**Rc.No.8222/2024/CAMPA-I, Dated:28.02.2025.**

Sir,

Sub: Andhra Pradesh State Compensatory Afforestation Fund Management and Planning Authority (A.P. State CAMPA)- Submission of Annual Plan of Operations (APO) 2025-26 approved by the Andhra Pradesh CAMPA Steering Committee - Reg.

- Ref. 1. IGF, Member Secretary, FC, MoEF&CC, F.No.11-100/2015-FC (Vol-III), dt:10.08.2018 (Compensatory Afforestation Fund Rules, 2018).  
2. Draft guidelines for Digital APO under CAF Act, 2016 & CAF Rules, 2018 communicated in CEO, National Authority, New Delhi File No.NA-15/3/2022-NA, dt:30.09.2024 & 31.01.2025.

\* \* \*

In the reference 1<sup>st</sup> cited, the Ministry of Environment, Forests & Climate Change, Government of India, have framed certain rules on preparation of the Annual Plan of Operations for CAMPA scheme by the states and their approval by the National Compensatory Afforestation Fund Management and Planning Authority.

In pursuance of the above rules and guidelines issued from time to time by the National Authority, MoEF& CC, GoI, New Delhi, the Annual Plan of Operations, 2025-26 of Andhra Pradesh State CAMPA with a financial outlay of Rs.260.88 Crore has been approved by the Andhra Pradesh CAMPA Steering Committee.

Further, in the reference 2<sup>nd</sup> cited, the Chief Executive Officer, National Authority, CAMPA, GoI, New Delhi has informed that the Executive Committee of National Authority, CAMPA, GoI has decided in principle that, not more than 20% of the NPV funds available with the State should be spent annually except in special programmes/ projects where it can go upto 25% of NPV.

In view of the above it is informed that, the balance NPV funds available with the AP State are as follows.

|         |                   |                                                                               | (Rs. in crore)                      |                                                   |                                                      |                                        |
|---------|-------------------|-------------------------------------------------------------------------------|-------------------------------------|---------------------------------------------------|------------------------------------------------------|----------------------------------------|
| Sl. No. | Component         | CAF deposits by NA to Andhra Pradesh State (90% State Share) as on 31.03.2024 | Fund deposited by NA during 2024-25 | Fund released by State 2024-2025 (up to 20.01.25) | Balance CAF deposits available with AP State (3+4-5) | 20% of balance CAF Deposits (20% of 6) |
| 1       | 2                 | 3                                                                             | 4                                   | 5                                                 | 6                                                    | 7                                      |
| 1       | Net Present Value | 634.57                                                                        | 123.76                              | 57.07                                             | 701.26                                               | 140.25                                 |

Accordingly, the following APO 2025-26 approved to an extent of Rs.260.88 crore.

|         |                                 | (Rs. in crore)   |
|---------|---------------------------------|------------------|
| Sl. no. | Component                       | Financial Outlay |
| 1.      | Compensatory Afforestation (CA) | 109.07           |
| 2.      | Net Present Value (NPV)         | 141.81           |
| 3.      | Interest                        | 10.00            |
|         | <b>Grand Total</b>              | <b>260.88</b>    |

The Net Present Value (NPV) is proposed for Rs.141.81 crore (i.e., 20.22% of Rs.701.26 crore [Balance CAF deposits available with AP State under NPV])

The Form-XII book of the Annual Plan of Operations of A.P State CAMPA for the year 2025-26 along with the Minutes of 23<sup>rd</sup> meeting of the Steering Committee, A.P State Authority is enclosed herewith.

In view of the above, it is requested to approve the Annual Plan of Operations, 2025-26 at an early date so as to ensure timely implementation of the activities proposed in the plan.

Encl: As above

- The Steering Committee has requested the Finance Department to provide the details of funds available and the Interest accrued which is still awaited.
  - Requested the Government regarding interest accrued on funds received from National Authority through this office

Rc.No.22710/2015/CAMPA-II, dt:05.06.2023, 24.06.2023, 14.09.2023, 01.12.2023, 29.12.2023, 09.02.2024, 13.03.2024, 22.03.2024, 21.04.2024, 01.08.2024 and 16.05.2024.

- Further file circulated through e-office Computer No.2842747-dt:02.07.2024, No.2567242-dt:25.09.2024, No.2595347-dt:22.10.2024 and No.2679182-dt:09.01.2025. But the details of accrued interest are awaited from the Finance Department.

**Agenda Item No(7): Budget constraints resulting in non-implementation of CAMPA Scheme:**

- The Steering Committee has requested the Finance Department to consider transfer of the fund in lumpsum instalments to the Bank Account as per the approved APO to enable timely and effective implementation of APO. The Forest Department was advised to prepare an action plan for five years with projected requirement of budget year wise. Finance Department yet to initiate action.

Statement showing the requirement of budget for next 5 years i.e., from 2025-26 to 2029-30:

| Year    | Requirement of budget<br>(Rs.in crore) |
|---------|----------------------------------------|
| 2025-26 | 260.88                                 |
| 2026-27 | 260.00                                 |
| 2027-28 | 262.00                                 |
| 2028-29 | 263.00                                 |
| 2029-30 | 265.00                                 |

In many States, the amount approved in the APO, is released to the Savings Bank Account of the Principal Chief Conservator of Forests & HoFF to facilitate timely execution of works which are mostly seasonal in nature.

**Decision: The Steering Committee was apprised about the action taken on the minutes of the 22<sup>nd</sup> Steering Committee.**

**III. Agenda items for consideration of the SC of A.P. State CAMPA**

**Agenda 1**

**Approval of Annual Plan of Operations for the year 2025-26**

The works of CAMPA Scheme in APO, 2025-26 are proposed under (3) three Components i.e.,;

**A) Compensatory Afforestation (CA):**

The main mandate of A.P. State CAMPA is afforestation of the Compensatory areas given by the user agencies in lieu of the forest areas diverted for non-forestry purposes. It also envisages proper demarcation of the Compensatory Afforestation areas by erecting boundary pillars, implementation of soil and moisture conservation works as per site requirements, raising of planting stock, maintenance of previously raised CA plantations, etc.

The activities under this head i.e., CA / Addl.CA / Penal CA / Safety Zone /Catchment Area Treatment/IWMP/Others are taken up strictly as per the GoI stipulations while granting the Stage – I & II clearances of CA proposals and the Backlog CA areas. **An amount of Rs.109.07 crore is proposed under CA component in the APO, 2025-26.**

The component-wise Financial Targets of the CA Component of APO for the year 2025-26 is as under;

| S. No. | Sub-Component                                                                                                                                                 | Amount<br>(Rs. in Crore) |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| 1      | Compensatory Afforestation (CA)                                                                                                                               | 57.73                    |
| 2      | Addl. Compensatory Afforestation (ACA)                                                                                                                        | 2.63                     |
| 3      | Penal Compensatory Afforestation (PCA)                                                                                                                        | 0.38                     |
| 4      | Safety Zone Afforestation (SZA)                                                                                                                               | 1.33                     |
| 5      | Catchment Area Treatment (CAT)                                                                                                                                | 11.02                    |
| 6      | Integrated Wildlife Management Activities (IWMP)                                                                                                              | 5.71                     |
| 7      | Others (Indira Sagar Polavaram project, 132 KV DC/SC Line from 132/33 KV SS Vengalayaapalem to 25 KV RTSS, Nallapadu, Poola Subbaiah Veligonda Project etc.,) | 30.27                    |
|        | <b>TOTAL</b>                                                                                                                                                  | <b>109.07</b>            |

Raising of Plantations : 1336.70 ha  
Maintenance of Plantations : 3823.28 ha.

**B) Net Present Value (NPV):**

This Component includes activities pertaining to protection and improvement of the forest cover through natural forest management, forest protection, control of forest fire, conservation of biodiversity, production of quality seedlings and clonal material, application of GIS technology for better management of forests and enhancing the skills of the cutting edge staff for better protection of forests etc.

The following sub-components are proposed for an amount of **Rs.141.81 crore** for achieving the above objectives under NPV component of APO for the year 2025-26.

**(i) Sub-components proposed under Rule 5(2) of CAF Rules, 2018**

**(Rs. in crore)**

The details are as here under:

**5(2)(a) :** Activities such as improvement and management of Red Sanders, Bamboo, Natural teak forests, Seed dibbling, Hill treatment are proposed under Assisted Natural Regeneration. **An area of 330.00 ha. is proposed for treatment (raising) and an area of 1493.00 ha. for maintenance.**

**5(2)(b) :** Activities such as Bamboo, Red Sanders, Teak, Non teak secondary hardwood, Mangrove plantations are proposed under Artificial Regeneration. **An**

**area of 685.00 ha. is proposed for raising and 3839.70 ha. for maintenance.** Further, restoration of Mangrove areas was proposed in an area of 700.50 ha and maintenance of 700.50 ha under MISHTI programme.

**5(2)(c) :** Nil.

**5(2)(d) :** Activities such as safeguarding of seizures, boundary demarcation, protection of forests through Base camps, Strike Force parties are proposed. Further, proposed procurement of new vehicles (12) No. and spill over procurement of vehicles (20) No

**5(2)(e) :** Nil

**5(2)(f) :** Creation of 1208.50 Kms of fire lines, maintenance of existing fire lines, organization of awareness campaigns, firefighting operations and firefighting equipment are proposed.

**5(2)(g) :** SMC works like Check dams-23 Nos, Rock filled dams-22 Nos, Continuous contour trenches-44110 Rmt, MPT/PTs-133 Nos, etc., are proposed.

**5(2)(h) :** Nil.

**5(2)(i) :** Activities such as habitat improvement, water resource management, anti-poaching activities, man-animal conflict in protected areas as per the approved Wildlife Management Plans are proposed.

**5(2)(j) :** An amount of Rs.24.00 lakh is proposed for rejuvenation of 50.00 ha. Bamboo plantation in wildlife corridor in Parvathipuram Manyam division of Visakhapatnam Circle.

**5(2)(k) :** An amount of Rs.406.20 lakh is proposed for activities such as Animal Rescue operations, and Veterinary Treatment facilities for wild animals.

**5(2)(l) :** Nil.

**5(2)(m) :** An amount of Rs.123.00 lakh is proposed for various interventions pertaining to conservation and management of biological diversity and biological resource.

**(ii) Sub-components proposed under Rule 5(3) of CAF Rules, 2018****(Rs. in crore)**

| <b>S. No.</b> | <b>Rule</b> | <b>Sub-components</b>                                                                                                                                                                                                                                                                                   | <b>Amount proposed</b> |
|---------------|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| 1             | 5 (3) (a)   | Establishment, up-gradation and maintenance of modern nurseries and other planting stock production facilities for production of quality planting materials                                                                                                                                             | 1.71                   |
| 2             | 5 (3) (b)   | Promoting conservation, sustainable use and documentation of biological diversity including preservation of habitats, conservation of land and folk varieties and cultivars, domesticated stocks and breeds of animals and microorganisms and chronicling of knowledge relating to biological diversity | 0.23                   |
| 3             | 5 (3) (c)   | Purchase and maintenance of equipment/ devices used for communication and information technology for the purpose of protection of forest and wildlife                                                                                                                                                   | 3.40                   |
| 4             | 5 (3) (d)   | Construction, up-gradation and maintenance of inspection paths, forest roads in forest area, firelines, watch towers, check posts and timber depots                                                                                                                                                     | 1.45                   |
| 5             | 5 (3) (e)   | Construction of residential and official buildings in forests for front line staffs deployed for protection of forest and wildlife                                                                                                                                                                      | 3.92                   |
| 6             | 5 (3) (f)   | Casual engagement of local people or labours to assist regular staff of State Forest Department for works for protection of forest and wildlife undertaken from State Fund                                                                                                                              | 3.93                   |
| 7             | 5 (3) (g)   | Survey and mapping of forest areas for forest fire control, compensatory afforestation works, soil and moisture conservation, catchment area treatment and wildlife management for preparing annual plans to be executed from the State Fund                                                            | 1.19                   |
| 8             | 5 (3) (h)   | Independent concurrent monitoring and evaluation and third party monitoring of various works undertaken from State Fund                                                                                                                                                                                 | 6.01                   |

**Decision: The status of implementation of the APO, 2024-25 was apprised to the Steering Committee.**

### **Agenda 3**

#### **Appraisal of Audit of Expenditure for the year 2021-22**

The certification of Audit of A.P. State CAMPA account has been received from the Accountant General up to FY 2019-20.

Audit report for the year 2020-21 was submitted to Prl.AG, AP for certification of audit.

The Consolidated annual financial statement for the year 2021-22 was completed by the 3<sup>rd</sup> Party (Chartered Accountant) and same is placed before the Steering Committee for approval and onward submission to the Prl. Accountant General, Andhra Pradesh through Government of Andhra Pradesh.

**Decision: The Steering Committee has approved the Annual financial statements for the year 2021-22 completed by the 3<sup>rd</sup> party (Chartered Accountant).**

### **Agenda 4**

#### **Procurement of Multi Utility Vehicles during 2024-25**

e-files with **Computer.No.2608557** on 05.11.2024 and **C.No.2663803** on 20.12.2024 were circulated to Government to issue necessary instructions to the Pay and Accounts Officers that not to put any objection for procurement of Multi Utility Vehicles under CAMPA which will be used for strengthening of Forest Protection, as the proposed vehicles were already approved by the Steering Committee of Andhra Pradesh State CAMPA Chaired by the Chief Secretary of

Government of Andhra Pradesh and Executive Committee of National CAMPA, MoEF&CC, GoI.

Further, vide PCCF's **Rc.No.9666/2023/CAMPA-1, dt:23.12.2024**, a letter was addressed to the Director, Works and Accounts with a request to issue necessary instructions to the PAOs in the state to allow the bills pertaining to procurement of vehicles under (6) Heads of Accounts, as approved in CAMPA APO 2024-25, otherwise, the State will be deprived of this facility provided by the Government of India.

The Director of Works and Accounts has submitted a report stating that, **the orders of the Finance Department are not received in respect of procurement of Vehicles under the approved APO 2024-25** and requested to address the Finance Department for such orders and communicate the same to them for taking further action.

**Decision: The Finance Department is requested to issue the favourable orders in this regard, as there is no financial implications on the State and it is as per the CAF Act / Rules.**

The 23<sup>rd</sup> Steering Committee meeting of A.P. State CAMPA ended with vote of thanks to the Chair and all the members of the Steering Committee.

(Sri K.Vijayanand, IAS.,)  
Chief Secretary to Government,  
Andhra Pradesh Secretariat, Velgapudi.

(Sri Chiranjiv Choudhary, IFS.,)

This area falls in the rain shadow zone of the peninsular India. The District is having the second lowest rain fall in the country.                                                                                                                                                                                                                                                                                                                                                                  |
| Ananthapuram                                                      | Chittoor             | The Southern Tropical Dry mixed Deciduous Type (5A / C3)<br>The Southern Tropical Thorn Type (6A /C1) | In this division the trees do not generally attain to any great size, being dwarfed by a variety of unfavorable factors, the chief of which is scanty rain fall and continuous drought. Apart from the size of trees, a large majority of the species occurring in the forests are intrinsically of no commercial value except as firewood. These forests were degraded to varying degrees through biotic influences over 2-3 decades.                                                                                                                                                    |

| Kurnool            | Kurnool              | <p>The classification the forests of the Division as per H.G. Champion &amp; S.K. Seth is as follows:</p> <p>1) Southern Tropical Dry Deciduous Forests (5A/C3 &amp; E4)<br/> 2) Southern Tropical Thorn Forests (6A/C1/DS1 &amp; DS2)</p> | <p>The forests of the Division fall under Tropical Dry Deciduous and Tropical Thorn Forest types</p> <p>The total geographical area of Kurnool Forest Division is 12,904 Sq. KMs. (AP State Forest Report 2012) and the Forest Area is 1,22,134.28 Ha. and the Forest cover 9.46% of the total geographical area of the Division. The area falls in Andhra Pradesh Agro-climatic Zone No.VI. Through excellent drainage, the area is drained in to Tungabhadra river through rivulets like "Hundri" a tributary to Tungabhadra River and other numerous small rivers.</p> <p>The climate of this Division is inland tropical monsoonic type with three distinct seasons. The temperature in the Division ranges from 15°C to 45°C and the average annual rainfall in the Division is about 523.24mm.</p> <p>The Rock formation consists of shales, Limestone and Quartzite. The important minerals and rocks found in the Division are – Limestone, Iron, Red and Yellow ochre's, Barities, Diamond, Black and Pink Granite. The soil types found mainly are Black cotton, Red and Saline.</p> |

| Kurnool            | YSR (T)              | 1) Southern Tropical Dry Deciduous (5A/C3&2/E4)<br>2) Southern Tropical Thorn Forest Types (6A/C1/DS1&DS2)<br>3) SOUTH INDIAN DRY MIXED DECIDUOUS FOREST TYPE (II 5-A / C-3) | <p>This type of forest is specially confined to the drier areas and according to Mr. H.G. Champion, they are mainly distributed in Kadapa and Kurnool districts. This type is usually present in the interior portion of Seshachalams, Palakondas, Lankamalais, Valigondas, and Nallamalai Hills.</p> <p>There are two well pronounced storeys or tiers noticeable in this forest type. The upper storey consists of mostly dense crop. The species are deciduous and leafless for several months in the year. These often tend to become moist deciduous forests. But such species are very few. The species that are commonly met with are: Velama, (Anogeissus latifolia) Yegi (Hardwickia binata), Nalla maddi (Terminalia tomentosa) Yegi (Pterocarpus marsupium) Billudu (Chloroxylon swietenia) Pachari (Dalbergia paniculata) Chigara (Albizia amara), Anduga (Boswellia serrata), Dolichandrone Crispa and Sapindus emarginatus. Under storey consists of Grewia orbiculata, Gardenia gummifera, Zizyphus xylopyrus, Randia dumetorum, Acacia latronum, Dichrostachys cinerea, Eagle marmelos, Ixora parviflora and Gymnosporia montana, climbers like Cuscuta, Bauhinia, Zizyphus oenoplea, Maba buxifolia, Helicteres isora species are of common occurrence. Bamboos are generally absent and occur only in patches, in veligondas, Seshachalams, Palakonda, Lankamalais and Nallamalais which are poor quality of Dendrocalamus strictus. Grasses like Nendra, Khasi, and Bodha exists in open patches.</p> <p>Under storey consists of Grewia hirsuta, Gardenia gummifera, Zizyphus xylopyrus, Randia dumetorum, Acacia latronum, Dichrostachys cineria, Aegle marmelos, Ixora parviflora and Gymnosporia montana, Climbers like Bauhinia, Zizyphus oenoplea, species are of common occurrence. Bamboos (Dendrocalamus strictus) are generally absent and occur only in patches, in Palakonda which are of poor quality.</p> <p>Kadapa District is the natural home of Red Sanders (Pterocarpus santalinus) which is endemic to Andhra Pradesh and Tamilnadu. Red sanders occurs on the slopes of Lankamalai, Palakonda hills and Idupulapaya Reserve Forests in Sidhout, Kadapa, Rayachoty, Vempalli and Vontimitta Ranges at an elevation between 152.4 m and 914.4m, where the annual rainfall ranges between 81.28 cm and 101.6 cm. . Its natural regeneration is poor due to excessive biotic factors. The trees attain height of 10 Mtrs. and girth of 90 cms. under favourable conditions. The approximate area under this type is 30,000 ha.</p> |
| Rajahmundry        | Kakinada             | Dry mixed deciduous forests (southern dry mixed deciduous forests 5A/C3)                                                                                                     | <p>This is the main type of vegetation covering about 60-70% of the Forests in the District. This is a climax type with closed upper canopy, though uneven in density and it is formed of tall deciduous species reaching upto 20 mt with the even rainfall of about 100-120 cm along the undulating area with altitude ranging from 200-1000 mt. The range of species are comparatively less than of the moist deciduous pockets, though in some areas selected species are predominant, forming more or less pure associations which are normally due to soil variation or topography.</p> <p>Dry deciduous Forests comprise a variety of trees, shrubs, climbers, herbs, epiphytes and parasites. The species of Xylia, Terminalia, Anogeissus, Adina, Dendrocalamus association predominates in various Forest regions of the upper area. The top canopy is usually composed of Xylia xylocarpa, Terminalia alata, Anogeissus latifolia, Adina cardifolia, Pterocarpus marsupium, Lagerstroemia parviflora, Mitragyna parviflora while Cleistanthus collinus, Holarrhena pubescens, Leea India, Tarenna asiatica, Pavetta indica, Helicteres isora are some of the dominant species in the second storey.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Rajahmundry        | Kakinada             | Thorny-scrub forest (southern thorny scrub forest, 6A/DS1)                   | <p>Thorny-scrub type of vegetation is represented by degraded Forests, which are fairly common in Sudikonda, part of Yeleswaram, Gokavaram and Tuni of Kakinada Range. In such low Forests, thorny and usually hard-wooded species predominate with tree height of 6-10 m., producing short boles and low branching canopy. Such Forest areas which are not of climax type in a predominantly dry deciduous Forest zone of Eastern Ghats, are formed due to denudation of the original dry deciduous Forests and with the subsequent maltreatment of the area by constant biotic interference when the formation of impenetrable thorny thickets hardly 4-6mt. high predominate.</p> <p>The common trees in those areas are <i>Acacia leucophloea</i>, <i>A.chundra</i>, <i>Diospyros melanoxylon</i>, <i>D.chloroxylon</i>, <i>Canthium dicoccum</i>, <i>Stereulia urens</i>, <i>S.villosa</i>, <i>Strychnos nuxvomia</i>, <i>S.patatorum</i>, <i>Cassia fistula</i>, <i>Zizyphus mauritiana</i>, <i>Z.xylopyra</i>, <i>Wrightia tinotora</i>, <i>Manilkara hexandra</i>, <i>Erythroxyton monogynum</i>, <i>Ixora arborea</i> etc.,</p> |
| Rajahmundry        | Kakinada             | Hill-to flora (Dry Savannah forest, 5A/DS2)                                  | <p>The open grasslands with sparse, stunted tree and shrub growth exclusively on the hill tops above + 1000 mt. altitude along the Eastern Ghats is an interesting vegetation type due to its specific and unusual characteristic, though it positively forms the part of the dry deciduous Forests, but it is a climatic climax type of vegetation of the eastern ghats. It is very evident that the usual and typical formation of the dry deciduous Forests is lost usually after about 1000 mt. and stand out clearly as an open bald hill-top with trees growing far apart or in small groups and extremely stunted along with heavy grass mixed with the characteristic bushy Phoenix and stout woody root-stocks.</p> <p>The common stunted tree species seen here are <i>Terminalia chebula</i>, <i>Phyllanthus emblica</i>, <i>Diospyros melanoxylon</i>, <i>Pterocarpus marsupium</i>, <i>Gardenia latifolia</i>, <i>Phoenix loureirii</i> (predominantly distributed all along the barren hill).</p>                                                                                                                          |
| Rajahmundry        | Kakinada             | Mangrove forests (Swamp forest-mangrove scrub, 4B/TS1)                       | <p>Compared to the tropical terrestrial Forests, the degree of species diversity is very small which is due to extreme physical conditions in the littoral area due to changes in salinity, loose muddy terrain, currents, sea waves etc., which require special physiological and morphological adaptation. Mangroves do not form a homogenous taxonomic group and they are to be viewed as an ecological convergence of various groups.</p> <p><i>Excoecaria agallocha</i> (Tilla), <i>Lumnitzera racemosa</i> (Thandugu), <i>Aegiceras corniculatum</i> (Guggilam), <i>Avicennia officinalis</i> (Nallamada), <i>Rhizophora mucronata</i> (Uppu-ponna).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Rajahmundry        | RCVaram              | Moist Mixed Deciduous Forest (Southern moist mixed deciduous forests, 3B/C2) | <p>The moist mixed deciduous forest occurs in localized patches along moist valleys and along the interior parts of perennial streams and sometimes at a fairly high altitude (500-1000 mt.) where the soil is very moist with high humidity content and with rainfall more than 120 cm.</p> <p>Along the northern part of the district, such forests are seen in Sesharayi, Nulakamaddi and Daravada near Dummukonda of Addateegala Range, Valamuru, Bodhuluru, Satlawada, Bodalanka, Elivada, Egavalasa of Maredumilli and RC Varam Range and Vathangi of Rajavommangi Range.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Name of the Circle | Name of the Division | Classification type of Forests                                           | Brief description of Forests and Forestry Sector                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Rajahmundry        | RCVaram              | Hill-to flora (Dry Savannah forest, 5A/DS2)                              | <p>The open grasslands with sparse, stunted tree and shrub growth exclusively on the hill tops above + 1000 mt. altitude along the Eastern Ghats is an interesting vegetation type due to its specific and unusual characteristic, though it positively forms the part of the dry deciduous Forests, but it is a climatic climax type of vegetation of the eastern ghats. It is very evident that the usual and typical formation of the dry deciduous Forests is lost usually after about 1000 mt. and stand out clearly as an open bald hill-top with trees growing far apart or in small groups and extremely stunted along with heavy grass mixed with the characteristic bushy Phoenix and stout woody root-stocks.</p> <p>The common stunted tree species seen here are Terminalia chebula, Phyllanthus emblica, Diospyros melanoxylon, Pterocarpus marsupium, Gardenia latifolia, Phoenix loureirii (predominantly distributed all along the barren hill).</p>                                                                                                                                                                                                                                             |

| Rajahmundry        | Chintoor             | The main types of Forest found in the division with local variations are as follows:-<br>1) Dry mixed Teak forests<br>2) Southern dry mixed deciduous Forests<br>3) Southern moist mixed deciduous Forests | 1.The entire forest area of this division is rich with mixed deciduous Forests predominated by species like Xyliaxycarpa, Terminalia species, Tectonagrandis, Madhucaindiaca, Bamboo Species.<br>2. The Division is having porous border with Telangana, Odisha&Chattisgarh states.<br>3.The entire tract is studded with tribal habitations who primarily dependent on collection of NTFP like Mahua, Tamarind, Hill broom, Honey, etc.<br>4. 2527 Ha., of forest is diverted for Polavaram multipurpose project from this division.<br>5. Beedileaf collection by department provides employment to the local people.<br>6. 25388.39 Ha. area of Papikonda National Park falls under this division |
| Rajahmundry        | Eluru                | SOUTHERN SECONDARY MOIST MIXED DECIDUOUS                                                                                                                                                                   | This type of forest is confined to small areas in Papikonda hills and hill slopes in West Godavari District. It is composition of high forests, the height of which ranges from 20 to 25m with closed canopy and with fairly straight boles. The forest remains deciduous for a short period during the end of May and puts on new leaf with the onset of monsoon. The top canopy consists of deciduous species, underwood is semi evergreen and ground flora is evergreen. Although limited in extent, these forests with luxuriant growth bear most valuable timber yielding trees in this division.                                                                                               |
| Rajahmundry        | Eluru                | SOUTHERN TROPICAL SECONDARY DRY DECIDUOUS                                                                                                                                                                  | This type occurs in the other forest blocks in the agency in West Godavari District. The forests range from 10 to 20 m. in height and remain completely deciduous or leafless during hot season when the trees are found flowering. Composition of a large number of species render the forests uneven in canopy.                                                                                                                                                                                                                                                                                                                                                                                    |
| Rajahmundry        | Eluru                |                                                                                                                                                                                                            | They are generally open with density ranging from 0.3 to 0.4. It is inferior to the moist deciduous forests described above. The undergrowth is light consisting of grasses, thorny bushes and few climbers. Over well developed soils. The canopy is more or less closed bearing timber species.                                                                                                                                                                                                                                                                                                                                                                                                    |
| Rajahmundry        | Eluru                | DRY DECIDUOUS SCRUB FORESTS:(5A/DS1)                                                                                                                                                                       | This type is most common in upland hills of the Division. They are degraded forests and owe their condition to maltreatment, usually directly or indirectly connected with felling, lopping, grazing and frequent fires. The average height is about 6 to 8 m                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Rajahmundry        | Eluru                | SOUTHERN THORN FOREST: (6A/C1)                                                                                                                                                                             | These are degraded forests subjected to heavy grazing and excessive biotic interference. They are found along badly eroded hills and hill slopes. Growth consists of thorny bushes ranging form 3 to 6 m. in height.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Rajahmundry        | Eluru                | TROPICAL DRY EVERGREEN SCRUB FORESTS                                                                                                                                                                       | This is a degraded forest type consisting of thorny scrub growth with height ranging from 3 to 5 m. These forests are found extensively where the soil is deep, sandy loam with pure sand on the top, with little moisture retention capacity. The water table is generally low, and under long periods of drought conditions, the vegetation grows into evergreen scrub type.                                                                                                                                                                                                                                                                                                                       |
| Rajahmundry        | Eluru                | SOUTHERN MOIST DECIDUOUS FORESTS                                                                                                                                                                           | This type is mainly found in pockets in Parentapally and Katkur blocks.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Rajahmundry        | NTR Division,<br>Vijayawada.       | DRY DECIDUOUS SCRUB FOREST (5a /dsi)                                                                                   | These are degraded forests and owe their condition to maltreatment, usually directly or indirectly connected with felling, loping, grazing and frequent fires. The average height is about 4 to 8 mtrs. These forests occur in Kothuru, Adavinekkalam, Kondapalli, G. Konduru, A Kondru, Karenipadu, Bathulavarigudem, Annavaram, Annaraopeta and Dasullapalem. Most of the blocks were under panchayat and Estate administration in the past.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                    |                                    | SOUTHERN THORN FOREST (6A/C1)                                                                                          | These are degraded forests subjected to heavy grazing and excessive biotic interference. They are found along badly eroded hills and hill slopes. The vegetation is open and the growth consists of thorny bushes ranging from 3 to 6m in height. This type of forests occurs in Dasullapalem, Koturu, Adavinekkalam, Ramanakkapeta, Kakarla, Narasapuram, Arugolanupeta, Thummagudem, Somavaram, Katrenipadu, T. Gannavaram, Bathulavrigudem, Jangalapalli, ;Mallela, Cheemalapdu, Budawada, Jaggaiahpetta, Gandrai. These are also generally seen over smaller or larger extent in the rest of the hill and plain forest in the District.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                    |                                    | TROPICAL EVER GREEN SCRUB FOREST(7C1/DS1)                                                                              | This is a degraded forest type consisting of thorny scrub growth with height ranging from 2 to 5m. This type of forest is existed in some of the important blocks of Kothuru, Lopudi, Jangalapalli, Chandragudem etc. These forests are scattered in small or bigger patches all over the upland plains and are more or less islands surrounded by agricultural fields. Due to their close proximity to human habitation and agricultural fields, they are subjected to over exploitation and over grazing. Almost all of them are poorly stocked and stunted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                    |                                    | TIDAL SWAMP MANGROVE FORESTS(4B/TS2)                                                                                   | This type of forest is found in swampy saline areas near Krishna River mouths in Krishna district ie., Nachugunta, Sorlagondi, Yelichetladibba etc. The soils are compact, saline and swampy and are inhospitable for any inland species to come up. Most of the vegetation is confined to the areas on either side of the banks of the creeks. The growth is very poor and the height of the forests normally does not exceed 2m and in most of the areas it is less than 1m in height. They are locally known as Mada Forests. The foliage is markedly xerophyllous.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Rajahmundry        | Krishna Division,<br>Machilipatnam | 1) 5A/DS1 : Dry deciduous scrub Forest<br>2) 6A/C1 : Southern thorn Forests<br>3) 4B/TS2 : Tidal swamp mangrove forest | <p>Forest Composition and distribution of 3 main classes based on the canopy (Scrub Forest, Open Forest and Mangroves). The following Forests types are found in Krishna Forest Division.</p> <p>1) 5A/DS1 : Dry deciduous scrub Forest :- This type of Forest is most common in up land hills of Krishna District, there are mostly degraded Forests and owe their condition to maltreatment, usually directly or indirectly connected with felling, looping, grazing and frequent fires. These Forest areas occurs in Pothuraju gattu, Katrenipadu Forest Blocks of Metlapalli Forest Beat. The species commonly found are Acacia sundra, Chloroxylon swietenia, Albizia amara, Azadirachta indica, Zizyphus oenoplia.</p> <p>2) 6A/C1 : Southern thorn Forests :- Forest areas occurs in Nuthalagattu, Suravaram Forest Blocks of Metlapalli Forest Beat. The species commonly found are Zizyphus xylopyrus, Cassia pistula, Carissa spinarum etc.</p> <p>3) 4B/TS2 : Tidal swamp mangrove forest :- This is type of Forest is found in swampy saline areas near Krishna river mouth &amp; along the coastal line in Krishna District. The soils are compact, saline and swampy and are inhospitable for any inland species to come up. Most of the vegetation is confined to the areas on either side of the banks of the creeks. The growth is poor and the height of Forest normal does not exceed 2 m and in most of the areas it is less than meter and height. They are locally known as Mada Forests. The foliage is markedly xerophyllous. These areas commonly occur in Bandar port RF and Bandar port extension. I to IV blocks and also along the coastal line in private/Government land. Species composition are Excoecaria agallocha, Avicennia officinalis &amp; Rhizophora mucronata.</p> |

| Name of the Circle                             | Name of the Division   | Classification type of Forests                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Brief description of Forests and Forestry Sector                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |                        |                      |                     |                                       |          |          |          |                                                |          |          |          |        |          |         |          |        |          |          |          |

| Tirupati                                       | Tirupati               | <p>The forests of this division can be classified into the following types:</p> <p>A. TROPICAL DRY DECIDUOUS FORESTS:- a) TROPICAL DRY DECIDUOUS FORESTS:-</p> <ol style="list-style-type: none"> <li>1. Dry Red Sanders bearing Forests.</li> <li>2. Southern dry Mixed deciduous Forests.</li> </ol> <p>b) DEGRADATION STAGES OF TROPICAL DRY DECIDUOUS FORESTS:-</p> <ol style="list-style-type: none"> <li>1. Dry Deciduous scrubs</li> <li>2. Dry Savannah Forests</li> <li>3. Dry grass land.</li> </ol> <p>c) GENERAL EDAPHIC TYPES OF DRY DECIDUOUS FORESTS:-</p> <ol style="list-style-type: none"> <li>1. Hardwickia Forests</li> <li>2. Laterite thorn Forests</li> <li>3. Dry bamboo brakes</li> </ol> <p>B. TROPICAL THORN FORESTS:-</p> <ol style="list-style-type: none"> <li>1. Southern thorn Forests.</li> <li>2. Southern thorn scrub.</li> </ol> <p>C. TROPICAL DRY EVERGREEN FORESTS:-</p> <ol style="list-style-type: none"> <li>1. Tropical dry evergreen scrub. The forest types found in the sanctuary are as follows as per Mr. H.G. Champion and Seth classification.</li> </ol> <ol style="list-style-type: none"> <li>5. A. Southern tropical dry deciduous forest</li> <li>C2. Dry Red sanders bearing forests</li> <li>C3. Southern dry mixed deciduous forests</li> </ol> | <p>The forest of this division, extends over a large area with elevations ranging from 244 to 1514m above MSL. The forests vary from dry mixed deciduous to thorny scrub, with occasional patches of dry evergreen growth. This is probably due to their major disposition on two distinct soil types. one is the distinct soil type that has resulted from the archaean- gneissic formation, restricted to Seshachalam hill range and the other, Cuddapah geological formation that exists in the division towards nagri and extends eastwards through the entire width of the division. The Wildlife Management Division was formed during 1991 covering the areas S.V. National Park. The Forest area of S.V. Sanctuary is surrounding Tirumala village and is extending in Chittoor and Kadapa districts over an extent of 525.95 Sq. Kms was initially notified during 1985. The core area of the S.V. Sanctuary over an extent of 353.63 Sq. Kms was declared as S.V. National Park during 1989.</p> <p>The present distribution of forest area of Wildlife Management division, Tirupati is as follows.</p> <table> <tr> <td></td><td>Chittoor (Area in Ha.)</td><td>Kadapa (Area in Ha.)</td><td>Total (Area in Ha.)</td></tr> <tr> <td>Sri Venkateshwara Wildlife Sanctuary:</td><td>28431.00</td><td>24166.00</td><td>52597.00</td></tr> <tr> <td>Sri Venkateshwara National Park (Part of SVS):</td><td>12093.00</td><td>23270.00</td><td>35363.00</td></tr> <tr> <td>Buffer</td><td>24254.57</td><td>4476.91</td><td>28731.48</td></tr> <tr> <td>Total:</td><td>52685.57</td><td>28642.91</td><td>81328.48</td></tr> </table> <p>SESHACHALAM BIOSPHERE RESERVE:-</p> <p>This is first ever Biosphere reserve in Andhra Pradesh notified on 20.09.2010. The total area of Biosphere Reserve is 4755.997 Km<sup>2</sup> (475599.7 Ha) encompassing parts of districts of Chittoor and Kadapa of Andhra Pradesh in Deccan Peninsula – Deccan South bio-geographic province (6E). The area covered in the three interrelated zones known as Core Zone, Buffer Zone and Transition zone of this biosphere reserve are as mentioned below.</p> <p>This reserve has received intensive protection and habitat development right from the day it was brought to the control of Wildlife Management Division. With tranquillity, protection and availability of fodder and water over the entire reserve, there is a steady rise in the animal population and a concomitant wide range of dispersal of animals, assuring more efficacious use of habitat. There has been a significant improvement in the overall flora and faunal diversity in the reserve. The population of Panther has increased to 32 as per the latest census report.</p> <p>The management efforts so far were to protect the bio-diversity with least attention to the problems of bio-mass dependencies of the surrounding villages. The great lesson learnt during the last one decade of management of the Sanctuary is the realization of an urgent need to restore the productivity of the depleted multiple use surround of the reserve through ecological development. The reserve needs encouraging guidelines for regulating tourism, emphasis on this management of buffer areas, integration of local population through eco-development program and establishment of nature interpretation centers</p> |  | Chittoor (Area in Ha.) | Kadapa (Area in Ha.) | Total (Area in Ha.) | Sri Venkateshwara Wildlife Sanctuary: | 28431.00 | 24166.00 | 52597.00 | Sri Venkateshwara National Park (Part of SVS): | 12093.00 | 23270.00 | 35363.00 | Buffer | 24254.57 | 4476.91 | 28731.48 | Total: | 52685.57 | 28642.91 | 81328.48 |

| Tirupati           | Annammayya           | Southern Tropical Dry Deciduous and Southern Tropical Thorn Forest Types”<br>1. Tropical Dry Deciduous Forests<br>(a) Group –II5A) Southern, Tropical Dry Deciduous Forests<br>(i) 115AC3. South India Dry Mixed Deciduous Forests;<br>(ii) 115AC Dry Red Sanders Bearing Forests; and<br>(iii) IIE4.Hardwickia binate Forests<br>(b) (Group –II6A) Southern Tropical thorn Forest type.<br>(i) II6AC.1. Southern, thorn Forest | There are three important hill Ranges viz., the Veligondas, the Seshachalams and Palakondas, which are situated in the Division. The important Forests of the Division lie on and along these three hill Ranges. From a narrow gap in the Tirupati hills near Balapalli Village, about 24 Kms. North of Renigunta town, the Veligonda and the Seshachalam hill Ranges diverge to the right and to the left respectively. On the right the Veligonda Range of hills run in a general Northerly direction, in an unbroken chain up to and beyond the Northern limits of the Division from Nellore and Chittoor Districts. On the left the great hill Range of Seshachalam have much denser mass of hills and support a denser and richer type of Forest as compared to Veligondas. The Seshachalam Range of hills runs generally in a North-Westerly direction up to the gap formed by river Cheyyer near Buduguntapalli village. Some highest points on Seshachalam hills are about 1,152 Meters (3,782 Feet) above sea level. From Buduguntapalli village these hills take a turn to the West and run in a Westerly direction under the name of Palakondas, forming almost the Northern limits of this Division. The group of hills found in the region between Mandavya and Cheyyeru Rivers locally called as Yerrakondas, are actually a part of Seshachalam hills range. |
| Tirupati           | Sulluripet           | Southern Tropical Dry Deciduous Forest                                                                                                                                                                                                                                                                                                                                                                                          | The Venadu, Perandu, Irrukum islands of Pulicat Bird Sanctuary are having very significant forest type called as Southern Tropical Dry Evergreen Forest (Champion & Seth 1968).Vegetation representing species are Manilkara hexandra, Albizzia amara, Strychnos nuxvomica and Maba buxifolia. In addition to this, the lake has patchy distribution of mangrove forests on the northern portion, littoral vegetation and cane brakes on Venadu and Irrakam islands and other plants of botanical interest. Mangrove vegetation consists of Excoecaria agallocha, Avicennia officinalis, Acanthus ilicifolius and Aegiceros corniculatum. Littoral vegetation consists of Spinifex littoreus, Ipomea biloba, Phyllanthus rotundifolia, Solanum xanthocarpum. The cane species found here is Calamus viminalis. The exotic Prosopis juliflora has invaded many areas. In the elevated mudflats, succulent halophytes, such as Anthrocnemum indicus, Sesuvium portulacastrum, Salicornia brachiata, Suaeda maritima, Suaeda monoica and Suaeda nudiflora occur.The islands supports rare and endemic species like Garcinia spiciata.                                                                                                                                                                                                                                          |
| Tirupati           | SS, Tirupati         | Southern Tropical Dry Deciduous Forest                                                                                                                                                                                                                                                                                                                                                                                          | State Silviculturist Division is one of the two research divisions working under Research and Development Circle/WLM Circle, Tirupati of A.P. Forest Department. The jurisdiction of the State Silviculturist, Tirupati extends to four districts of Rayalaseema and Nellore District in coastal A.P. The basic mandate of this Division is to conduct research on the forestry related issues in its jurisdiction. A brief description of duties of State Silviculturist, Tirupati is given below and has been drawn from the Functionary Manual Vol. III of A.P. Forest Department.<br><br>1) To conduct research and experiment into problems confronting the forestry practices in the region of the State where his / her office is located.<br>2) To evolve plantation and regeneration techniques of various species.<br>3) To investigate methods for improvement of growing stock.<br>4) To investigate methods for improvement of soil fertility.<br>5) To find suitable species for afforestation of denuded and arid tracts.<br>6) To promote cultivation of medicinal plants.                                                                                                                                                                                                                                                                                  |

| Name of the Circle              | Name of the Division | Classification type of Forests                                                                                                                                                                                                                                                                                                                                       | Brief description of Forests and Forestry Sector                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Project Tiger Circle,<br>Srisailam | Nandyal              | <p>The classification the forests of the Division as per H.G. Champion &amp; S.K. Seth is as follows:</p> <p>1) Southern Dry mixed Deciduous forest type (5A / C3)</p> <p>2) Secondary Dry deciduous forest type (5DSI)</p> | <p>The Rainfall varies from 600 to 1000 mm. shallow, well drained hill sides and undulating grounds are typical in these areas which support good vegetation. Although the forest type is determined by edaphic and climatic factors, the annual recurring fires have a considerable effect on the maintenance of the climatic climax. A fairly closed forest with trees of 13 to 15 meters high and 7t cms to 150 cm girth. The percentage of Teak is very low and sometimes totally absent. Terminalia tomentosa and Anogeissus latifolia are characteristic of this type.</p> <p>The western peripheries of Nandyal Division comprising the extension Reserve forests viz., Nandyal Extension-I, II, Sirvel Extension-I, II, III and Yawadada Reserve forest constitute this secondary dry deciduous forests (5/DSI). Even though the locality factors are favourable for well development of dry deciduous type forest, the biotic factors like felling, coppicing, grazing and frequent fires are the main causes for the scrub type of forests. The surface soil is commonly hard and impervious due to exposure to sun and cattle trampling. The forest type consists of mostly thorny species having a height 6 to 10 meters and 50 cms to 75 cms girth with density ranging from 0.4 to 0.8. The occurrence of multiple coppice shoots from stumps is common feature in this forest type.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Project Tiger Circle,<br>Srisailam | Giddalur             | <p>1) Southern Dry Mixed Deciduous Forest (<b>Type 5A/C3</b>)</p> <p>2) Southern Dry Deciduous Forest (<b>Type 5/DS1</b>)</p>                                                                                               | <p><b>Over head and middle storey consists of:</b> Terminalia tomentosa<br/>Anogeissus latifolia, Mitragyna parviflora, Pterocarpus marsupium<br/>Diospyros melanoxylon, Chloroxylon swietenia, Hardwickia binata<br/>Madhuca indica, Lagerstomia parviflora, Sterculia urens, Cassia fistula<br/>Embica officinalis, Albizzia species and Pterocarpus santalinus etc.</p> <p><b>The lower storey consists of:</b> Randia dumetorium, Grewia damine<br/>Carissa spinarium, Holarrhena antidysentrica and Zizyphus species etc.</p> <p><b>The ground flora consists of,</b> Apluda nutica, Aristidia hystrix<br/>Heteropogon coloratus, Themeda unbergii and Sehima nervosum etc</p> <p><b>Distribution:</b> The main forest areas under this type are in Isukagundam plateau of Gundlakamma Range, Maddipenta locality of Turimella Range, Othimadugu locality of Giddalur Range, Devakamarri locality of Veligonda R.F. of Kanigiri Range.</p> <p><b>Locality Factors:</b> Rainfall varies from 850mm to 1250mm, shallow soils, well drained hill sides or undulating ground are typical.</p> <p><b>The top canopy consists of,</b> Anogeissus latifolia, Cleistanthus Collinus<br/>Terminalia tomentosa, Diospyros melanoxylon, Lannea grandis, Morinda tinctoria, Adina cardifolia, Aegle marmelos, Strychnos potatorum, Dalbergia paniculata, Albizzia odoratissima, Dolichandrone crispa, Bauhinia recemosa, Chloroxylon swietenia, Diospyros chloroxylon, Albizzia amara, Acacia leucophloea, Proteum caudatum, Azadirachta indica, Wrightia tinctoria, Sapindus emarginatus and Pterocarpus santalinus etc</p> <p><b>The next storey consist of,</b> Gymnosporia Montana, Gardenia lucida<br/>Gardenia gummifera, Zizyphus xylopyrus, Acacia sundra, Erythroxylon monoxylum, Randia uliginosa, Ixora parviflora, Cassia fistula and Limonia acidissima etc</p> <p><b>The herbs consists of,</b> Dodonea viscosa, Holarrhena antidysentrica<br/>Carissa spinarum etc.</p> |

|                                    |                            |                                                               | <b>Locality Factors:</b> This is formed as a result of unusual climate conditions. Rainfall is around 700mm to 880mm. Most of it is from retreating North-East monsoon during October- November months                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Visakhapatnam                      | Visakhapatnam              | Southern Tropical Dry Deciduous Forests (5A/C3)               | The upper canopy is uneven and not dense and rather open, forming a mixture of deciduous trees. Most of these trees also occur in moist deciduous forests, and reach satisfactory development there. The height of trees in these dry deciduous forest generally varies from 10m to 15m. The number of species is much less and a few tend to predominate over others in selected areas owing to soil peculiarities or biotic interference. The lower canopy also consists of deciduous species. At a very few places some semi-evergreen shrubs are also present but they are confined to the moist sheltered pockets only. Bamboos are present.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                                    |                            | Southern Tropical Dry Thorny Forests (6A/C1)                  | This type occurs intermixed with tropical dry evergreen forests without clear and distinct line of demarcation between these two types. The tropical thorny forests are characterized by the presence of a larger percentage of thorny species. The soils supporting this type of vegetation are shallow, compact with more percentage of morrum. The height of the crop is between 2 to 5 mts. with a density of less than 0.4.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Visakhapatnam                      | Narsipatnam<br>(Erstwhile) | 2B/2S - Southern Tropical Semi Evergreen Forests              | <p>The forests of Narsipatnam division are situated at elevations from about 130M to 1529 M. The floristic composition of the forests can be broadly classified as an associate formation of mixed deciduous species. The distribution being influenced largely by the altitudinal variation. The existing vegetation is not the outcome of locality factors alone but biotic influences like fire, grazing, podu etc. Almost all the forests in the agency tract, having been subjected to podu in the past are secondary in nature now. This is evident from the middle aged and pole-sized crop of the forest. Jack trees and Tamarind tops are the evidence of past settlement and practice of podu. Further the forests of the division have been exploited in the past solely for the purpose of revenue. Much earlier to systematic management, the villagers were encouraged to under take deforestation and expand agriculture. These two factors coupled with podu cultivation have done considerable damage to the growing stock and composition and condition of the crop. Fires played havoc to the vegetation and regeneration. The effect of illicit fellings had caused much damage to the ecology.</p> <p>The vegetation of Narsipatnam division varies from the scrub jungles, on the plains and foot hills, and improves to timber yielding forests in the hills. higher slopes. and plateaus. and finally leading to grassy blanks</p> |
|                                    |                            | 3B/2S1 - Southern Secondary moist mixed deciduous Forests     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Visakhapatnam      | Narsipatnam<br>(Erstwhile) | 6A/C1 - Southern Thorn Forests                                                                         | <p>improved to almost primary forests in the hilly, higher slopes, and plateaus, and many leading to grassy, barren with scattered and stunted tree species.</p> <p>The higher elevation of Eastern ghat areas from 130 to 1529 m., the average annual rainfall of about 1000 mm. together with the red, red sandy loam soils contribute to the development of reasonably dense forests. The foot hills and plain portions which receive less rainfall support open type of deciduous or thorny scrub forests. However biotic factors, especially, damage by man, determine the type of forests, now, existing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                    |                            | 5D/S2 - Southern Dry Savannah Forests                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Visakhapatnam      | Paderu                     | <p>1) 3B/C2 Southern tropical moist mixed deciduous forests.</p> <p>2) 5/DS2 Dry Savannah Forests.</p> | <p>The Paderu Forest Division spreads over a geographical area of 3,24,900 hectares. Out of which, 1,97,811.20 hectares is under Forest cover, which amounts to about 32.98% of total geographical area. The present Paderu division comprises of forests which are part of Eastern Ghats. Most of the forest areas of this division are degraded due to severe biotic factors with a density less than 0.4. Most of the forest areas of this division are degraded due to severe biotic factors with a density less than 0.4. Some of the forest areas in the interior which are inaccessible and located on the hillocks is with a density of 0.4 to 0.6 like Busiput area in Pedabayalu range which contain reasonably good forests. The areas once with reasonably dense and impenetrable forests have been subjected to un-scientific exploitation and illicit fellings coupled with 'Podu' cultivation in the past which has resulted in their depletion, degeneration and degradation. The increase in population, opening up of the area by railway line added to the problems of degradation. The present condition of the crop is being improved due to formation of Vana Samrakshana Samithies through Joint Forest Management and Community Forest Management programmes implemented under A.P. Forestry Project and other schemes like raising of plantations to stabilize Soil &amp; Moisture Conservation under River Valley Project.</p> |
| Visakhapatnam      | Vizianagaram               | Southern Tropical Moist Deciduous Forests                                                              | Occur in red sandy loam soils of the district where high rain fall of and above 1100 mm. is received. Whereas Northern Tropical Dry Deciduous forests (Sal type) occur in Kurupam and Parvathipuram Ranges in the areas of high rain fall zone of 1000 to 1100 mm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                    |                            | Southern Tropical Mixed Deciduous Forests                                                              | Occur in the blocks containing sandy loam soils located in between the coastal areas and hilly areas of Bobbili, Ramabhadrapuram, Gajapathinagaram and Vizianagaram Mandals etc; where the areas experience medium rain fall of 900 mm. to 1000 mm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                    |                            | Dry Deciduous Scrub forests                                                                            | Occur in lateritic and red sandy loam soils in Andhra and Odisha border over a stretch of 10 to 15 Kms. Here the rain fall received is less than 900 mm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

**Part -1: Brief history and Past performance**

**(f) Brief description and abstract of the monitoring work done by the Monitoring and Evaluation Wing of the State Forest Department.**

CAMPA scheme is being implemented in the state since 2009 and the implementation **of the works is being monitored by the State Forest Department through Forest Management Information System modules (Plantation module, Financial Management module) developed**. All the works executed are geo-tagged, recorded with photographs and all the afforestation works specifically are analyzed and evaluated by the State GIS wing. The works executed are also regularly supervised by the Forest Range Officers/ Divisional Forest Officers/ Circle heads and Senior officers from the Head Office.

**Further all the Polygons of proposed works/patches under CAMPA are uploaded in “ e-green watch portal” for monitoring purpose.**

**The afforestation work done in last (5) years under CAMPA:-**

\* Note: Achievement up to January, 2025.

## **Monitoring mechanism to works executed with CAMPA funds.**

### **1. Field level:**

All the CAMPA works are monitored and evaluated at the different levels of officers in the department from FRO to PCCF level through field monitoring and inspections. Further, flying squad parties and vigilance wings are monitoring and evaluating the works and same is reported to PCCF (HoFF) on monthly basis.

### **2. Use of Technology:**

GPS, GIS and MIS technologies are being used for implementation and monitoring of CAMPA works.

**GPS/DGPS:** It is being used for survey of CA areas, diversion areas, for notification of RF/PF, fire management, Geo-tagging of works, polygons of plantations.

**GIS:** It is being used for Mapping of forest areas for CA works, Catchment Area Treatment, Wildlife management plans, Forest fire prevention works, and SMC works.

**MIS:** Modules for financial management, plantations and nurseries management are being maintained in APFD.

Further, Integrated e-Governance portal (monitoring mechanism developed by the Government of India) – e-Green Watch portal is the tool for monitoring the assets created under CAMPA funds.

### **3. Accounting and auditing:**

All the accounting and auditing of the financial statements are being done yearly by the Accounts officers of the circles, divisions and in the O/o the PCCF (HoFF). Further, the external audit is done by the chartered accountant, verifies the consolidated annual financial statements which are then forwarded to the Accountant General for certification.

### **Financial Monitoring:**

A.G certified the Audit reports for the year 2015-16 and 2019-20.

For the year 2020-21 and 2021-22 consolidated annual financial statements were submitted to the Accountant General, A.P., Vijayawada through Government, certification of audit was awaited.

**Part -1: Brief history and Past performance**

**(g). Brief description and abstract of the monitoring work done by the independent monitor (Third Party Monitoring) in the State.**

All the CAMPA works are monitored and evaluated at the different levels of officers in the department from FRO to PCCF level, as well as flying squad parties and vigilance and same is reported to PCCF (HoFF) on monthly basis. Apart from this GIS and MIS wings in the Forest Department are monitoring the plantations, fire points etc on daily basis with the coordination of FSI.

Third party monitoring by the Institute Of Forest Biodiversity, Hyderabad was done from the year 2009-10 to 2015-16, the agency have given "State Monitoring Report" basing on prescribed methodology to report on average plantation area, Forest vs. plantation cover, survival percentage of the plantation, average number of plant species. Basing on the reports submitted by the agency from 2009-2016 it is concluded that the CAMPA plantations in the state are contributing for maximum green cover. The 3rd party monitoring from 2016-17 to 2018-19 is under progress. The overall assessment for the years 2009-10 to 2015-16 is as follows.

| Sl. no. | Financial year | Overall assessment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 1.      | 2009-10        | CAMPA Plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of the total CAMPA plantations under Compensatory Afforestation (CA) plantations has covered with 53.88% of area with an extent of 542.408 ha and Net Present Value (NPV) has covered with 46.11% of area with an extent of 464.12 ha. The average survival for the year 2009-10 & 2010-11, both CA and NPV plantations have shown better performance of 97.5% and 95% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest division of Rajampet (249.5 ha), Ananthapur (139.948 ha), Kurnool (121.3 ha) and Nellore (114 ha) divisions. Out of 11 forest divisions, CA plantations of the Chittoor West observed to be the best plantations with an average survival of 96.6% and NPV plantations of the Markapur and Nellore observed to be the best plantations with an average survival of 95% and 93.25% respectively in most of the plantation locations. |
| 2.      | 2010-11        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|    |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 3. | 2011-12 | CAMPA plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of total CAMPA plantations under Compensatory Afforestation (CA) Plantations has covered with 51.2% of area with an extent of 1680.02 ha and Net Present Value (NPV) has covered with 48.7% of area with an extent of 1595.1 ha. the average survival of the year 2011-12 both CA and NPV plantations have shown better performance of 96% and 95% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest division of Kakinada (820.34 ha), Nellore (400 ha), Ananthapur (361.3 ha) and Chittoor west (316.58 ha) divisions. Out of 16 forest divisions, CA plantations of the Markapur and Chittoor West observed to be the best plantations with an average survival of 96% and 94% respectively and NPV plantations of the Chittoor West and Ananthapur observed to be the best plantations with an average survival of 95% and 94.6% respectively in most of the plantation locations. |
| 4. | 2012-13 | CAMPA plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of the total CAMPA plantations under Compensatory Afforestation (CA) plantations has covered with 14.15% of area with an extent of 860.64 ha and Net Present Value (NPV) has covered with 85.84% of area with an extent of 5217.38 ha. The average survival for the year 2012-13, both CA and NPV plantations have shown better performance of 94% and 95% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest division of Nellore (810 ha.), Chittoor West (553.39 ha), Chittoor East (511.26 ha) and Ananthapur (464.88) divisions. Out of 19 forest divisions, CA plantations of the Chittoor East observed to be the best plantations with an average survival of 94% and NPV plantations of the Markapur observed to be the best plantations with an average of 95% in most of the plantation locations.                                                                           |
| 5. | 2013-14 | CAMPA plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of the total CAMPA plantations under Compensatory Afforestation (CA) plantations have covered with 16.22% of area with an extent of 817.37 ha and Net Present Value (NPV) has covered with 83.77% of area with an extent of 4219.84 ha. The average survival for the year 2013-14, both CA and NPV plantations have shown better performance of 98% and 95.5% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest divisions of Nellore (935 ha.), Ananthapur (769 ha.), Chittoor East (528.94 ha.) and Eluru (323 ha.) divisions. Out of 17 forest divisions, CA and NPV plantations of the Chittoor West forest plantations were observed to be the best plantations with an average                                                                                                                                                                                                   |

|    |         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|    |         | survival of 92% and 91.25% respectively during the year 2013-14 in most of the plantation locations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 6. | 2014-15 | CAMPA plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of the total CAMPA plantations under Compensatory Afforestation (CA) plantations have covered with 37.25% of area with an extent of 1290.14 ha and Net Present Value (NPV) has covered with 68.74% of area with an extent of 28.37.48 ha. The average survival for the year 2014-15, both CA and NPV plantations have shown better performance of 90.65% and 88.97% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest division of Nellore (892.38 ha), Ananthapur (536.64), Giddalur (280 ha) and Kurnool (268.6 ha) divisions. Out of 19 forest divisions, CA and NPV plantations of the Chittoor West forest plantations were observed to be the best plantations with an average survival of 98.5% and 97.8% respectively during the year 2014-15 in most of the plantation locations.                                                                                   |
| 7  | 2015-16 | CAMPA plantations played a significant role in achieving the goal of afforestation of the degraded and open forests or vacant land to increase the forest cover in Andhra Pradesh State. Out of the total CAMPA plantations under Compensatory Afforestation (CA) plantations has covered with 25.47% of area with an extent of 1038.354 ha and Net Present value (NPV) has covered with 74.5% of area with an extent of 3037.24 ha. The average survival for the year 2015-16, both CA and NPV plantations have shown better performance of 89.07% and 88.9% respectively in most of the locations. The maximum green cover had contributed by the plantations of the forest division of Nellore (700 ha), Ananthapur (467.054 ha +13 km), Chittoor East (415 ha) and Chittoor West (400 ha) divisions. Out of 18 forest divisions, CA plantations of the Chittoor East observed to be the best plantations with an average survival of 95.2% and NPV plantations of the Ananthapur and Chittoor west observed to be the best plantations with an average survival of 96.5% and 95% respectively in most of the plantation locations. |
