

Presentation for

“ Third Party Evaluation of Works done under Madhya Pradesh Compensatory Afforestation Fund Management and Planning Authority (State CAMPA) State Authority”

**Gwalior, Shivpuri and Chhatarpur Circle
(2015-16 to 2019-20)**

Presented to:

**CEO (CAMPA), Madhya Pradesh Forest Department,
Satpuda Bhavan, Bhopal- (Madhya Pradesh)**

Evaluated by:

SARDA Bhawan, Chottki Muram, Ramgarh Cantt. , District: Ramgarh (JH) Pin: 829122

Contact Number: 09431146129 , 9471565011

Email ID: sardagroup01@yahoo.com, sardagroups@rediffmail.com

Website: www.sardaindia.org

EVALUATOR PROFILE

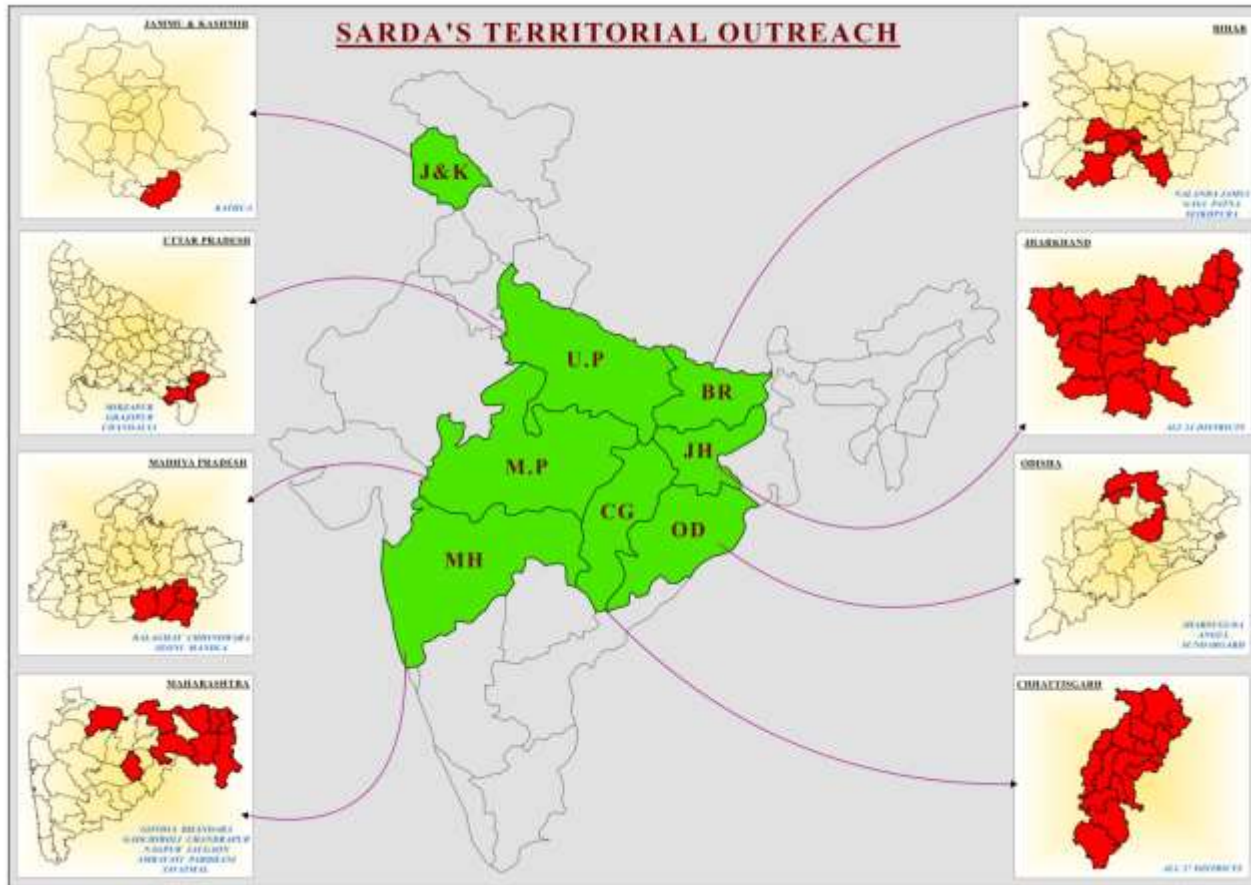

Legal Status : Registered under Society Reg. Act.XXI, 1860
Registration No. : 35/2002-03 Dated 28/02/2003 (Ranchi, JH)
FCRA Registration Number : 337750085
Year of Establishment : 2001
ISO : **9001:2015: IS/2107SC/3233**

Statutory Document's Details:

1. PAN Number : AADTS1984N dated 28/02/2003
2. 12A&12AA Registration Number : CIT/HZB/Tech/12A-30/2004-05
3. Exemption u/s 80G Registration Number: CIT/HZB/Tech/80G-07/2008-09
4. TAN Number : RCHS02406F
5. GST Number : 20AADTS1984N1Z6

6. Work Order No. : Letter No./CAMPA/312-III/2110 dated 05.08.2021

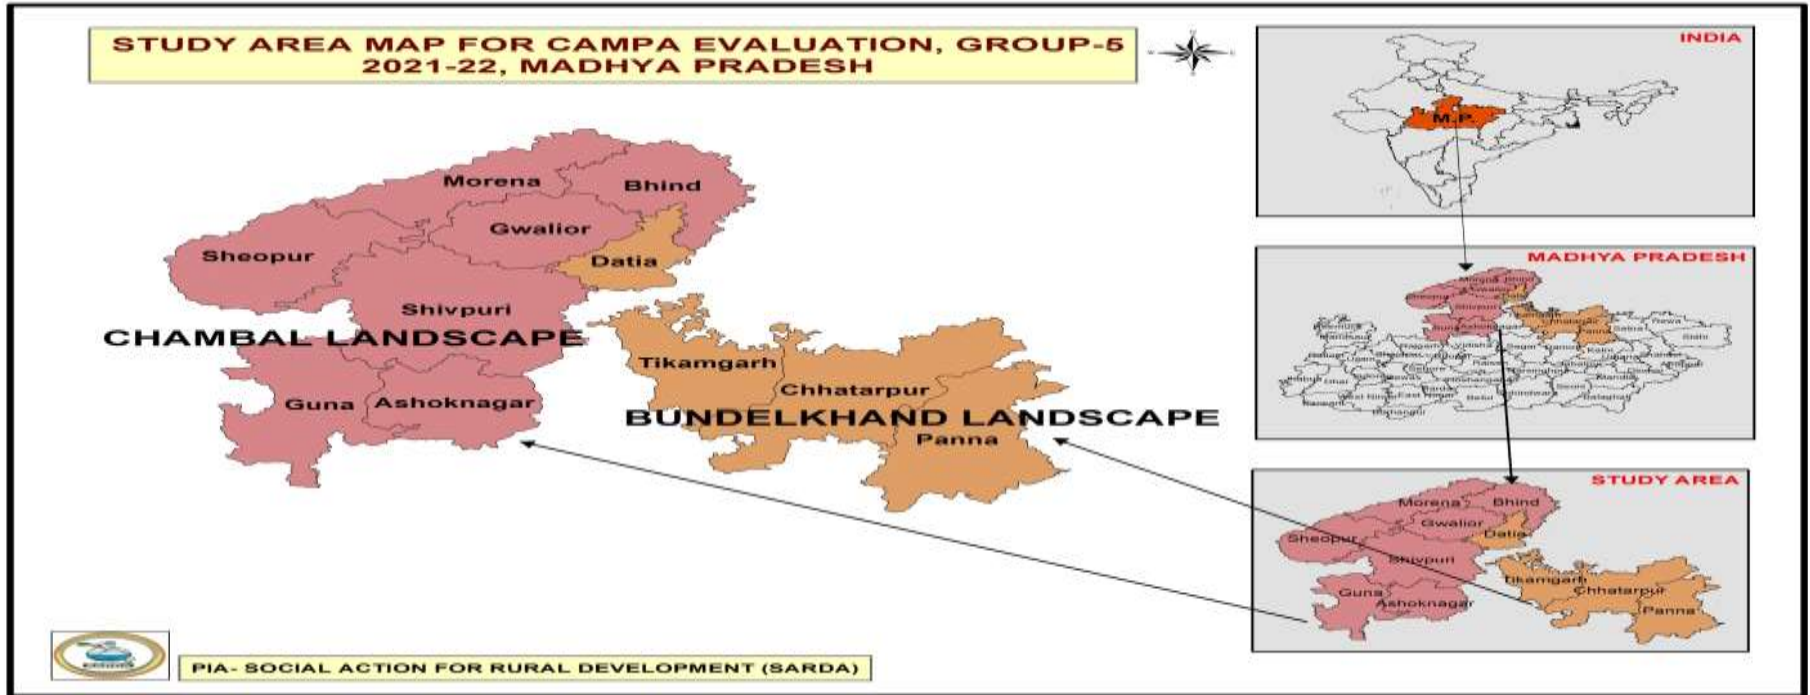

EVALUATOR AREAS OF OPERATION

1. **REGISTERED OFFICE: (Head and Regional Office for Jharkhand)**
Sarda Bhawan, Chotkimuram, Ramgarh Cantt, District Ramgarh. Jharkhand- 829122
2. **SARDA has its Regional / State office For Bihar , Uttar Pradesh , MP, Maharashtra, Jammu& Kashmir, Odisha & Chhattisgarh.**
3. **SARDA has currently more than 40 operational project offices spread across 8 states in India.**

GROUP-5 CLUSTER - STUDY AREA

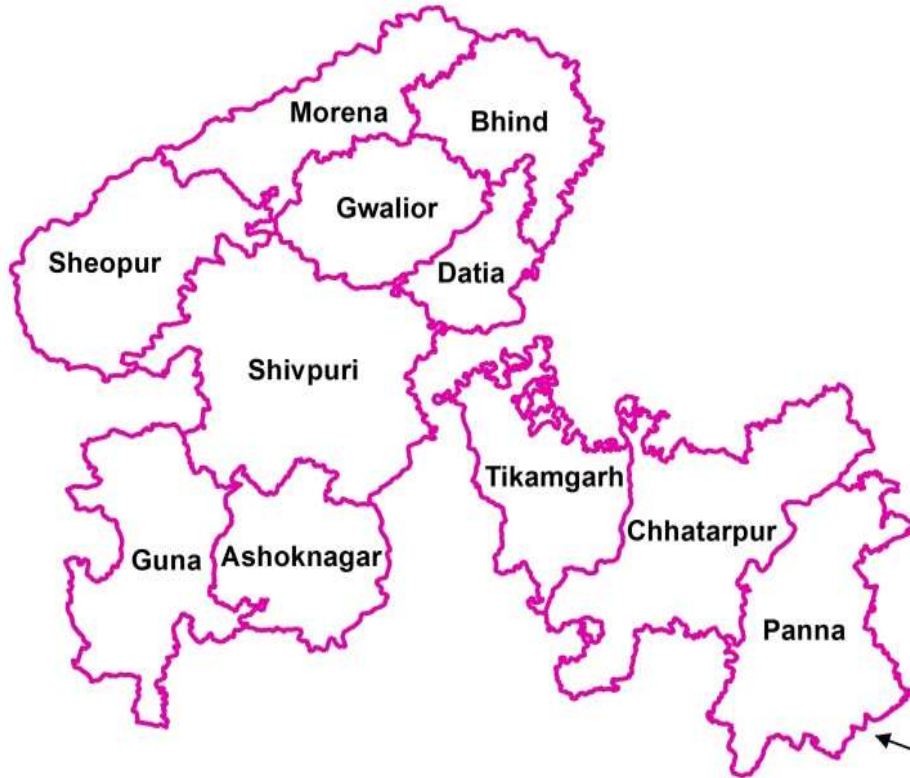

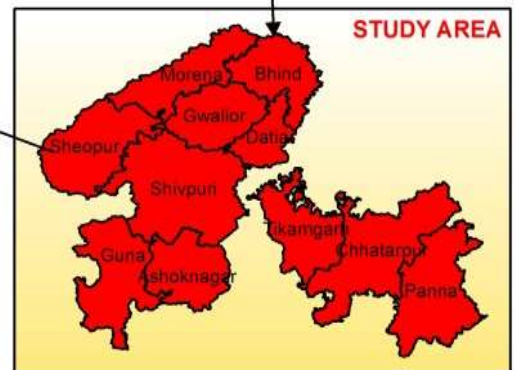

Gwalior, Shivpuri and Chhatarpur Forest Circle (2015-16 to 2019-20)

Sln	Forest Circle	Forest Division	Administrative District
1	Chhatarpur	Chhatarpur	Chhatarpur
2		Tikamgarh	Tikamgarh
3		South Panna	Panna
4		North Panna	Panna
5	Gwalior	Gwalior	Gwalior
6		Sheopur Kala	Sheopur
7		Morena	Morena
8		Datia	Datia
9		Bhind	Bhind
10	Shivpuri	Shivpuri	Shivpuri
11		Guna	Guna
12		Ashok Nagar	Ashok Nagar
13	WLC	Panna Tiger Reserve	Panna

Covered 14 forest divisions under 11 Districts of Madhya Pradesh State (12 territorial and 02 wildlife divisions) under 4 Forest Circles where CAMPA funds are utilized for year 2015-16 to 2019-20.

**LOCATION MAP OF STUDY AREA FOR CAMPA EVALUATION
WORK 2021-22, MADHYA PRADESH, INDIA**

The field visit for assigned Third Party Monitoring & Evaluation of Activities done under Madhya Pradesh State CAMPA was conducted in the month of October-November 2021, by SARDA team for Shivpuri, Chhattarpur and Gwalior Forest Circles.

The present M&E report is an attempt to carry out performance of the CAMPA activities undertaken by Madhya Pradesh State CAMPA in Gwalior, Shivpuri and Chhattarpur Forest Circle during the period of 2015-16 to 2019-20 -

- i. To evaluate CAMPA works undertaken by State CAMPA in assigned Forest Divisions from 2015-16 to 2019-20.
- ii. Monitoring and Evaluation of CAMPA schemes implemented from 2015-16 to 2019-20
- iii. Physically verification, Data Collection and Data Compilation of executed CAMPA works
- iv. Prepare a report based on physical verification and FGDs about the quality and quantity of the executed works

Methodology Adopted for Evaluation

The Evaluation Methodology Consisted of:

- data collected from concerned Range Office, DCF, CF and CCF offices,
- desk review of project documents and relevant related literature;
- interviews with major stakeholders, including implementing forest divisions, government agencies and JFMCs, and local community;
- field visits to 14 forest Divisions of the 11 project districts
- random site verification for executed works (10% sampling of each activity)
- Prepared a comprehensive M&E Report after analyzing the data

KEY FINDINGS

SHIVPURI FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 1580 ha area was treated under Mixed Plantation, Fuelwood and fodder, greenery of barren hills, Urjavan, (100% of the total targeted area (1580 ha)).
 - ✧ Afforestation completed in 34 villages under 05 different forest ranges of the division.
 - ✧ Planted species -Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
 - ✧ Eight sites were sampled from four forest ranges to estimate survival percentage of species.
 - ✧ Average survival rate of species estimated was 86.7 % and Scoring is 69.36%.
 - ✧ Microplan was completed in all visited village (8 in no).
 - ✧ The plantation sites were selected as per the working plan. Priority was given to those villages who were ready to own responsibility for protection and maintenance of the project assets.
 - ✧ The quality of work at plantation sites under the respective villages was found satisfactory.
- 

KEY FINDINGS

GUNA FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- 319 ha area was treated under Mixed Plantation, Fuelwood and fodder, Urjavan in 41 sites Guna Forest Division, including 160 ha of Urjavan. (100% of the targeted).
- Afforestation in 41 villages under 04 different forest ranges of the division.
- Planted species - Jamun, safed siras, Bauhinia, Mahua, Teak, Chiroal, Neem, Jangli jalebi, Karanj etc.
- 4 Sites were sampled from four forest ranges to estimate survival percentage of species.
- Average survival rate estimated was **85.2 %**. and overall Scoring is **64.59%**
- microplan was completed in all visited sites (4 in no).
- The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

ASHOKNAGAR FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 355 ha area was treated under Mixed Plantation, Fuelwood and fodder, greenery of barren hills, Urjavan, (100% of the total targeted area).
- ✧ The afforestation work was done in 8 PF under 03 different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ Two plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 82.6 % and overall Scoring is 62.52%.
- ✧ microplan was completed in all visited sites (4 in no).
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

GWALIOR FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 402 ha area was treated under Mixed Plantation, Fuelwood and fodder, greenery of barren hills, Urjavan, (100% of the total targeted area).
- ✧ The afforestation work was done in 09 forest compartment under 03 different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ A total of two plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 88.8 % and overall Scoring is 62.67%.
- ✧ It is observed thar during the project implementation, the process of microplan was completed in all visited village (2 in no).
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

MORENA FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 481 ha area was treated under Mixed Plantation, greenery of barren hills, Urjavan, (100% of the total targeted area).
- ✧ The afforestation work was done in 19 sites under Sabalgarh and Pahargarh forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ Three plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 83.1 % and overall Scoring is 70.40%.
- ✧ The plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

DATIA FOREST DIVISION (CAMPA/NPV PROJECTS 2015-16 TO 2019-20)

- ✧ 305 ha area was treated under different plantation type like Mixed Plantation, Urjavan, (100% of the total targeted area).
- ✧ The afforestation work was done in 11 sites under 3 forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ One plantation site was sampled to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 84.3 % and overall Scoring is 56.78%.
- ✧ The plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

BHIND FOREST DIVISION (CAMPA/NPV PROJECTS 2015-16 TO 2019-20)

- ✧ 30 ha area was treated under Urjavan sceme, (100% of the total targeted area).
- ✧ The afforestation work was done in 06 sites.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ Two plantation site were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 72.2 % and overall Scoring is 59.27%.
- ✧ Microplan was prepared and the plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

CHHATARPUR FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 697 ha area was treated under Mixed Plantation, Urjavan, (100% of the total targeted area).
- ✧ The afforestation work was done in 42 sites under different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ A total of four plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 87.8 % and overall Scoring is 61.00 %.
- ✧ Microplan was prepared and the plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

TIKAMGARH FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 465 ha area was treated under Mixed Plantation, Urjavan, (100% of the total targeted area (465 ha))
- ✧ The afforestation work was done in 30 sites under different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ A total of three plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 79.2 % and overall Scoring is 54.91%.
- ✧ Microplan was prepared and the plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found good

KEY FINDINGS

NORTH PANNA FOREST DIVISION (CAMPA/NPV PROJECTS 2015-16 TO 2019-20)

- ✧ 1196 ha area was treated under Mixed Plantation, Urjavan, (100% of the total targeted area (1196 ha).
- ✧ The afforestation work was done in 48 sites under different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ A total of five plantation sites were sampled from four forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 86.8 % and overall Scoring is 49.86%.
- ✧ Microplan was prepared and the plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

KEY FINDINGS

SOUTH PANNA FOREST DIVISION (*CAMPA/NPV PROJECTS 2015-16 TO 2019-20*)

- ✧ 1073 ha area was treated under Mixed Plantation, greenery of barren hills, Urjavan. (100% of the total targeted area (1073 ha) 0
- ✧ The afforestation work was done in 41 sites under different forest ranges of the division.
- ✧ The important species planted among these plantation sites were Teak, Chiroal, Sisham, Amla, Neem, Jangli jalebi, Bahera, karanj etc.
- ✧ A total of three plantation sites were sampled from two forest ranges to estimate survival percentage of species.
- ✧ Average survival rate of species estimated was 84.8 % and overall Scoring is 66.94 %.
- ✧ Microplan was prepared and the plantation sites were selected as per the working plan.
- ✧ The quality of work at plantation sites under the respective villages was found satisfactory

Division wise scoring

Suggestions & Recommendations

- 1.The plantations, particularly at undulating land of Shivpuri, Gwalior and Morena, need special attention with regular monitoring.
- 2.Fixing of proper signboards for CAMPA must be ensured, wherever absent, viz. near SMC Structures of created at Madhav national park and Panna Tiger Reserve.
- 3.The plantation activities in remote areas may be provided with approach roads and watch & ward facilities.
- 4.Regular or timely release of funds should be ensured for timely weeding and gap filling works.
- 5.Agroforestry models may also be taken up under the scheme on non-forest lands. Silvicultural audit of development interventions in forests should be carried out on periodic basis along with suitable research and technical inputs.
- 6.Community Nurseries under supervision of R&D division nearby the plantation sites may be encouraged to create local livelihood option. Nursery activities and plantation establishment in the forest areas adjoining the villages have helped to provide employment to the individuals near to their place of habitation at least for a period of 3 months in a year.
- 7.Species diversity may be also ensured in case of aonla plantations in visited areas.
- 8.Identification of prioritized and suitable species and studies on prioritization of location specific species for compensatory afforestation should be conducted.

Suggestions & Recommendations

9. Regular monitoring is required to succeed plantation and also to control forest fire near plantations sites to protect the recent CAMPA plantations.
10. Plantation journals should be regularly maintained and made available during assessment.
11. Efforts should be given to generate awareness on providing social fencing for protection of the plantations at all stages by providing some indirect incentives (EPA) to the local population.
12. A fire line should be ensured for every plantation as a precautionary measure. The same can also be used as a path while inspection particularly in border areas.
13. The created water harvesting structures at MNP may be supported it with biological stabilization measures to integrate with the mechanical measures for their long term stability.
14. Case study and New dimension of plantation under Khan Model at Gwalior Forest division must be separately studied and made available to public domain.
15. Some cracks are seen in new constructed forest quarter due to construction in soil fill area. So while selecting sites for construction of building, soil condition must be check, analyzed and Estimate design must be site specific rather than department's Typical Model Estimate. Utilization with occupancy and proper maintenance may also be assured.

THANK YOU...
