional wise Physical and Financial Target of SMC under CAMPA APO 2024-25(@ 0.35000 Lakh/Ha)

8. WILDLIFE MANAGEMENT

8.1 ACTIVITIES UNDER NPV 80% COMPONENTS

8.1.1 Wildlife Protection and Management

As narrated above wildlife protection and management is posed with many challenges due to increase in human population, developmental needs including linear infrastructure resulting in fragmentation of the habitats, blocking the natural movement paths causing

straying of animals, wildlife depredation due to human wildlife conflict etc. As per CAF Rule, 2018 the expenditure proposed under this head is from 80% NPV components. The following are the proposals under this item:-

8.1.1.1 Protection and Anti -Depredation Activities

Protection of wild animals and their habitat is of paramount importance. This covers not only protection of wild animals in their natural habitats but also in the cases wherein they stray into human habitations, agricultural field etc. In the process, there is considerable damage to Wildlife as well as life and property of human beings. Therefore, due provision for rapid response, mobility, POL and procurement and maintenance of boats/ equipment for tracking/ monitoring etc including personal protection equipments and non-invasive anti-depredation equipments need to be procured well in advance and also as and when required for safeguarding both the wildlife and the life and property of human beings.

In order to maintain continuity of wildlife habitats and to prevent encroachment, maintenance of boundary of protected areas and creation of physical barriers like solar power fence and elephant proof trench are the need of the hour. These barriers also serve as short term measure to minimise human wildlife conflict.

Govt. have approved the scheme “**Jana Surakshya Gaja Rakshya**” for taking up solar power fence with community participation. In the said scheme, for fencing of community level assets, the community would contribute 10% and the rest would be borne by the Government out of the total cost. For individual property an equal contribution of 50 % each would be borne by the beneficiary and the Government.

Accordingly, funds provision has been proposed.

People’s participation, through schemes like Gaja Sathi, where VSS and PRI institutions have achieved great success in creating people oriented first line of response during 2021-22 and 2022-23 in addressing situations owing to human wildlife interaction so as to prevent occurrence of any law-and-order situation. During 2021-22 557 villages were taken up under this scheme which was enhanced to 863 villages during 2022-23 based on the positive feedback received from the field functionaries. This has also given significant result in preventing human wildlife conflict by effective and early circulation of vital information among forest fringe dwellers. Funds have been proposed to provide necessary protective gear, training, incentives and anti-depredation equipments to 5 members each (to be selected by the VSS/PRI) of 1000 villages falling within the identified 84 most vulnerable ranges of the state.

Apart from that in order to gather information on wildlife crime, intelligence network between field and the divisions in close coordination with wildlife headquarters is required for quick exchange of information and ameliorative action. Besides this, monitoring of elephant movement, data related to wildlife crime needs to be shared on daily basis between headquarters and field units. For this purpose, 24 x 7 wildlife crime cell is functioning at the headquarters level and

CAMPA - Annual Plan of Operation 2024-25

in all wildlife divisions. This is a necessary prescription from Wildlife Crime Control Bureau (WCCB), New Delhi also. Hence fund provision of **Rs.1004.20 lakh** has been made for the purpose as detailed below: -

Table 8.1.1.1 Protection and Anti-depredation Activities

8.1.2 Forest fire prevention and control

Forest fires from February to June are common phenomenon due to climate conditions. Fires cause huge loss to habitat by damaging regeneration, causing moisture stress, biomass

depletion etc. Many a times wild animals, their young ones or eggs also get damaged by it. In this connection the proposal for **Rs 650.64 lakh** as detailed below is incorporated.

Sl. No.	Item of work	Unit	Unit cost (Rs. in lakh)	Quantity/ Unit (In No.)	Proposed amount (Rs. in lakh)
(i)	Fire-fighting Squads including hired vehicle & it's fuel.	Nos.	7.53	48	361.44
(ii)	Fire-fighting equipments including Blowers along with fuel.	Nos.	0.65	111	72.15
(iii)	Logistics support for the fire fighting squads.	Nos.	0.85	48	40.80
(iv)	Fire line Creation & maintenance.	KM	0.03520	5007	176.25
Total:					650.64

8.1.3 Wildlife Habitat, Restoration, and Improvement

Habitat improvement is core to all wildlife related managerial interventions that aim to conserve, protect and proliferate biodiversity richness index both inside and outside protected areas. Required focus in this sector holds key to prevent wildlife habitat degradation and helps in reduction of wildlife depredation. Following activities are proposed for improvement of Wildlife habitats.

This activity aims to improve the food and water facility for wildlife inside

forest and protected areas. For this purpose creation of 50 nos. of water harvesting structures, 150 nos. of water bodies, renovation of 100 nos. of water bodies and creation and maintenance of 100 salt licks have been proposed. This item also takes care of plantation of fruit bearing and fodder species around the water body and their subsequent maintenance until 3rd year.

Habitat enrichment through bamboo seed ball plantation, rhizome plantation and aerial broadcasting of seeds has been

CAMPA - Annual Plan of Operation 2024-25

planned within forest areas having steep slopes that otherwise cannot be taken up under normal plantation. Grazing depletes meadow meant for herbivores, creates soil compaction, allows colonisation of non palatable invasive grass species and also increases the risk of transmission of communicable diseases. Hence, in this component provisions have been made for creation and maintenance of meadows and Wildlife Health Management through organisation of animal health and vaccination camps.

Odisha is also frequently affected with cyclonic storms that ravage forest and protected areas. Other happenings like flowering of bamboo, forest fires etc majorly impact large stretches of forest area and severely affect fodder availability for the herbivore population. This needs immediate restoration and ameliorative steps to restore normalcy. Hence, intervention like bamboo clumps improvement through appropriate silvicultural operations over an area of 500ha to start with has been prepared both within and outside PA's.

In this item it is to be proposed to cater to certain specific biological and habitat linked requirement as necessitated by some RET species like Black Buck beyond forest and protected areas, conservation for which is of paramount importance for the sustenance of the landscape. This also includes conservation of important wetlands outside Protected Areas, some of which exist even within human dominated landscapes, that are

prominent migratory bird congregation areas and deserve specific management interventions in order to ensure that the wetland sustains itself and also supports the wintering Avian migrants.

Provision is also been made for community participation based assessment of habitat suitability to sustain its biodiversity especially for RET species along with their prey and forage grounds existing outside the protected areas and in many cases even outside forest areas.

The ambit of wildlife management has to include the local population and villagers in discharging day to day activities concerning assessment of wildlife habitat and conservation of wildlife.

The local population provide the necessary intel that helps enforcement activities against wildlife offenders and prevent commission of wildlife offences. A judicious involvement of local people with the forest staff ensures community conservation of wildlife landscape that instils an element of deterrence among the offenders.

Hence, it is proposed to engage 87 units of local people on casual basis along with provision of mobility and necessary logistics for ensuring effective monitoring, assessment and protection of wildlife habitat both within and outside of PAs for which **Rs.2985.07 lakh** have been proposed as per the item-wise breakup detailed below.

CAMPA - Annual Plan of Operation 2024-25

Sl. No.	Item of work	Unit	Unit cost (Rs. in lakh)	Quantity/ Unit (In No.)	Proposed amount (Rs. in lakh)

CAMPA - Annual Plan of Operation 2024-25

8.1.4 Management of Biological Diversity and Biological Resources:

For assessment of success of wildlife management, periodical studies of biodiversity of Protected Areas, population dynamics of different fauna, carrying capacity of wildlife habitats and such other studies are essential. There is also a large chunk of wildlife including RET species outside protected and also in open revenue areas.

The participation of local communities by jointly managing the whole landscape including protection monitoring and surveillance became imperative and accordingly the prescriptions have been made. In this APO, provisions of **Rs 2066.00 lakh** have been proposed for the above purpose.

8.1.5 Relocation of Villages in Protected Areas:

Relocation of villages from protected areas and tiger reserves was initially started basing on Govt. of India guidelines of 2008 which was applicable only to core area of Tiger Reserves.

As its relevance to maintain wildlife habitat contiguity and inviolate was realised, the State Govt in June, 2016 brought out the state voluntary village relocation policy and extended the scope to buffer area of Tiger Reserves and other protected areas.

During 2022-23 there has been a modification in the relocation policy of both Central and State Govt. The Central and State Govt have increased the relocation package from 10 lakh per family to 15 lakh per family. But state relocation policy has increased the scope wherein the individual family can relocate themselves @ Rs.20.00 lakh/per family (without any other convergence related facility) and also need not wait for the consent of the entire village. When the relocation

package of 15 lakh per family is offered, other facilities are also extended by way of convergence and in case the family does not want the benefit of the convergence, then the additional amount of Rs.5 lakh will be provided.

The applicability of the current state relocation policy also extends to those villages which are situated in contiguous landscapes linking protected areas.

In the last APO, provision of Rs.5000.00 lakh was kept specifically for the purpose. In this APO it is proposed to continue with the said proposal and a sum of **Rs.2500.00 lakhs** has been kept for implementation of the five-year voluntary relocation scheme submitted vide letter No.7118 dt.04.09.2020 by the PCCF (WL) & CWLW, Odisha.

B. ACTIVITIES UNDER 20% COMPONENTS OF NPV

9. Capacity building of Frontline Forest Staff & Other Stakeholders

The demand for downstream services such as environmental education, health services, recreation and tourism based on forest is rising significantly and a skilled and enabled workforce is needed to meet the challenges. At present, there is lack of competent and adaptable workforce in forest front line staff. Hence capacity building training programme is essential to keep abreast the latest emerging scenarios.

Importance of capacity building in form of different training programmes to equip front line forestry personnel with the desired knowledge and technical competence needs no elaboration. The fast-changing forestry scenario at the local, national and global levels makes the training needs more pronouncing. The details of the trainings held are enclosed for reference.

Soil and Moisture Conservation in forest areas is main factor in management and

development of forest. The field staff needs to be trained in order to take up the job scientifically. It is decided to organize the training modules with the technical experts being hired for the purpose.

There has been a growing demand for supply of arms to forest personnel at the cutting-edge level mainly for self-defence and to deal with heavily armed smugglers and poachers often equipped with deadly weapons. The forestry personnel need adequate knowledge to use the arms supplied to them. In order to bridge the gap, it is proposed to impart arms training with the help of District Police Administration in each Territorial Division.

There is also need for proper understanding of the legal provisions and latest amendments for all the frontline staff who are in the protection job. Frequent training by legal experts will

CAMPA - Annual Plan of Operation 2024-25

definitely help to be conversant with existing Rules. A training module has been planned for the frontline staff on digitization of forest boundaries.

In the changing scenario, technological development is adopted in day to day forestry activities which needs specialized training on technical forestry matter required for the front line staffs, such as nursery techniques, watershed management, silviculture, community participation, natural resource management etc.

10. Up-gradation of Communication and information Technology, Geo-ICT facility-based Server infrastructure, maintenance and procurement of IT Equipment and devices

Forest Information Technology & Geomatics Centre (FITGC) has been developed in the State Forest Head Quarters which plays a key role in Forests & Wildlife management, conservation, and its protection. In the said center, monitoring of different activities like forest and wildlife protection, forest fire, activities undertaken under CAMPA funding through Odisha Forest Management System, Forest Cover Change detection, Afforestation monitoring etc. are being taken up. There are 23 modules for survey/ implementation/ monitoring of different activities aimed towards better forest management and protection. To control/monitor all the above activities, Geomatics and other IT Infrastructure has been installed and configured in the State Forest Head Quarter's FITGC cell which is being utilized for the purpose

There will be a special training module as a part of this programme to enhance the capacity of the forest staff for better and effective communication with village communities and inter departmental communication.

In this APO 2024-25 for Capacity Building of frontline forest staff and other stake holders, a financial outlay of **Rs 50.00 Lakh.** has been proposed

and about 12TB data is being managed in the FITGC server stack. Till now, 8910 numbers of Android Mobiles of field staffs are registered in our OFMS website, which are used for digital forest activity monitoring and data collection. This has made the field staff more comfortable with IT application. Under forest protection, focus is being given on foot patrolling by frontline field staffs which is also been monitored in the above center through web application. On an average 1,00,000-kilometer foot patrolling is done per month by the forest staff using GPS PDA & Android mobiles loaded with appropriate apps which is being monitored online through the web [https:// odishaforestgis.in](https://odishaforestgis.in). The forest fire monitoring is being done using MODIS & SNPP satellite platform in the above center.

CAMPA - Annual Plan of Operation 2024-25

In this APO 2024-25 for Up-gradation of Communication and information Technology, Geo-ICT facility-based Server infrastructure, maintenance and procurement of IT

Equipment and devices with financial outlay of **Rs 200.00 Lakh.** has been proposed as follows

Sl No	Item of Work	Proposed Approximate Cost (Rs in Lakh)
A	Up- gradation of Communication & Information Technology, Geo-ICT Facility & Devices	
1	Strengthening & Maintenance of the Odisha Forest Monitoring System & Odisha Timber Transit Permit System. Development of CAMPA website.	100.00
2	Upgradation of Server Network and all IT infrastructure of Forest Headquarters including procurement, operation & Maintenance	94.00
3	Manpower, GIS Expert	6.00
	Total	200.00

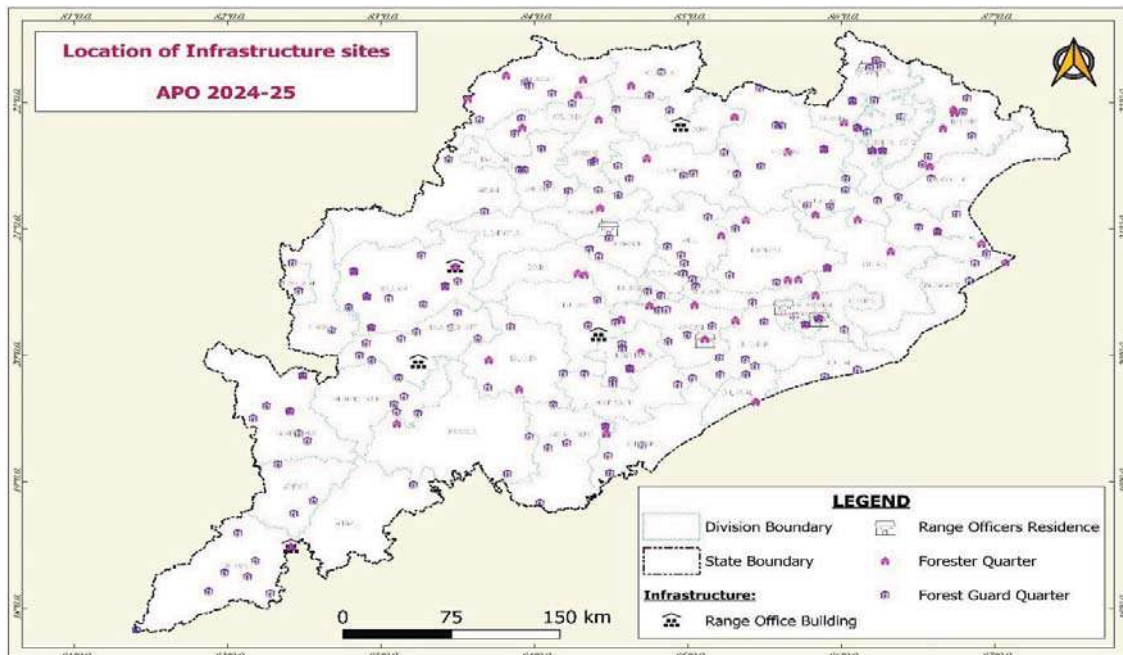

11. Infrastructure Development

The CAF Rule-2018 provides for utilization of CAMPA fund towards development of basic infrastructure required for forest and wildlife management under two broad categories of (1) Maintenance and construction of forest roads etc. and (2) Constructions of

Residential/official buildings for front line staff. In APO 2024-25, the following infrastructures has been proposed with financial outlay of **Rs. 5560.75 Lakh.** including spill over works of previous APOs, the division wise details are given **in Table 11**

Detail Activity	Physical Target	Unit cost (Rs in Lakhs)	Financial outlay (Rs in Lakhs)
Maintenance of Forest Road	725 Km	0.69	500.00
Range Office	5 Nos	35.51	177.55
Range Officer Residence	5 Nos	27.31	136.55
Forester Quarters	60 Nos	23.30	1,398.00
Forest Guard Quarters	170 Nos	18.52	3,148.40
Spill Over Works of Previous APO			200.00
Sub Total			5560.75

CAMPA - Annual Plan of Operation 2024-25

11.1 Maintenance of Forest Road

The Infrastructural development like Maintenance of forest road is quite essential for mobility of forest staffs to ascertain the condition of forest growth and check the illicit removal of forest growth by the smugglers. Forest roads are damaged every year due to the

natural calamities, hence its repair and maintenance is inevitable for better forest management and wild life management. In this APO 2024-25 for Maintenance of Forest Road of 725 Km, a financial outlay of **Rs 500.25 Lakh.** has been proposed.

11.2 Range Office Buildings

The Range Officer is the key position in

the hierarchy in the implementation of various programmes of Forest Department. Since the inception of CAMPA, major focus is given on modernization and construction of Range offices and Range Officer Residential accommodations. In this APO, proposals have been given for construction of 5 new Range offices in different Divisions. Financial outlay of **Rs 177.55 Lakh @ 35.51 lakh** has been made in APO 2024-25 and details are placed in the **Annexure III-LI**

11.3 Range Officer Residence Buildings

A standard plan and estimate has been prepared for the residential accommodation of Range Officer, All the estimates are prepared as per the approved cost analysis of works Department, Govt of Odisha. In this APO 2024-25, the forest Range officer residence for **5 nos.** @27.31 lakh/ each with total financial outlay of **Rs 136.55 Lakh** has been proposed. The location details are placed in **Annexure III-LII**.

11.4 Forester Quarter Buildings

In this APO 2024-25, provision has been made for establishment of **60nos** of Forester qtrs. with financial outlay of **Rs 1398.00Lakh @ 23.30 Lakhs/Unit**. The division wise location details are placed given in **Annexure III-LIII**

CAMPA - Annual Plan of Operation 2024-25

11.5 Forest Guard Quarter Buildings

In this APO 2024-25, provision has been made for establishment of **170 nos.** of Forest Guard qtrs. with financial outlay of **Rs 3148.40 Lakh @ 18.52 Lakhs/unit.** The division wise location details are placed given in **Annexure III-LIV**

11.6 Spill over Works of Previous APO

The spill-over works in the context of an Annual Plan of Operation refer to tasks or projects that were planned for last APO, but could not be completed within that timeframe due to unavoidable

circumstances. In this context, financial outlay of **Rs 200.00 Lakh** has been proposed in APO 2024-25 for Spill over works of previous APO.

12. Casual Engagement of Local youth to assist regular staff of state forest department for protection of forest and wildlife undertaken from State Fund (10 person each in 227 units for whole year)

Forest protection is a vital aspect of forest management that focuses primarily on prevention & control of destruction of forests due to biotic interference. Inadequate protection measures lead to degradation of the value of forests. The survival and regeneration of flora and fauna has come

under threat as a result of illegal exploitation of forest due to biotic and other anthropogenic factors. Illicit felling smuggling and poaching are a great threat in preserving, protecting and conserving the flora and fauna. Legal provisions made for forest and wildlife offences are not sufficient to address the

CAMPA - Annual Plan of Operation 2024-25

problems completely due to inadequacy in infrastructure, trained frontline personnel & ancillary support. Vulnerable smuggling pockets where acute timber smuggling is noticed were identified in the different forest Divisions.

Biotic and other anthropogenic factors affecting the quality of forest is mostly location specific and local community especially the youth having thorough knowledge about the terrain and traditional customs of the area should get more involved in the efforts of forest department in protection. Involvement of local youth ensures continuous monitoring against encroachment over forest land and unsustainable exploitation of the forest resources. Such Forest Protection through community

involvement through local youth being the key intervention has been given top priority under CAMPA. In APO 2024-25, provision has been kept for Casual Engagement of Local youth to assist regular staff of state forest department in protection of forest and wildlife (10 person each in 227 units for whole year). Considering the above criteria to safe guard the existing green cover 227 nos of squads with 10 persons in each squad covering 219 ranges in 37 forest Divisions of the State and one protection squad in each circle covering 8 circles, has been proposed to be deployed to check against encroachment of forest land and smuggling activities. Under this activity **Rs 3972.51 Lakh** has been proposed for APO 2024-25. The division wise details are given in the **Table12**

Table 12: Casual Engagement of Local youth to assist regular staff of state forest in APO 2024-25 Forest Protection squad (10 person /sqd) (@Rs17.50003)

13. Survey & Mapping of Forest Areas to create Land Bank for Compensatory Afforestation

The compensatory afforestation activities programme. Search of suitable non - are the first mandate of CAMPA forest land for raising compensatory

CAMPA - Annual Plan of Operation 2024-25

afforestation leads to delay in processing diversion proposals. The land bank concept was brought in to ease out the process for identifying CA areas against the diverted land for diversion proposal. The State Government decided to create Land Bank comprising non-forest Govt land and degraded revenue forest land for compensatory afforestation. The user agency can avail facility for allotment of land for CA by the District Collector as per prevailing Rules and procedures.

In the present scenario it has become a herculean task to identify the forest land

for taking up compensatory afforestation whenever the diversion proposal is initiated as per Forest Conservation Act. To fulfil the immediate need for compensatory afforestation creation of land bank is most essential. Survey and Mapping of available blank forest area is essential for creating land bank. Therefore, in APO 2024-25 a financial outlay of **Rs 100.00 Lakh** has been proposed for identification, Survey & mapping.

14. Monitoring & Evaluation including 3rd Party Monitoring

For monitoring of the schemes and their accounting a timely updating of the data, uploading of data in e-Green watch, and OFMS is essential. For the above works, one support staff who is well conversant with data management and analysis is required for each Range and the cost of out sourcing of same has been proposed in this APO. Further, as per CAMPA

guidelines, all the activities of previous operations carried out under CAMPA are to be monitored and evaluated by an independent/3rd party organization to assess the quality as well as effective utilization of funds. To carry out different monitoring and evaluation works, a provision has been made in APO 2024-25 for **Rs 150.00 Lakh**.

15. Publicity & Awareness Programmes

Various activities are being implemented by the Odisha Forest Department which needs to be displayed in public domain.

Hence a financial outlay of **Rs 150.00 Lakh** has been proposed in APO- 2024-25 .

CAMPA - Annual Plan of Operation 2024-25

16. Wildlife Management (20% NPV)

16.1 Equipment/Devices for Communication facilities & IT activity for Protection of Wildlife:

For improving the performances of protection staff, it is essential to have better communication facilities available with them and for these, following activities are proposed in this APO 2024-25.

16.3 Publicity & Awareness Programmes

Under this component it is proposed to take up publicity, awareness, training and capacity building programmes for the field staff and Rapid Response Teams with respect to wildlife protection, anti-

depredation activities, rescue and rehabilitation operations etc. Thus in this APO 2024-25, a financial outlay of Rs 50.00 Lakh has been provisioned for the above purpose.

Table 16.3 Publicity & Awareness programmes

Sl. No.	Item of work	Unit	Unit cost (Rs.in lakh)	Quantity/ Unit (in No.)	Proposed amount (Rs.in lakh)
(i)	Research, Publicity, Awareness, Training, Capacity building, Documentaries, IEC Material & Observation of Important days etc.	LS	LS	LS	50.00
Total:					50.00

UTILIZATION OF INTEREST MONEY

(Activities under 60 % of Interest Money)

17. Escalation of program cost due to revision of wage rate

There are wage revisions at periodic intervals by the State Government. There is need for a provision to offset the increased wage rate as and when

required. Hence an allocation of **Rs. 200.00 Lakh** has been kept on lumpsum basis to meet the escalated enhanced program cost in the APO 2024-25.

18. Maintenance of 18 months seedling

18.1 Maintenance of 18 months seedling to be planted during 2024-25

The enrichment of the forest by supplementing massive plantations in and around the forest areas is the most effective mechanism for enhancing the green cover in Odisha. A review of old practice by raising 6 months old seedlings shows that the plantation of tall seedlings (18 months old) give better growth and survival. Therefore, it is

proposed to maintain 2.83 cr. 18 months old seedlings & raising of 1.5 crore seedlings during January 2025 in different nurseries of various Divisions of the State under APO 2024 -25 with financial outlay of **Rs 8199.81 Lakh**. Division wise details of the seedlings to be grown are given in the following **Table 18.1**

CAMPA - Annual Plan of Operation 2024-25

Table 18.1 Maintenance of 18 months seedling

(Activities under 40 % of Interest Money)

19. Management of office establishment of State Authority

As per Section 10 of CAMPA Act, the State Authority has been notified by the State Government of Odisha on 29.9.2018. The Authority requires funds for its day to day functioning as permissible in the Compensatory Afforestation Fund Act,

2016 & the Compensatory Afforestation Fund Rule, 2018 of CAMPA. An amount of Rs. 300.00 Lakhs has been kept for the contingent expenses, office expenses and the salaries towards engagement of human resources in CAMPA Authority.

20. State Forest Academy

The implementation of provisions of CAF Act and Rules does not limit to the State Authority and has got larger connotations ranging from Mining, Revenue, Finance, Tribal Development, Livelihood Support, Rural Development and other stakeholders. Realizing this,

the Government of India has also kept people from divergent fields in the Executive Committee, Steering Committee and the Governing Body. All such members involved need to be sensitized at periodic intervals. It is therefore envisaged to put in place a

CAMPA - Annual Plan of Operation 2024-25

capacity building centre for the capacity enrichment of different stakeholders of forest management. State Capacity Building centre will provide such a platform to enlighten people, policy makers on several aspects of overall forest management. The State Level

Steering Committee accords top priority to the development of Capacity building centre i.e State Forest Academy. This activity is permissible as per Rule 6 (b) and Rule 5(3). This is an ongoing activity and in the current year, an amount of **Rs. 500.00 Lakh** has been proposed.

21. Charges for consumption of internet data etc and other contingency of State Authority

The staff at field level while executing afforestation, protection and management of forest and wildlife, use different IT Devices and gadgets for monitoring. For uploading of field information in the departmental web

portal, e-green watch portal, OFMS, meeting and training on virtual mode, the field officials incur expenses towards consumption of Internet Data. An amount of **Rs. 200.00 Lakh** has been proposed to meet their expenses in this APO 2024-25.

22. Rainwater harvesting, LED Display board and Installation of Solar Panel

Rainwater harvesting is the collection and storage of rainwater for later use. This can involve collecting rainwater from rooftops or other surfaces and storing it in tanks or underground reservoirs.

Benefits: It helps conserve water resources, reduce stormwater runoff, and can be used for various purposes like Gardening, flushing toilets etc. besides improving the ground water.

CAMPA - Annual Plan of Operation 2024-25

22.1 LED Display Board

LED (Light Emitting Diode) display boards are electronic displays that use light-emitting diodes for visual output. They are commonly used for outdoor advertising, information display, and in various other applications.

Benefits: LED display boards are energy-efficient, have a longer lifespan compared to traditional displays, and offer high brightness and clarity. They are also programmable, allowing dynamic content updates.

22.2 Installation of Solar Panels

Solar panels are devices that convert sunlight into electrical energy. Solar panel installations involve placing these panels on rooftops, in open fields, or other suitable locations to harness solar energy.

Benefits: Solar panels provide a renewable and sustainable source of energy, reduce reliance on traditional power sources, and contribute to environmental conservation by lowering carbon emission.

For these components, i.e item no 23.1 to 23.3, a financial outlay of **Rs 100.00 Lakh** has been proposed in APO 2024-25.

PART-IV

Measurable output of all physical activities and targets of each permissible activity along with the period required for achieving the measurable output.

CAMPA - Annual Plan of Operation 2024-25

1. (A) PHYSICAL AND FINANCIAL TARGETS OF THE ACTIVITIES TO BE UNDERTAKEN UNDER APO 2024-25

APO 2024-25 comprises of mandatory activities like Compensatory Afforestation, PCA, 1.5 SZ, Site specific Conservation Plan, Regional Wildlife Management Plan, different models of Plantations under NPV, Subsidiary Silvicultural Operations of Bamboo, Forest Protection, Ama Jungala Yojana, Soil and Moisture Conservation Measures, Wildlife Management, Infrastructure development, IT & GIS, Biodiversity Management, Capacity Building, etc. The above activities under APO 2024-25 are to be mainly implemented by the territorial,

wildlife wing and Forest IT & GIS cell. As advised by the National Authority while discussing the previous Plan, efforts are made to separate the activities done by the wildlife wing and territorial wing. The main expenditure is planned under NPV. The categories of NPV under 80% and 20% are also separated as per CAF act & Rules. As per the CAF Rule 6 interest part has been considered and activities under 60% and 40% has been incorporated in this APO 2024-25 which has been depicted in the table below activity wise.

Abstract of Activities Proposed in APO 2024-25

1.1 AFFORESTATION ACTIVITIES

The afforestation activity is the primary programme of the APO 2024-25 which includes plantations under CA, PCA, CATP and AR, ANR, Bald Hill, Casuarina,

Mangrove under NPV and the maintenance of previous years plantations. In addition to the plantation, rehabilitation of degraded forests and

CAMPA - Annual Plan of Operation 2024-25

conservation of RET/medicinal patches of indigenous species are also taken in to consideration in different planation models under AR & ANR. In this APO

2024-25, the plantation programme of different models considering site specific and socio-economic utility of indigenous species are taken up.

1.1.1 Plantations under CA, PCA

The physical and financial target of plantation operations under CA, PCA being carried out in the current year APO

2024-25 which are given in the following table

Year Wise & Model wise CA/PCA Plantations and Maintenance of Old Plantations

Year	AR (in Ha)	ANR (in Ha)	ANR (WG) (in Ha)	Bald Hill (in Ha)	No. of Tree Plantns (in Nos)	Canal Bank/ Avenue Plantn (in RKM/No)	Fin. Outlay (Rs in Crore)

1.1.2 Plantation Activities under NPV

The plantation programme of different models considering site specific and need of society are fully taken into consideration. In APO 2024-25, in AR mode plantation like Economic plantation, indigenous plantation, Phasi plantation, River rejuvenation plantation, Bald hill, Casuarina, Mangrove, Bamboo, Miyawaki and Fodder & Fruit plantations with maintenance of old year

plantations up to 4th years are taken up. In ANR model Vanya Silk, Fodder & Fruit, RET/Medicinal & other indigenous misc. plantations are considered. Plantation maintenance of Ama Jangala Yojana, Phase-II is included in the APO 2024-25. The physical and financial target of the plantation activities are given in the following table

Current Year Plantations

CAMPA - Annual Plan of Operation 2024-25

1.4 Protection Activities

Forest being the open treasury needs proper protection for its better management. For protection activity communication, information exchange and movement of forest patrolling staff are the basic need. Fire hazard inside forest is a damaging factor which needs proper arrangement to combat it. For movement of staff vehicular arrangement

are quite necessary to restrict the theft and fire incidences inside forest, staff with local people movement is quite inevitable. A financial outlay of **Rs 5765.84 Lakh** has been proposed for the protection activities in APO 2024-25. The details of Protection activity are mentioned in the following table.

Detail Activity	Physical Target	Fin. Outlay (Rs in Cr.)
Protection Activities		
Protection of Forest through consolidation by Geo-referencing of Notified Forest Block		1,500.00
Protection of Forest through provisioning of mobility by hired vehicle	227 No	1,225.80
Sub Total		2,725.80
Fire Protection		
Fire Protection Rapid Response Teams involving community youth with hired vehicle for Fire Protection	213 Nos	1603.89
Creation and Maintenance of fire line	19500 Km	686.40
Procurement of Fire Blower including fuel and other accessories	306 Nos	198.90
Logistic support for fire squads	213 Nos	181.05
Training on Forest Fire to the frontline Forest Staff	283 Nos	28.30
Awareness Campaign in the Ranges	283 Nos	141.50
Fire Watch Tower	10 Nos	200.00
Sub Total		3,040.04
Total		5,765.84

CAMPA - Annual Plan of Operation 2024-25

2. Wild Life Management Activities:

Several activities are proposed for wildlife management. The main activities include protection of wild animals through a network of wildlife trackers, anti-predation squads, fire protection squads, relocation of villages from protected areas, tiger reserves, habitat improvement works like meadow development, water body creation, salt licks, black buck protection activities, SMC works in wildlife areas to enhance water regime in the forest for wild animals, strengthening of animal rescue centers, research activities, etc. The details of the activities and the financial allocation under APO 2024-25 are given in the following table.

Wildlife Activities

Activity Name	Outlay Rs. in Lakhs
Protection under Wildlife Management	1004.20
Forest Fire Prevention under Wildlife Management	650.64
Wildlife Habitat Restoration and Improvement	2985.07
Management Biological diversity and Biological Resources in PA	2066.00
Relocation of Villages in Protected Areas	2500.00
Equipment/ devices for Communication & IT Activity	325.00
Infrastructure	550.00
Publicity & Awareness	50.00
Total	10,130.91

2.1 Infrastructure

The CAF Rule-2018 provides for utilization of CAMPA fund towards development of basic infrastructure required for forest and wildlife management under two broad categories of (1) Maintenance and construction of forest roads etc. and (2) Constructions of

Residential/ official buildings for front line staff. In APO 2024-25, the following infrastructures has been proposed with financial outlay of **Rs. 6110.75 Lakh** for Forest and wildlife Divisions including spill over works of previous APOs.

Detail Activity	Physical Target	Unit cost (Rs in Lakhs)	Financial outlay (Rs in Lakhs)
TERRITORIAL WING			
Maintenance of Forest Road	725 Km	0.69	500.25
Range Office	5 Nos	35.51	177.55
Range Officer Residence	5 Nos	27.31	136.55
Forester Quarters	60 Nos	23.30	1,398.00
Forest Guard Quarters	170 Nos	18.52	3,148.40
Spill Over Works of Previous APO			200.00
Sub Total (Territorial)			5,560.75

CAMPA - Annual Plan of Operation 2024-25

WL WING			
Anti-poaching Barrack	10 Nos	30	300.00
Watch Tower	10 Nos	25	250.00
Sub Total (Wildlife)			550.00
Total			6,110.75

2.2 Maintenance of 18 months old Seedlings

Interest component are divided into two parts. In 60% interest component Maintenance (3 Months) of 18 Months Old Seedlings to be planted during 2024-25 for **133 Lakh.** of Saplings and maintenance (12 Months) of 18 months old seedlings to be planted during 2025-26 for **150 Lakh.** of Saplings. Creation (3 Months) of 18 months

old seedlings to be planted during 2026-27 for **150 Lakh.** In addition to that escalation of program cost due to revision of wage rate has been proposed.

The details of the activities and the financial allocation under APO 2024-25 are given in the following table.

Detail Activity	Unit	Physical Target	Unit cost	Financial outlay
Maint. of 18 months seedling (Apr-24 to June-24)	Nos	133 Lakh	0.00007	879.66
Maint. of 18 months seedling (Apr-24 to Mar-25)	Nos	150 Lakh	0.00038	5,663.40
Creation of 18 months seedling (Jan-25 to Mar-25)	Nos	150 Lakh	0.00011	1,656.75
Total maintenance Raising Seedlings...				8,199.81

3. Capacity Building, Publicity Awareness, Escalation of Cost due to revision of wage rate plantation, Management of office establishment, State capacity Building, Updating of OFMS Web Portal are included in Interest component.

Out of 40% Interest component, each year various forestry activities under CAMPA and other schemes are being implemented. Awareness programme and important days are observed under environment and wildlife matter. Various publicity materials are also

prepared to make the targeted stake-holders and general public aware about the programme. The details of the activities and the financial allocation under APO 2024-25 are given in the following table.

Activity Name	Outlay Rs. in Lakhs
Capacity Building	50.00
Publicity Awareness	200.00
Monitoring & Evaluation including 3rd party monitoring	150.00
Management of office establishment of State Authority	300.00
State Forest Academy	500.00
Charges for consumption of internet	200.00
Total	1,400.00

CAMPA - Annual Plan of Operation 2024-25

B- MEASURABLE OUTPUTS OF THE PHYSICAL ACTIVITIES UNDERTAKEN UNDER CAMPA:

Broadly defining, CAMPA APO 2024-25 has been formulated focusing on Afforestation, Subsidiary Silvicultural Operations of Bamboo, Soil and Moisture Conservation measures, various forest protection activities, Wildlife management, infrastructure development, training and capacity building.

a) The output for the Plantation & Nursery Activities:

1. Enhancement of Green Cover.
2. Reduction in Soil Erosion
3. Enhancement of the microclimate of the area
4. Socio-economic development and provision of employment to the villages living in the forest fringe villages.
5. Plantation outside the forest area increases the tree cover.
6. Involvement of people, students, civil society in the plantation activity increases the awareness towards forest, nature and make them good responsible citizens and empathy to forest and wildlife.
7. Increase in regeneration, coppice.
8. Providing shelters to wildlife.

b) The output for Forest Protection:

1. Enhancing the green cover.
2. Reduction in forest fire.
3. Make people partners in forest management and it results in owning the common property resources for the society.
4. Enhancement in the natural regeneration.
5. Increase in wildlife population.
6. Quantity of seized produce, no. of accused arrested, trends in offence incidents.
7. Extent of cooperation of the villagers in the forest protection
8. Usage and adequacy of fire protection, fire extinguishing equipment's.

c) Output for Wildlife Management Activities:

1. Reduction in wild animals straying incidences
2. Increased sighting of the wild animals
3. Increase in the health of wild animals.
4. Reduction in the Man animal conflict
5. Reduction in the unnatural death and injury of the wild animals.
6. Improvement in prey-predator ratio in the forest and wildlife areas.
7. Reduction in major wildlife crimes and efficient detection mechanism
8. Increase in the research activities especially sea turtle nesting, migratory birds, translocation of wild animals, management of tiger reserves, Orchids in nature, etc.
9. Reduction in the occurrence of infectious diseases to wild animals due to cattle.

CAMPA - Annual Plan of Operation 2024-25

d) Measurable Outputs of Infrastructure Development:

1. The increase in confidence and motivation levels of the staff as their personal needs are taken care of
2. The extent of occupancy and usability of the accommodation that is developed.
3. Increase in the mobility inside the forest areas as there is improvement in the forest road, construction of culvert, causeways are being constructed

e) Measurable outputs of SSO, Bamboo:

1. Increase in the quality of Bamboo crop.
2. Increase in the height of the Bamboo culms
3. Decrease in straying of wild animals outside the forest as there will be
- increase in the availability of food inside the forest area
4. Increase in the livelihood options of the Bamboo artisans living in the vicinity of the forest areas.

f) Measurable Outputs of SMC Works:

1. Extent of enhancement of water table
2. Extent of siltation
3. Support of the villagers as there would be increase in the water supply to the agricultural crops.
4. Increase in the availability of water inside the forest areas.

C1 DETAILS OF MONITORING AND EVALUATION:

1. The monitoring of the CAMPA activities is an ongoing process. There are different levels of monitoring.
2. Studying and analysing the data obtained from the field.
3. All the Muster rolls are checked by the Range Officers (50%), ACF (20%), DFO (10%)
4. All the work sites are inspected by the field officers in the proportions enunciated as per the Forest Code.
5. The officers of the PCCF office are designated to visit the circles and do the field inspections and guide the field staff accordingly.
6. The technology has been leveraged for monitoring the works.
7. Forest Information Technology & Geomatic Centre (FITGC) has been developed in the State Forest Hqrs which plays a key role in forests and wildlife management and its protection. In the said centre, monitoring of different activities like forest and wildlife protection, forest fire, activities undertaken under CAMPA funding through e-Green Watch, afforestation etc. is being taken up.
8. In the forest protection, more focus is given on foot patrolling by frontline staff which is also being monitored in the above centre. On an average, 80000 KMs of foot

CAMPA - Annual Plan of Operation 2024-25

patrolling is being done by the frontline staff per month using GPS-PDA and android based mobile loaded with appropriate apps which is being monitored online.

9. The forest fire monitoring is being done on MODIS and SNPP satellite platform in the above centre. There are 23 different apps for implementation / monitoring of different activities aimed towards better forest management and protection. To control/monitor all the above activities, a Geomatic and other CIT Infrastructure has been installed in the Forest Hqrs FITGC Cell which is being utilized for the purpose

and about 10 TB data is being managed in the FITGC Cell.

10. Customized GAGAN enabled GPS-PDA devices has been provided to all the Ranges in the field and is being utilized for operating different forestry applications being used for forest and wildlife management and protection. Mobile sets are being also utilized by the field functionaries for using the above forestry applications.
11. Even Elephant movements are monitored through apps and at many times, it has come handy to avoid accidents.

C2 THIRD PARTY MONITORING:

1. As per CAMPA guidelines, all the activities of previous operations carried out under CAMPA are to be monitored and evaluated by an independent/3rd party organization to assess the quality as well as effective utilization of funds. M/s CTRAN Consulting Ltd. has taken up 3rd party evaluation for APO 2009-10 to 2016-17 and has submitted the final report. Third party Monitoring & Evaluation of APOs from 2017-18, 2019-20 and 2020-21 has been entrusted to M/s Price Waterhouse Coopers Pvt. Ltd and has submitted the final report.

The Third-party monitoring of CAMPA activities has been entrusted to M/s Ernst & Young LLP and has also submitted the final report. M/s Agricultural Finance Corporation Ltd. (AFC Ltd.) has been selected for evaluation of CAMPA activities

of APO 2022-23 and the said firm has started the evaluation work.

The final report on third-party monitoring is usually sent to the National Authority and to all other concerns. The report is also published in the website of PCCF & HoFF, Odisha.

2. Internal auditors have been appointed through different CA Firms to audit the CAMPA works. Their job is to ensure all the financial procedures, whether followed as per CAF Act and Rules by all the implementing units. Also to see the implementation of Direct Benefit Transfers to the individual beneficiaries, submission of monthly accounts, MPR, QPR, etc. The auditors will give their half yearly reports on CAMPA working as per CAF Act and Rules.

**Proceedings of the 21st Meeting of State Level Steering
Committee of State CAMPA, Odisha held at 11.00 AM
on 11.01.2024 under the Chairmanship of Chief
Secretary, Odisha.**

.....

The State level Steering Committee meeting of the State Authority CAMPA was held under the chairmanship of the Chief Secretary, Odisha on 11th January 2024 at 11.00 AM in the 2nd Floor Conference hall. The list of the officials/participants is at Annexure.

Initiating the discussion, Additional Chief Secretary, FE&CC Deptt. welcomed the chairman and participating members and requested the PCCF & HoFF, Odisha to highlight about the APO 2024-25.

PCCF & HoFF, Odisha welcomed all the esteemed members of the 21st meeting of State level Steering Committee and apprised the Committee that the Executive Committee of State CAMPA in its 20th meeting held on 14-12-2023 has finalized APO 2024-25 with an outlay of Rs 1043.82 Crore and now with inclusion of some essential activities places a slightly modified APO, 2024-25 with an outlay of **Rs.1044.47 Crore**, before this committee for consideration and approval. The Annual Plan of Operation 2024-25 has been formulated in accordance with the provisions of Compensatory Afforestation Fund (Act) 2016 and Compensatory Afforestation Fund (Rules) 2018. Apart from the site-specific interventions under compensatory afforestation schemes and site-specific wildlife conservation plans, all other activities over the forest lands are formulated as per the prescription of Working Plans for forests and Management plans for Protected Areas. Thereafter, he requested the CEO, State Authority, CAMPA to present the details of the APO 2024-25.

Detailed presentation agenda wise was made by the Chief Executive Officer, State Authority, CAMPA before the committee. It was informed that the APO 2023-24 was approved with financial outlay of Rs. 1085.95 Crore against which the National Authority has approved the activities to the tune of

MPC

Rs.948.05 Crore. Out of this outlay, Rs.644.53 Crore (as on 31.12.2023) has so far been released to the implementing Divisions and all activities are under progress in the field. The progress of various plantation activities, Forest and Wildlife protection measures and creation of new infrastructures for frontline staff were discussed in detail.

Further, Chief Executive Officer CAMPA also apprised about the present fund position of state authority CAMPA.

The present Fund position of State CAMPA as on 30th November, 2023 is furnished below:

➤ Amount Received from National Authority after (reconciliation up to 31.03.2020)		6281.25 Cr
➤ Amount Deposited by User Agencies from 01.04.2020 to 30.09.2023 as reported by FD&NO Wing (+)		2241.76 Cr
TOTAL DEPOSIT (A)	Rs.	8523.01 Cr
➤ Interest accrued from Loan to Govt. up to 30.11.2023 (+)		253.78 Cr
➤ Interest accrued from ATB Investment up to 30.11.2023(+)		584.17 Cr
TOTAL INTEREST (B)	Rs.	837.95 Cr
GRAND TOTAL (A+B)	Rs.	9360.96 Cr
➤ Expenditure towards APO-2019-20	(-)	421.07 Cr
➤ Expenditure towards APO-2020-21	(-)	674.99Cr
➤ Expenditure towards APO 2021-22	(-)	841.67Cr
➤ Expenditure towards APO 2022-23	(-)	929.90 Cr.
➤ Fund Budgeted for APO 2023-24	(-)	1085.95 Cr.
TOTAL EXPENDITURE (C)	Rs.	3953.58Cr
FUND AVAILABLE WITH STATE AUTHORITY(A+B-C)	Rs.	5407.38 Cr

Out of the total fund Rs 5407.38 Cr available, Rs.3211.77 Cr. has been invested in ATB & Loan to Government.

ANNUAL PLAN OF OPERATION (APO) 2024-25:

Basing on position of funds available, State Authority CAMPA, pursuant to the provision of Rule 39 of CAF Rule 2018, has formulated APO for the year 2024-25 with an outlay of Rs.1044.47 Crore. The proposals of the APO for the year 2024-25 were placed before the Steering Committee for consideration and approval.

MV

ABSTRACT OF OUTLAY OF APO 2024-25

Name of Component	Financial Outlay (Rs in Crore)
Activities under CA,PCA, CA Others & CATP	150.12
Activities under IWLMP	259.10
Activities under NPV Component	540.25
Activities under Interest Component	95.00
Total	1044.47

1. SITE SPECIFIC ACTIVITIES INCLUDING CA, PCA AND CATP

New plantations under CA, PCA & CATP Activities are proposed in the APO under Section 6(a) of CAF Act 2016, considering the schemes and compensatory afforestation area pending for implementation. The detail of pendency is reflected in the table below:

The total area diverted up to September 2023	65303.216 Ha
Stipulation of Comp Affn. up to September 2023	90213.466 Ha
Achievement up to September 2023	76881.593 Ha
Balance Area to be covered	13331.873 Ha
Proposed area for Comp. Affn in APO 2024-25	7174.203 Ha

The details of new plantations and maintenance of previous years' plantations under Compensatory Afforestation, Penal Compensatory Afforestation, Additional Compensatory Afforestation etc. proposed in APO 2024-25 are given below.

1.1. Compensatory Afforestation, Penal Compensatory Afforestation, Additional Compensatory Afforestation etc.

The prime mandate of CAMPA is to fulfill the targets of compensatory afforestation plantation programme. Various models of plantation activities proposed under CA, PCA, Addl. CA in APO 2024-25 are; 637.088 ha block plantation, ANR with gap 5575.335 Ha , ANR without gap 73.96 ha, Bald hill 1389.34 ha, tall tree plantation of 61,042 numbers and Canal Bank/ Avenue

M.C.

Plantation over 1.6 RKM . To achieve the targets of APO 2024-25 a financial outlay of **Rs 150.12 Crore** has been provisioned including ancillary activities for above CA, PCA, etc and maintenance of old plantation. The year wise activities of plantations including maintenance of CA/PCA/CATP etc are given below.

Year	AR (in Ha)	ANR (in Ha)	ANR (WG) (in Ha)	Bald Hill (in Ha)	No. of Tree Plantations (in Nos)	Canal Bank/ Avenue Plantn (in RKM/No)	Fin. Outlay (Rs in Crore)
1 st Yr Plantation	637.088	5575.335	73.96	1,389.34	61,042	1.60 RKM	85.62
2 nd Yr maintenance	183.674	1,218.12	159.32	393.07	29346	-	5.19
3 rd Yr maintenance	605.50	3,024.61	827.76	168.08	13,250	1.61 RKM	3.09
4 th Yr maintenance	185.44	3,405.58	13.09	344.61	340	10.12 RKM	0.79
5 th Yr maintenance	87.46	2,684.22	449.50	727.85	5,050	-	1.14
6 th Yr maintenance	268.58	4,492.71	93.17	383.25	-	-	1.12
7 th Yr maintenance	174.48	1,218.36	-	-	640	-	0.26

1.2. Site Specific Wildlife Conservation Plan

The site-specific wildlife conservation plan formulated by the DFOs aiming at Project wise site-specific interventions and approved at the level of Chief Wildlife Warden, Odisha, at the time of submission of Forest Diversion Proposal for approval by MoEF & CC are taken up for its implementation. A provision of **Rs.164.105 crore** has been kept in this APO to implement the current year interventions in respect of 243 nos site-specific wildlife conservation plans. (148 nos. of ongoing sites + 95 nos. new SSWC Plans)

1.3. Regional Wildlife Management Plan (RWLMP)

While sending proposals for diversion of forest land for mining purpose, State Government stipulate for realization of cost towards implementation of Regional Wildlife Management Plans across the state as per the norm fixed by

M/C

the State Government. A Financial Outlay of Rs **95.00 Crore** has been proposed in APO 2024-25 for implementing the activities of Regional Wildlife Management Plans as per requirement.

2. ACTIVITIES UNDER NPV

The following activities are permissible under Rule 5 (2) & 5 (3) of CAF Rule 2018 out of the money received towards Net Present Value(NPV) from user agency & deposited in the State Fund

2.1. ACTIVITIES UNDER NPV 80% [Rule 5(2)]

The following activities permissible under Rule 5 (2) of CAF Rules 2018 under 80% NPV component have been kept in APO 2024-25 as briefed below.

2.1.1. Plantation Activities:

In APO 2024-25, an area of 18,869.5 Ha has been proposed to be taken up for plantation with an outlay of **Rs. 201.11 Crore** including maintenance of old plantation. Different models of site-specific and species-specific plantation activities have been incorporated in APO 2024-25. In this APO, effort has been made to accommodate various models of plantations considering the species diversity, feasibility, suitability of species and need of the forest dependent community and wildlife of the area. Under AR Plantation, various models have been proposed such as:

1. Economic Plantation of High Value Species,
2. Indigenous Species Plantation
3. Phasi Plantation,
4. River Rejuvenation Plantation,
5. Bald Hill Plantation,
6. Casuarina Plantation
7. Mangrove Seedling Plantation,
8. Mangrove (Hypocotyl) Plantation etc.

Similarly, under ANR plantations, various models have been proposed to be taken up such as

MPC

1. Vanya Silk Plantation,
2. Fodder and Fruit Plantation,
3. RET / Medicinal Species Plantation,
4. Other Miscellaneous Species Plantation etc.

The detail of plantation programme proposed in the APO 2024-25 is furnished below. Further, the proposal for maintenance of old plantations of last 3 years has also been kept in this APO.

Plantation (Creation) Component	Area (Ha)	Fin. Outlay (Rs. in Crores)
ANR Plantations		
Vanya Silk Pl. 500 pl/ha	190	0.73
Fodder & Fruit Pl. @ 500 pl/ha	817	3.13
ANR Gap RET/Medicinal @ 200 pl/Ha	3,615	8.02
Other Indigenous misc Species @ 500 pl/Ha	12,575	48.10
Total ANR	17,197	59.97

Grand Total of creation & maintenance		201.11

M/C

2.1.2. AMA JANGALA YOJANA (AJY)

Ama Jangala Yojana is a pilot project of Govt. of Odisha aimed at management & protection of forest, biodiversity etc. with participation of local community and is being implemented under CAMPA. In APO 2024-25, an amount of **Rs.13.72 Crore** has been proposed for maintenance of old plantations raised under AJY Phase-I in previous years.

2.1.3. Regeneration of Degraded Bamboo Forests (SSO Bamboo):

The basic principle of bamboo forest management focuses on growth of individual culms along with regeneration of new culms from the rhizomes. Retention of old culms causes congestion and incidences of diseases & pests in bamboo forest. Hence treatment of bamboo clump is an essential silvicultural practice for bamboo forest management. Such bamboo forests are worked as per working plan prescription of the concerned Division. To maintain the health of Bamboo forests in the State, an area of 75,000 Ha. has been proposed to be taken up during 2024-25 for bamboo silvicultural operation with SMC measures for which a provision of **Rs.21.12 Cr.** has been kept in this APO.

2.1.4. Silvicultural Operation and maintenance of Research Garden:

An amount of **Rs.1.50 crore** has been proposed for research activity and Silvicultural Operation and maintenance of Research Gardens.

2.1.5. FOREST PROTECTION

- a) **Forest protection** is an important part of forest management that focuses primarily on prevention & control of destruction of forests due to biotic interference. Inadequate protection measures lead to degradation in the value of forests and forest biodiversity. The survival and regeneration of flora and fauna is susceptible to the threat due to illegal exploitation of forest because of biotic and other anthropogenic factors. Steps are taken to ensure mobility of staff deep inside the forest and to

M.C.

improve their communication facilities for regular patrolling and on emergency situations. Improving the means for mobility and communication are key interventions in protection. In this APO 2024-25, it is proposed to engage 227 nos. of hired vehicle for protection activities for whole year to increase the mobility of field staff and to reduce response time in case of emergency situation in all divisions covering all the Ranges. For this, financial outlay of **Rs.12.26 Crore** has been proposed in APO 2024-25.

Consolidation of forest block boundaries and proper demarcation in the field is another activity of importance in protection of forest land. Hence, it was decided to digitize the boundary of Notified Forest area, revenue forests in phases. In this APO it is proposed to cover 21,352 Km² of Notified Forest area and 7,676 Km² of Revenue Forest area with an outlay of **Rs 15.00 Crore**.

Further, **Rs.10.04 Crore** has been proposed by Wildlife wing for such protection through activities like engagement of protection/ anti-depredation squad, boat patrolling, fencing & erection of barriers, participation of community for protection, prevention of WL crime etc.

- b) **Forest Fire Protection:** Forest fire causes severe stress and create imbalance in the ecosystem and is also a major concern in the forest management. Large stretches of forest in the State are deciduous forest and highly prone to forest fire. Appropriate interventions including round the clock monitoring of vulnerable areas and deployment of Rapid Response Teams proposed for deployment in case of emergency are therefore required to minimize occurrence of forest fire in the first place and to effectively address the forest fire where it happens. State level forest fire plan has been prepared by the Forest Department aiming at "**Zero Fire**" occurrence and accordingly, following measures for management of forest fire in the state are proposed with total financial outlay of **Rs 30.40 Crore** for Forest wing and **Rs.6.51 Crore** for wildlife wing in the APO 2024-25;

MIC

Detail Activity	Physical Target	Fin. outlay (Rs in Cr.)
Fire Protection Rapid response teams involving community youth with hired vehicle for Fire Protection	213 Nos	16.04
Creation and Maintenance of fire line	19500 Km	6.86
Procurement of Fire Blower including fuel and other accessories	306 Nos	1.99
Logistic support for fire squads	213 Nos	1.81
Training on Forest Fire to the frontline Forest Staff	283 Nos	0.28
Awareness Campaign in the ranges	283 Nos	1.42
Fire Watch Tower	10 Nos	2.00
Sub Total		30.40
Fire Protection in Wildlife Area		
Fire-fighting Squads including hired vehicle and fuel.	48 Nos	3.61
Fire-fighting equipment including Blowers along with fuel.	100 Nos	0.70
Logistics support for the firefighting squads.	48 Nos	0.43
Fire line Creation & maintenance.	5,000 KM	1.76
Sub Total (WL)		6.51
Total		36.91

2.1.6. Soil Moisture Conservation (SMC):

Soil and Moisture Conservation is an important activity to improve the moisture regime of the forest area and arrest soil erosion in degraded forests of the State. This will have positive impact on the growth and regeneration of vegetation as well as ground water level. An area of **12000 Ha.** of degraded forest Land of the State have been proposed to be treated under SMC with different interventions with an outlay of **Rs.42.00 Cr.**

2.1.7. Improvement of Wildlife Habitat:-

The State is having rich faunal diversity managed through wildlife organization of forest department. The management of wildlife is carried out through a network of protected areas which comes under various wildlife divisions and few territorial divisions. The management of wildlife habitat undertaken by the Wildlife Organization is supported by CAMPA as per CAF Act-2016 and CAF Rule-2018. In this APO, the following activities have been proposed under NPV with an outlay of **Rs.50.51 Crore.**

M/C

Sl.	Activities	Fin. Outlay (Rs. in Cr)
1	Wildlife Habitat Restoration and Improvement	29.85
2	Management of biological diversity and biological resources.	20.66
Total		50.51

2.1.8. Relocation of Villages from Protected Areas:

The relocation of villages from the protected areas like Satkosia and Similipal Tiger Reserves, Debrigarh and Kotagarh & other Sanctuaries of the state has been proposed with a financial Outlay of **Rs 25.00 Crore.**

2.2. ACTIVITIES UNDER 20% NPV FUND [Rule 5(3)]

2.2.1. Capacity Building:

Capacity Building of the frontline staff of Forest Department is an essential component to improve the standards in their operation with recent guidelines and in the scientific management of Forest and Wildlife. Also, there is need to create awareness among community residing near forest areas in the overall management of forest and sustainable utilization of forest produce to fulfill the needs of their livelihood. For the above purpose, a total financial outlay of **Rs.0.50 Crore** has been provisioned in this APO.

2.2.2. Up-gradation of communication and Information Technology:

To ensure the transparency in CAMPA activities digital monitoring is being adopted. A website for forest organization has already been developed to facilitate smooth operation of Forest IT. Proposal for up gradation of Communication and information Technology, Geo-ICT based Server infrastructure, procurement and maintenance of IT Equipment and devices in the Forest Wing has been included with financial outlay of **Rs.2.0 Crore.** In the Wildlife areas, it is proposed for installation of VHF base stations and their maintenance, Equipment for monitoring of wild animals and other means of communication in remote areas with financial outlay of **Rs.3.25 Crore**

M/C

2.2.3. Infrastructure development:

The CAF Rule-2018 provides for utilization of CAMPA fund towards development of basic infrastructure required for forest and wildlife management under two broad categories of (1) Maintenance and construction of forest roads etc. and (2) Constructions of Residential/official buildings for front line staff. In APO 2024-25, the following infrastructures has been proposed with financial outlay of **Rs. 61.10 Crore** for Forest and wildlife Divisions including spill over works of previous APOs.

Detail Activity	Physical Target	Unit cost (Rs in Lakhs)	Financial outlay (Rs in Crore)
Maintenance of Forest Road	725 Km	0.69	5.00
Range Office	5 Nos	35.51	1.77
Range Officer Residence	5 Nos	27.31	1.37
Forester Quarters	60 Nos	23.30	13.98
Forest Guard Quarters	170 Nos	18.52	31.48
Spill Over Works of Previous APO			2.00
Sub Total			55.60
WL AREA			
Anti-poaching Barrack.	10 Nos	30	3.00
Floating Jetty.	10 Nos	25	2.50
Sub Total (Wildlife)			5.50
Total			61.10

2.2.4. Casual Engagement of Local youth

Forest being the open treasury, illicit felling and smuggling are of great concern and challenge in the efforts to protect and conserve the green cover, though legal provisions are there to deal with forest and wildlife offences. Biotic and other anthropogenic factors affecting the quality of forest are mostly location specific and local community especially the youths having thorough knowledge about the terrain of the area should get more involved in the efforts of forest department in protection. Involvement of local youths in continuous monitoring against encroachment over forest land and unsustainable

MC

exploitation of the forest resources will be ensured. Such Forest Protection through community involvement through local youths being the key intervention has been given priority under CAMPA. In APO 2024-25, provision has been kept for Casual Engagement of Local youth to assist regular staff of state forest department in protection of forest and wildlife (10 persons each in 227 units for whole year). Under this activity **Rs 39.73 Crore** has been proposed for APO 2024-25.

2.2.5. Survey & Mapping of Forest Areas for CA Land Bank:

Survey & Mapping of Forest Areas is required to create Land Bank for Compensatory Afforestation and to ensure its further protection for which **Rs.1.00 Crore** has been proposed.

2.2.6. Monitoring & Evaluation:

Monitoring of all CAMPA activities at State, Circle and Divisional level is necessary for success of same. Further, as per CAMPA guidelines, all the activities of previous operations carried out under CAMPA are to be monitored and evaluated by an independent/3rd party organization to assess the quality as well as effective utilization of funds. For Monitoring & Evaluation, a provision of **Rs.1.50 crore** has been proposed in this APO.

2.2.7. Publicity & Awareness Programmes:

Each year various Forestry activities under CAMPA and other schemes are being implemented. Awareness programme and important days are observed under Environment and wildlife matter. Various publicity materials are also prepared to make the targeted stake-holders and general public aware about the programme. An outlay of **Rs.2.00 crore** has been proposed in APO 2024-25 for the same.

3. UTILIZATION OF INTEREST MONEY: [Rule 6(a) & (b)]

As per Rule 6 (a) & (b) of CAF Rule 2018, the interest accrued on monies kept in State Fund shall be used under 60% for plantation & protection related

activities & 40% towards development and management of State Authority Office, procurement of office equipment and other contingencies of State Authority. Accordingly, the following activities are proposed to be included in the present APO under above category.

3.1. INTEREST MONEY UNDER 60% ACTIVITY

3.1.1. Escalation of program cost due to revision of wage rate:

In various activities of forestry program, labour component is a major factor, the enhancement of labour rate at different interval causes change escalation in proposed outlay for which a provision of escalation of program cost has been proposed in this APO with a Financial Out lay of **Rs 2.00 Crore**.

3.1.2. Maintenance of 18-month-old seedling:

Under 60% of interest money, the activities like the maintenance of 18-month-old seedling to be planted during 2024-25 (3 months) and maintenance of 18 month old seedlings to be planted during 2025-26 (12 months) and raising of seedling during January, 2025 to be planted during July, 2026-27(3 months) has been proposed with financial outlay of **Rs 82.00 Cr**.

Sl No	Activity	Physical Target (in nos)	Financial outlay (in Crore)
1	Maintenance of 18 months seedling to be planted during July, 2024 (3 months) raised during January 2023	1.33 Cr	8.80
2	Maintenance of 18 months seedling to be planted during July, 2025 (12 months) to be raised during January 2024	1.50 Cr	56.63
3	Raising of 18 months seedling to be planted during July, 2026 (3 months) to be raised during January 2025	1.50 Cr	16.57
Total Maintenance and Raising Seedlings...			82.00

byc

3.2. INTEREST MONEY UNDER 40 % ACTIVITY

Under 40% of interest money category, the activities like expenditure of management of State Authority, State Forest Academy and charges for internet from beat level to State Authority has been proposed in APO 2024-25 with an outlay of **Rs.11.00 Crore** as per details given below:

Sl No	Activity	Physical Target	Financial Outlay (Rs in Crore)
1	Management of office establishment of State Authority	LS	3.00
2	State Forest Academy	LS	5.00
3	Charges for consumption of internet data for field Staff	LS	2.00
4	Rain Water Harvesting structure, installation of Solar Pannel, LED Display Board at State Forest Headquarters.	LS	1.00
Total 40% Interest			11.00

The PCCF (WL) explained to the committee members regarding the activities under the Site Specific and Regional Wildlife Management Scheme during the discussion.

The Chief Secretary suggested the following:

- i. Survival of palnts in all plantations taken under CAMPA should be higher, particularly the compensatory plantations as they are maintained for 10 years.
- ii. For adopting drone survey of plantation sites before planting and subsequently at regular intervals to assess the survival and growth of plants. The result of the survey is to be closely monitored and recorded in the plantation journal.
- iii. Regarding prevention and management of forest fire, the involvement of the local people is to be ensured by harnessing their support, and they

MC

should be rewarded for preventing forest fire.

- iv. In the eco-tourism destinations, the Forest Department should arrange for a short-term orientation training programme for the drivers carrying tourists, regarding rules & regulations, dos and don'ts in the eco-sites, disposal of waste, the ethnic value of local species, important wildlife in the area, etc. Those trained drivers can also double up as guides.
- v. Application of Artificial Intelligence (AI) in OFMS Plantation asset recording may be explored for quick comparison and early corrective measures, if required.
- vi. The Chief Secretary suggested to take up regular monitoring of the wells and streams of the nearby areas to assess the impact of soil moisture conservation measures under taken.
- vii. Since all the compensatory plantation sites have DGPS maps, a vegetation status analysis may be made for all such plantations, which are more than 10 years old.

After a detailed discussion, the committee deliberated on all activities proposed in the APO 2024-25 with an outlay of **Rs 1044.47 crore** and approved the same for submission to the National Authority CAMPA, Government of India MoEF & CC for their consideration & approval.

The details of the proposed activities in APO 2024-25 approved by the State Steering Committee are as follows:
